

H.424

An act relating to the Commission on Act 250: the Next 50 Years

It is hereby enacted by the General Assembly of the State of Vermont:

Sec. 1. FINDINGS; PURPOSE

(a) Findings. The General Assembly finds as follows:

(1) In 1969, Governor Deane Davis by executive order created the Governor's Commission on Environmental Control, which consisted of 17 members and became known as the Gibb Commission because it was chaired by Representative Arthur Gibb.

(2) The Gibb Commission's recommendations, submitted in 1970, included a new State system for reviewing and controlling plans for large-scale and environmentally sensitive development. The system was not to be centered in Montpelier. Instead, the power to review projects and grant permits would be vested more locally, in commissions for districts within the State.

(3) In 1970, the General Assembly enacted 1970 Acts and Resolves No. 250, an act to create an environmental board and district environmental commissions. This act is now codified at 10 V.S.A. chapter 151 and is commonly known as Act 250. In Sec. 1 of Act 250 (the Findings), the General Assembly found that:

(A) "the unplanned, uncoordinated and uncontrolled use of the lands and the environment of the state of Vermont has resulted in usages of the lands

and the environment which may be destructive to the environment and which are not suitable to the demands and needs of the people of the state of Vermont”;

(B) “a comprehensive state capability and development plan and land use plan are necessary to provide guidelines for utilization of the lands and environment of the state of Vermont and to define the goals to be achieved through land environmental use, planning and control”;

(C) “it is necessary to establish an environmental board and district environmental commissions and vest them with the authority to regulate the use of the lands and the environment of the state according to the guidelines and goals set forth in the state comprehensive capability and development plan and to give these commissions the authority to enforce the regulations and controls”; and

(D) “it is necessary to regulate and control the utilization and usages of lands and the environment to insure that, hereafter, the only usages which will be permitted are not unduly detrimental to the environment, will promote the general welfare through orderly growth and development and are suitable to the demands and needs of the people of this state.”

(4) In 1973 Acts and Resolves No. 85, Secs. 6 and 7, the General Assembly adopted the Capability and Development Plan (the Plan) called for by Act 250. Among the Plan’s objectives are:

(A) “Preservation of the agricultural and forest productivity of the land, and the economic viability of agricultural units, conservation of the recreational opportunity afforded by the state’s hills, forests, streams and lakes, wise use of the state’s non-renewable earth and mineral reserves, and protection of the beauty of the landscape are matters of public good. Uses which threaten or significantly inhibit these resources should be permitted only when the public interest is clearly benefited thereby.”

(B) “Increased demands for and costs of public services, such as schools, road maintenance, and fire and police protection must be considered in relation to available tax revenues and reasonable public and private capital investment. . . . Accordingly, conditions may be imposed upon the rate and location of development in order to control its impact upon the community.”

(C) “Strip development along highways and scattered residential development not related to community centers cause increased cost of government, congestion of highways, the loss of prime agricultural lands, overtaxing of town roads and services and economic or social decline in the traditional community center.”

(D) “Provision should be made for the renovation of village and town centers for commercial and industrial development, where feasible, and location of residential and other development off the main highways near the village center on land which is other than primary agricultural soil.”

(E) “In order to achieve a strong economy that provides satisfying and rewarding job and investment opportunities and sufficient income to meet the needs and aspirations of the citizens of Vermont, economic development should be pursued selectively so as to provide maximum economic benefit with minimal environmental impact.”

(b) Purpose. The General Assembly establishes a Commission on Act 250: the Next 50 Years (the Commission) and intends that the Commission review the vision for Act 250 adopted in the 1970s and its implementation with the objective of ensuring that, over the next 50 years, Act 250 supports Vermont’s economic, environmental, and land use planning goals.

(c) Executive Branch working group. Contemporaneously with the consideration of this act by the General Assembly, the Chair of the Natural Resources Board (NRB) has convened a working group on Act 250 to include the NRB and the Agencies of Commerce and Community Development and of Natural Resources, with assistance from the Agencies of Agriculture, Food and Markets and of Transportation. The working group intends to make recommendations during October 2017. The General Assembly intends that the Commission established by this act receive and consider information and recommendations offered by the working group convened by the Chair of the NRB.
