Subject: HealthFirst Testimony on Cuts to Medicaid Case Management Services

Chair Lippert,

As you work on your budget memo I wanted to check in to see if you're interested in hearing from independent physicians about the impact of the proposed cut to medicaid case management services included in the Governor's budget. This cut would have a significant impact on our primary care physicians, particularly those with high medicaid panels.

Please let me know if you're interested in such testimony and some possible times that may work for your committee to hear from HealthFirst.

Best,
David
