VERMONT RESULTS FIRST - PROGRAM INVENTORY ADULT CRIMINAL JUSTICE PROGRAMS

The purpose of this program inventory is to categorize criminal justice programs into defined categories of effectiveness to reduce recidivism or otherwise reduce crime. This presents an easy way to identify interventions that have been rated by eight national research clearinghouses¹, Washington State Institute for Public Policy (WSIPP), and included in the Pew-MacArthur Results First benefit-cost model. The information in the inventory was provided by the agency operating the program in Vermont. If no information was received other resources were used.²

The Results First Program Inventory assigns colors to each rating to indicate its effectiveness:

"Effective" programs are green meaning that rigorous studies indicate they work to reduce recidivism in multiple jurisdictions;

"Promising" programs are yellow, indicating that fewer studies show an effect on recidivism or crime, or that program delivery has been changed;

Programs with "No Effect" are grey;

No shading indicates there's "No Evidence" and that the program needs an evaluation;

"Mixed Effects" are shaded in blue and

"Negative Effects" in red.

Twenty-Five programs were identified in the Vermont Program Inventory. Of the 25:

52% are Effective of which approximately half (54%) have been or are being evaluated

8% are Promising of which 50% have been or are being evaluated

8% show No Effect - 50% have been evaluated

36% have No Evidence of effectiveness - 25% have been or are being evaluated

4% have Mixed Effects

A program delivered in Vermont may be categorized as effective but this needs to be demonstrated by an evaluation to ensure it is achieving the expected outcomes and to document that it is being delivered with fidelity to the model. In fact, all rankings should be confirmed by evaluations of programs delivered in Vermont but especially those considered effective and promising and those with no information but that are considered important by stakeholders. In the tables below the columns list the evidence base and whether an evaluation has been completed. A program is considered to have had a rigorous evaluation if a control group (e.g., defendants who did not receive the intervention) was used. The footnotes include hyperlinks to published research studies.

¹ Washington State Institute for Public Policy, Blueprints for Healthy Youth Development, California Evidence-Based Clearinghouse for Child Welfare, Coalition for Evidence-Based Policy, CrimeSolutions.gov, National Registry of Evidencebased Programs and Practices, Promising Practices Network, What Works Clearinghouse, and What Works in Reentry Clearinghouse.

² Other sources of information were used when departments or service providers didn't complete the survey. Not all programs offered in Vermont may be captured in this report.

Department of Corrections Programs						
Program	Target Population	Effectiveness Rating	Vermont Evaluation	Control Group Evaluation (VT)	Program Cost	
Community High School of Vermont	Incarcerated Offenders	Evidence-based ³	None	N/A	\$2,294,219 ⁴	
Risk Reduction	Incarcerated Offenders	Evidence-based ⁵	On going	No	TBD	
Tapestry	Substance Abuse- Female Offenders	Evidence-based ⁶	None	N/A	\$350,000 ⁷	
Correctional Industries	Incarcerated Offenders	Evidence-based ⁸	None	N/A		
Housing Supports	Incarcerated Offenders	Evidence-based ⁹	None	N/A	\$6,321,018 ¹⁰	
Pre-Trial Services	Pre-trial Defendants	No Evidence	On going	Yes- matched ¹¹	TBD	
Work Crew	Low Risk Offenders	No Evidence	None	N/A

¹¹ A matched control group is a control group constructed from administrative records to closely match the treatment group on selected demographics. It does not generally account for self-selection bias. It is considered less rigorous than a Randomized Control Group study.

Community Justice Centers Programs: \$2,258,000 ¹²					
Program	Target Population	Effectiveness Rating	Evaluations	Control Group Evaluation (VT)	
Circles of Safety & Accountability (COSA)	High Risk Re-entry	Promising ¹³	On going	Yes- matched	
Reparative Boards	Probationers	Evidence-based ¹⁴	2005 2014	Yes-matched No	
Restorative Justice Panels	Low Risk	Evidence-based ¹⁵	2014	No	
Retail Theft Prevention	Retail Theft Offenders	No Evidence	None	N/A	

Court Diversion Programs: \$1,996,483 ¹⁶					
Program	Target Population	Effectiveness Rating	Evaluations	Control Group Evaluation (VT)	
Adult Court Diversion	Low Risk	No Evidence	2014	No	
DLS (Driving with License Suspended) Program	DLS Defendants	No Evidence	None	N/A	
Youth Substance Abuse Safety Program	Minors in Possession	No Evidence	None	N/A
