**Subject:** Input on State Budget

Dear Ms. Buck,

As a concerned and voting citizen of Vermont, I urge you and the Senate Appropriations Committee to make sure that the state budget includes funding for climate action. In particular, please support **H.763 Carbon Pricing Study**. How can Vermont act responsibly regarding the challenges of the changing climate without even studying carbon pricing, an approach that has been used successfully to decrease CO2 pollution? I am depending on you and the Committee to do the right thing and support this bill!

Sincerely,  
Susan Hodges  
South Strafford, VT
