<p>H.897 Sec. 1 Findings</p>	<ul style="list-style-type: none"> • Summarizes findings from Delivery of Services Report (DMG) and Funding Report (UVM) • The General Assembly finds that: <ul style="list-style-type: none"> ○ students who require additional support would be better served if supervisory unions adopted the best practices recommended in the Delivery of Services Report; ○ the State’s current reimbursement model of funding special education serves as an impediment to adopting these best practices, largely due to the constraint on the use of funds and the misalignment with the policy priorities of serving students who require additional support across the general and special education service-delivery systems; ○ the census-based model of funding for students who require additional support would enable supervisory unions to adopt the best practices recommended in the Delivery of Services Report, largely due to the flexibility in how the funds could be used by supervisory unions and the alignment with the policy priorities; and 	<ul style="list-style-type: none"> • Eliminates General Assembly findings

	<ul style="list-style-type: none"> ○ the census-based model of funding will result, over time, in cost containment for special education services, which will be realized through lower property tax rates or the ability for localities to use funds for other educational purposes. ● The General Assembly recognizes that changing the models for delivery of services and funding for students who require additional support is a significant change for school systems and their constituencies, and that they will require time and assistance in making necessary adjustments 	<ul style="list-style-type: none"> ● Eliminated
<p>H.897 Sec. 2</p> <p>Goals</p>	<ul style="list-style-type: none"> ● To enhance the effectiveness, availability, and equity of services provided to all students who require additional support in Vermont’s school districts, including students receiving special education services and students who need additional support but do not receive special education services ● To support the enhanced delivery of these services, the State funding model for special education shall change for all supervisory unions in fiscal year 2021, for school year 2020-2021, from a reimbursement model to a census-based model, which will provide more flexibility in how the funding can be used, is aligned with the State’s policy priorities of serving students who require additional support across the general and special education service-delivery systems, and will simplify administration ● To provide additional staff and resources to the Agency of Education to support its work with supervisory unions and schools that are transitioning to the best practices recommended in the Delivery of Services Report 	<ul style="list-style-type: none"> ● Revised goal in first bullet to read “To enhance the effectiveness, availability, and equity of services provided to all students who require additional support in Vermont’s school districts ● Deleted

		<ul style="list-style-type: none"> • Adds two further goals <ul style="list-style-type: none"> ○ The General Assembly recognizes that a student on an individualized education program is entitled, under federal law, to a free and appropriate public education in the least restrictive environment in accordance with that program. The changes to State funding for special education and the delivery of special education services as envisioned under the act are intended to facilitate the exercise of this entitlement ○ The General Assembly recognizes that it might be appropriate and equitable to provide a higher amount of census-based funding to supervisory unions that have relatively higher costs in supporting students who require additional support, but the General Assembly does not have sufficient information on which to base this determination. Therefore, the act directs the Agency of Education to make a recommendation to the General Assembly on whether the amount of the census grant should be increased for supervisory unions that have relatively higher costs in supporting students who require additional support, and if so, the criteria for qualification for the adjustment and the manner in which the adjustment should be applied. The General Assembly intends to reconsider this matter after receiving this recommendation and before the census-based model is implemented
