Extraordinary Special Education Reimbursement

Draft 7.1

Examples

Example 1

- Assume

    o SU has special education expenditures of $80,000 for one student
    o Threshold amount is $70,000 (4.62 X $15,151 (statewide average district education spending per equalized pupil))
    o Base amount of educational support grant is $1,800

- Reimbursement would be:

    o 90% X $10,000 (amount that exceeds threshold) = **$9,000 +**
    o <u>Lesser</u> of:
        ▪ **$10,000** (amount that exceeds threshold) or
        ▪ 60% X $68,200 ($70,000 (threshold amount) - $1,800 (base amount)) = $40,920

- Therefore, would receive $19,000 ($9,000 + $10,000).   Under draft 6.1, would have received $49,920 ($9,000 + $40,920).

Example 2

- Assume

    o SU has special education expenditures of $115,000 for one student
    o Threshold amount is $70,000 (4.62 X $15,151 (statewide average district education spending per equalized pupil))
    o Base amount of educational support grant is $1,800

- Reimbursement would be:

    o 90% X $45,000 (amount that exceeds threshold) = **$40,500 +**
    o Lesser of:
        ▪ $45,000 (amount that exceeds threshold), or
        ▪ 60% X $68,200 ($70,000 (threshold amount) - $1,800 (base amount)) = **$40,920**

- Therefore, would receive $81,420 ($40,500 + $40,920).   Under draft 6.1, would have received the same.
