Hi Ms. Grad. Wrote to you a little while ago concerning the proposed new laws you people are considering. Probably too little, too late, but knowing the direction you're heading, you do realize that all of these laws and more have been imposed on the people of Chicago and Baltimore. As it turns out you can create all the laws you want, but the only people you will end up affecting are the very people you claim to be trying to protect.

I'm writing this with the hope that you're not one the people in Montpelier who does not have an ulterior motive or your own agenda. We all know about the forces at play outside our state, and would hate to think were having our rights infringed on because of an entity like that.

Sincerely, Dennis Sumner
