Subject: Carbon Pricing
Attachments: Speak up for the Climate 2.pdf

Greetings Representative Buck: I am writing to encourage you to join many of your colleagues in supporting legislation that will put a price on carbon in a socially responsible way. Two bills: H.763 and H.791 warrant your attention and support.

I'm sure you are aware that the State of Washington is on the verge of becoming the first state to enact such legislation and that our fellow Northeastern States are also considering it as well. I think our ESSEX Plan presents a roadmap to an effective way to begin the process of converting to clean energy, on a large scale, in Vermont.

I would also like to issue an invitation to you to attend an event, sponsored by our church, that is part of our *Speak Up* series, this one being *Speak Up for the Climate*. The flyer is attached. We have been focusing on clean water and environmental issues as part of our celebration of God's creation. A number of us will be at Clean Water Day next week to advocate for funding for the clean up of our waters.

It's up to us to get to work on these issues, our federal government isn't about to do it right now.

Cordially,
Richard Butz
