**Subject:** Funding for Climate Action and Carbon Pollution Pricing Study

Hi Theresa and Rebecca,

My name is Heather McLane and I teach at Montpelier High School. I would like to advocate for funding to be put in the budget for a Carbon Pollution Pricing study (or anything that might help the legislature move forward on climate action).

My students are very concerned about climate change and are discouraged that the legislature has not yet seriously considered carbon pollution pricing. They know that in the end, they will be the ones stuck footing the bill for the consequences of climate change.

On behalf of young people, I hope you will strongly consider this call to fund a study on carbon pollution pricing. It is a policy that every student I have ever taught supports even when presented with the best arguments and evidence from the lobbyists who oppose carbon pollution pricing.

Thanks so much,  
Heather
