

My overall quality of Health has improved significantly due to the opportunities both the Vermont Medical Marijuana program and Southern Vermont Wellness, Brattleboro have provided.

Vermont's Medical Marijuana program has played a significant role in reducing the amount of traditional medical care needed for my various diagnoses, freeing up much needed appointment times with my primary care physician.

Being able to legally access the program has also allowed me to more effectively manage my symptoms without the use of "traditional" prescription medications. Personally I've been able to replace six medications with various forms of cannabis.

The staff at Southern Vermont Wellness, Brattleboro has and continues to be a valuable, trusted and instrumental resource for the community. The staff are kind, compassionate and highly knowledgeable professionals with a unique understanding of patient care, concerned with the wellbeing and overall health of the patients above all.
