Mission/Vision Statement

The mission of the Vermont Department of Forests, Parks and Recreation (FPR) is to monitor and maintain the health, integrity, diversity and value of important species, natural communities, and ecological processes by:

- Managing forests for sustainable economic growth;
- Providing and promoting opportunities for compatible outdoor recreation; and
- Furnishing related information, education, and service.

Department/Program Description

Administration - The Administration Division is responsible for leadership, management and oversight of all Department divisions, programs, financial management, personnel management, policy development and legal services, as well as administering recreation and land and water conservation grant programs.

Forestry - Forestry programs affect a broad and expanding constituency concerned with the sustainable use, management, protection and health of Vermont's forest landscape, representing 74% of the state. These forests provide the economic resource base for Vermont's diverse forest economy through sustainable timber management (\$1.4 billion annually and over 10,000 jobs), as well as providing the foundation of the state's recreation and tourism economies. Vermont's actively managed forest also provides critical biological diversity, natural communities and wildlife habitat.

The Forestry Division has responsibility for administration and oversight of the 1.85 million acres of private land enrolled in the current use tax program for forest land, stewardship and public access and recreation activities on over 345,000 acres of state-owned land, assisting municipalities in the management of urban trees and municipal forests, forest health monitoring, assisting the forest products industry including the wood energy market and the administration of forestry assistance programs.

State Parks - The State Parks Division is responsible for planning, operation, construction and maintenance of the State Parks system and the conservation and interpretation of the natural and cultural resources within it. The State Park system includes 55 developed Parks that saw over 1,000,000 visits in 2015 and nearly that number again in 2016 and those visits contribute an estimated \$88 million annually to Vermont's economy.

Land Administration - The Lands Administration Division is responsible for the administration of state-owned lands managed by the three departments within the Agency of Natural Resources (ANR) - approximately 345,000 acres of fee lands and an additional 140,000 acres of conservation and recreation easements held by the Agency. In this capacity, the Division also maintains ANR property records and maps; administers leases, licenses and special use permits for ANR lands; carries out ANR land acquisitions and other property transactions; administers the ANR Payment in Lieu of Taxes (PILOT) program; coordinates long-range management planning for ANR lands; conducts property surveys and prepares maps of ANR lands, and coordinates the development of ANR lands policies.

Vermont Youth Conservation Corps - FPR is the administrator of pass-through funds from to the Vermont Youth Conservation Corps (VYCC). The VYCC provides youth with workforce and educational opportunities to develop leadership and skills through natural resource related projects. VYCC receives \$48,307 of general funds to support their Youth in Agriculture program and \$90,000 from the Agency of Transportation's Bicycle and Pedestrian Program to support high priority recreation trail work on State land.

Forest Highway Maintenance - This program uses state funds to repair and maintain the ANR forest highway network. This network consists of approximately 600 miles of roads and is essential to the maintenance of state park and forest land, timber extraction, and to providing access for the recreating public.

Recreation - Although there is no direct appropriation at this point, dispersed recreation service is not only a prominent program of the department, but also a growing and diversifying aspect in terms of volume and public demand. Staff and resources from all department divisions use state appropriations combined with federal and private funding to provide recreational access to the state-owned lands managed by the department. The increasing demand for access coupled with a renewed appreciation for the multiple values of outdoor recreation activity to individuals and communities has led to the department's current concentrated effort to focus on expanding and improving access to recreational opportunities on department lands and in conjunction with private landowners and statewide recreation partner organizations.

Key Budget Issues FY18

Parks visitation again reached near record-breaking levels with the attendance of almost 1 million visitors. The visitation levels recorded over the last two years last happened 27 years ago and have only occurred five other times over the 91-year history of the park system. In addition to increased revenue this level of visitation brings increased costs primarily in the areas of maintenance equipment and materials, capital improvements and temporary staff. Following a classification study the park temporary staff

budget increased to bring pay rates closer in line with the employment marketplace. The State park system relies heavily on temporary workers for high quality front line service and it is critical that pay rates are somewhat competitive.

This budget includes final resolution to the structural budget issue of utilizing the Lands and Facilities Trust Fund against statutory intent for operating expenses. In FY17 this budget issue was partially addressed with the final portion completed in FY18. General fund base is restored eliminating reliance on the Trust Fund to support state land management activity.

Two positions are added, a Deputy Commissioner and a Director of Operations and Recreation. These positions will coordinate across divisions and programs enhancing communication, responsiveness and efficiency throughout the department. The Deputy Commissioner will assist the Commissioner in managing overall operations also serving in a pivotal role in developing and providing stability for continued operations as the department faces the impending retirement of long-serving division directors. Working with the Commissioner the Deputy will ensure proper management and stewardship of Department resources, including but not necessarily limited to: property; facilities and space management; fleet management; and IT management. In addition, the Deputy Commissioner position will emphasize strategic initiatives to strengthen the role of forest products in Vermont's economy, providing sustained attention and resources to expand this critical aspect of the Department's work. The Director of Operations position will also play a key role with transition planning and will coordinate recreation services to meet the rapidly growing and diversifying demand for recreation on State land as well as strategic efforts with outdoor industry partners to enhance statewide economic development through recreation.

The Forestry Division relies upon federal funding to support a variety of critical programs. Federal awards are shifting away from core program support to competitive grants leading to uncertainty in funding levels from year to year. Federal revenue is currently a critical component of our funding, allowing us to maintain current services and programs in the Forestry Division. We are mindful of these changes and trends and may need to seek alternate funding options in the coming years.

NARRATIVE/COMMENTS/STORY: Describe the program. Who/what does it serve? Are there any data limitations or caveats? Explain trend or recent changes. Speak to new initiatives expected to have future impact.

The state lands timber sale program supports Vermont's forest products industry through the sale of the products of forest management activities on state forest land and state parks. Forest management plans, vetted through a public process, guide forest management activities designed to improve forest health and productivity, improve wildlife habitat and to create more resilient forests. Detailed prescriptions are written for each treatment and trees are marked for harvest to implement the prescriptions. Marked timber is sold on a competitive bid basis to contractors who harvest it and, in turn, supply local sawmills and secondary wood industries which add value and stimulate local economic activity. Staff regularly monitor harvests while operational to ensure compliance with contract conditions and relevant statutes. State lands program staff implement the program, but reductions in staffing over time and the many competing demands on their time which effect their ability to implement the program. Analysis of time coding indicate a steady and substantial increase in time coded to administration of recreational activities on state lands and a slow decrease in time spent on the state forest timber sale program. CAVEATS: Production volumes listed above are based on volumes and acres offered for sale in a given fiscal year. Revenues are based on receipts from timber sales which are likely to have been sold in previous years due to the multi-year nature of most timber sale contracts. Cost figures are based on time and expenses coded in a particular fiscal year which includes the costs of both marking and selling timber sales as well as the administration of contracts initiated in previous years.

NARRATIVE/COMMENTS/STORY: Describe the program. Who/what does it serve? Are there any data limitations or caveats? Explain trend or recent changes. Speak to new initiatives expected to have future impact.

The purpose of the state parks program is to provide high quality service, facilities and stewardship of resources so Vermonters and their guests can realize meaningful outdoor recreation experiences to improve their personal physical and emotional health, to enhance their environmental literacy and to contribute to their economy. Numerous studies support the conclusion that high quality outdoor recreation activity contributes to personal physical and emotional health and environmental sensitivity. There are no ongoing efforts however to directly tie these benefits to individuals visiting Vermont State Parks. It can be assumed that both total annual visitation and participation in interpretive programming effectively measure performance toward those outcomes.
