Subject: minimum wage hearing

Dear Vermont Legislators & All,

I wholeheartedly support legislation to require a minimum wage, a living wage, now and into the future. Low wages are actually a huge subsidy for businesses when the employees end up qualifying for various public support programs. I'm not sure about exemptions for some truly small local companies and farms but hope you consider all aspects with fairness. I suspect that most products that take advantage of employees or the environment just aren't essential.

Thanks,

TGM
