**Subject:** Response to request for review of indicator data in your committee's jurisdiction

Maida and Brian,

The House Healthcare Committee reviewed the proposed outcomes and indicators specific to Vermonters are healthy. Although we know with our healthcare reform, specifically the All Payer Model, there are many other criteria we'll be reviewing, we agree the outcomes in your memo are important indicators.

We discussed adding an indicator about Vermonters having access to affordable healthcare. But without understanding all the relevant data points available we couldn't draft an indicator. We ask that the Government Accountability Committee consider discussing "access to affordable healthcare" as an indicator.

Thank you,  
Lori
