Subject: Comments on Solar Energy Siting and request for phone call

Robin:

Dave Potter suggested that I reach out to you regarding solar energy issues. I have worked 26 years for CVPS and GMP in the power supply area and have experience with solar energy. From my experience at CVPS and GMP , it seems that the legislature needs to talk to more people like me, who are knowledgeable of the negative economic aspects of about solar energy. I would like to talk with you about these issues. I would also like to address the House Natural Resources and Energy committee. I feel very strongly that the state is moving too fast in promoting and installing solar energy facilities.

Enclosed is a copy of the comments I emailed to Katie Pickens as part of the request for public comments on siting (revised slightly from version sent directly to her yesterday).

Feel free to call me anytime.
