Some VNAs of Vermont Facts

- □ 10 not-for-profit VNAs of Vermont members
- □ Members serve all 251 of Vermont's towns
- □ Approximately a million visits every year
- □ Home care represents just over 2% of health care spending on Vermonters (GMCB Expenditure Analysis)
- □ Universal access to medically necessary home care and hospice services

Telemonitoring

- □ Telecommunication devices at home that take vital signs and relay the information back to agency
- ☐ Home intervention when needed

Hospice and Palliative Care

Hospice Services

A specially coordinated home-based program that helps children and adults with a terminal illness, along with their families, cope with death by living life to the fullest. The interdisciplinary team emphasizes care directed toward expert pain and symptom control, maximizing independence and socialization and providing support.

Palliative Care

 Palliative Care services are offered by the VNAs of Vermont to help those who have life-threatening or life-limiting illness maintain the highest quality of life possible

State Programs

Home Care - Traditional Medicaid (Funded and administered by the DVHA). Vermont Medicaid funds the same home care services as Medicare including hospice.

Choices for Care Waiver (Funded through DVHA, administered by DAIL): Nursing-home level care in the home, enhanced residential care and in the nursing home. Case Management, personal care, homemaker respite/companion.

State Programs: Children's Integrated Services

- Funded through DVHA, administered by DCF
- Offers early intervention, family support, and prevention services that help ensure the healthy development and well-being of children, pre-birth to age 5.
- □ Services are available at low or no cost to families with qualifying needs, regardless of income

State Programs: High Tech

- □ Funded through DVHA, administered by DAIL
- Skilled nursing care for technology-dependent children and adults; pulmonary care and infusion therapy (parenteral and enteral feeding, IV chemotherapy, and IV antibiotics)
- Coordination of medical supplies and sophisticated medical equipment
- ☐ The goal is to support the transition from hospital or other institutional care to the home or to prevent institutional placement

The Value of Home Care

When appropriate, home health care is the least costly and most preferred care setting.

What is Independence?

VNAs of Vermont allow Vermonters to stay in their own homes.

- Providing comfort and privacy.
- Surrounded by family, friends, and pets.
- Having control of their care and their health.

of persons 65+ stongly agree:

"What I'd really like to do is stay in my current residence

for as long as possible."

The Value of Choices for Care

Challenges

- □ Aging population
- □ Link between aging and poverty
- ☐ Staffing shortages
- □ Reimbursement
 - Medicaid reimbursement increases are below inflation; caseload increases are not a rate increase
 - Medicare: Downward pressure on rates being phased in part of the ACA; new cuts recommended by MEDPAC
 - Provider Tax: \$4.1M tax on a \$17.8M traditional Medicaid program; Choices for Care is taxed too

Who Pays for Home Health

Health Care Reform

Changes in how we:

- DELIVER care
 - Patient and family centered/ coordination / integration
- PAY for care
 - Value-based
- MEASURE the outcomes of care
 - Emphasis on quality

Health Care Reform – VNA's Role

- We are **the bridge** from acute problems (hospitalizations) to rehabilitation and health maintenance.
- We are **integral** to primary care and prevention.
- We are **the link** to home and the community where patients with chronic disease can gain and maintain **independence**, learn **self-care** and **manage their disease**.
- We are **the experts** who care for patients and families and support care decisions at the end of life.
