Subject: Comments on the Budget

Hello Theresa and Rebecca,

My name is Hannah Huber and I'm a resident of Montpelier.

I know the Appropriations Committees are requesting public input on the state budget. I may not be able to make the hearing tonight in Montpelier so here are my comments:

Climate action and mitigation should be in the budget! As a young person, this is paramount to me. In particular, I want to see 100k allocated for a full, impartial analysis of carbon pollution pricing in Vermont. I think this is what we need to move past the current exhausting political debate.

Thank you for taking my comments, and thanks for your work.

Best,

Hannah
