

**Act 176 Medication Assisted Treatment Data as of 8.1.2018**

- How many inmates in the month of July were inducted through COWS? How many exhibited symptoms and were not?
  - 15 inmates for the month of July were put on COWS protocol in which they exhibited signs and symptoms of OUD withdrawal yet were not inducted on MAT.
  - 15 inmates for the month of July were inducted on MAT through COWS scoring, and their DSM-5 scores.
  
- How many inmates in the month of July were continued on MAT? How many were discontinued, and what were the reason for discontinuations (this is likely to be the standard reasons from the MAT Worksheet)?
  - 74 inmates for the month of July were continued on their MAT medications from the community.
  - A total of 3 inmates for the month of July were discontinued from their verified community MAT medications, all of which were discontinued due to refusing to provide a urine for a drug screen upon intake.
  
- How many have been or are schedule to be inducted on MAT prior to release?
  - 7 inmates in the month of July were inducted on MAT prior to release.
  - 4 inmates in the month of July were approved to start MAT induction once their discharge date is 30 days out (these discharge dates have already been verified).
  - 32 inmates in the month of July were screened for MAT induction prior to being discharged and were approved.
  
- How many have been provided care coordination because induction prior to release was not possible?
  - 0 referrals have been made for non-inducted Pts for the Month of July. However, any Pt that reports a history of substance abuse on intake, is receiving the Vermont Substance Abuse Treatment & Recovery Directory as a referral due to length of stay issues.
  
- How many (if any) inmates have we inducted on methadone?
  - 0 inmates have been inducted on methadone to date
