ACA Insurance Affordability Programs

- The “Silver Solution” works because all consumers eligible for the CSRs are also eligible for the APTC.

We'll see you through.

Advanced Premium Tax Credit (APTC)

- Subsidizes the cost of premiums for low and moderate income families.
- “Advanced” means it can be used to lower the upfront premium costs, or it can be taken as a credit at the end of the year on income tax returns.
- The credit amount is calculated using the premium amount for the Second Lowest Cost Silver (SLCSP) or “Benchmark” Plan, but a family may use the credit to purchase any metal level of health insurance coverage.

Cost of a Benchmark Plan		Expected Family Contribution:		Advance Premium Tax Credit (APTC)
2018 \$6,060 per year or \$505/month		2018 Single 200% FPL = \$24,120 Premium Contribution 6.34% = \$1,529 year or \$127 per month		2018 \$4,531/year or \$378 per month

The **premium of the Benchmark Plan** is the cost of the second lowest cost Silver plan (SLCSP) used to calculate the amount of APTC.

The family’s **expected contribution** is set on a sliding scale based on income. It varies from 2% of income at 100% FPL to 9.5% at 400% FPL.

The **Advance Premium Tax Credit (APTC)** “fills the gap” between what a family is expected to contribute to health insurance and the cost of a benchmark plan.

Cost Sharing Reductions (CSRs)

- CSRs lower out of pocket costs such as deductibles, coinsurance and co-payments
- Only available if the family purchases a Silver level plan
- There are three tiers of CSR benefits based on family income/FPL level

IMPACT OF CSRs ON OUT-OF POCKET COSTS

CSR Tier Levels	TIER 1 CSR Silver Plan: 94% Actuarial Value	TIER 2 CSR Silver Plan: 87% Actuarial Value	TIER 3 CSR Silver Plan: 73% Actuarial Value	NO CSR Silver Plan: 70% Actuarial Value
