

# Extraordinary Special Education Reimbursement

## Draft 7.1

### Examples

#### Example 1

- Assume
  - SU has special education expenditures of \$80,000 for one student
  - Threshold amount is \$70,000 (4.62 X \$15,151 (statewide average district education spending per equalized pupil))
  - Base amount of educational support grant is \$1,800
- Reimbursement would be:
  - 90% X \$10,000 (amount that exceeds threshold) = **\$9,000 +**
  - Lesser of:
    - **\$10,000** (amount that exceeds threshold) or
    - 60% X \$68,200 (\$70,000 (threshold amount) - \$1,800 (base amount)) = **\$40,920**
- Therefore, would receive **\$19,000** (\$9,000 + \$10,000). Under draft 6.1, would have received \$49,920 (\$9,000 + \$40,920).

#### Example 2

- Assume
  - SU has special education expenditures of \$115,000 for one student
  - Threshold amount is \$70,000 (4.62 X \$15,151 (statewide average district education spending per equalized pupil))
  - Base amount of educational support grant is \$1,800
- Reimbursement would be:
  - 90% X \$45,000 (amount that exceeds threshold) = **\$40,500 +**
  - Lesser of:
    - **\$45,000** (amount that exceeds threshold), or
    - 60% X \$68,200 (\$70,000 (threshold amount) - \$1,800 (base amount)) = **\$40,920**
- Therefore, would receive **\$81,420** (\$40,500 + \$40,920). Under draft 6.1, would have received the same.
