

To Whom it may Concern:

I am writing to express my support of the racial justice bill H.492. It is time to put an end to the implicit bias that creates the disparity in our state. Even though our state is not racial diverse, African Americans are 5 times more likely to be stopped on the roads and more likely to be searched even though they are less likely to be in possession of anything illegal. I want our little state to lead the country by having oversight committees that make sure this policing practice (that has inspired the phrase "driving while Black") is changed and that African Americans have fair and unbiased trails. Please help bring the racial injustice that is happening all over this country into the light.

Thanks you,

Jennifer Boucher
