Subject: H.333

Dear Committee members,

Please support H.333 to stand by caretakers, trans-Vermonters, and everyone who hates waiting in line! It is a mental health, safety, AND physical health measure and it is time to make it happen.

Too many transfolk go untold hours in great physical discomfort because of the risk of using either bathroom.

Many caregivers don't know if they should go to the bathroom that matches the provider or the client/child/elder.

All of us women know the frustration of waiting in a long line for the "women's" room while the "men's" room remains empty. This is doubly frustrating with small children.

This is so easy to fix! I really hope you see it this way and will move the bill out of committee.

sincerely,
Rachel
