Subject: in re: Siting Renewable Energy in Vermont

Included herewith by attachment for consideration of members of the Vermont Legislature and members of the Legislative Council are H.I. 5 Renewable Energy Systems Inc. remarks on behalf of Sunshine Renewable Energy LLC of Vermont.

While the project referenced in our remarks is primarily under the regulatory authority of ISO NE, the strategic development of the project may be of interest to the legislature in its consideration of new Siting legislation.

H.I. 5 RES does not submit its remarks or detail its strategies as a blueprint for all other projects or those seeking to site renewable energy projects in Vermont. Rather, we submit our remarks for the benefit of the legislators as they consider new legislation. Vermont is in perfect position to EMPOWER all of its citizens and more. It is in position to become the new Power House of New England and thereby to become an example for all others seeking to fully embrace the new energy and new economy. Using energy as its catalyst, it can also do so much more. Challenges are, after all, only opportunities to realize our intentions and create our society in accordance with the dream of our forefathers and residents of today.

Should you have any questions about our submission, please do not hesitate to contact us via our company email at hi5res@email.com or by telephone at 978.384.8032.

Thank you in advance for this opportunity to contribute to your discussion.

Louise Hart, President
