

Dear Representatives:

I support the establishment of the Racial Oversight Board. This is an important first step in letting people of color know that our state is determined to work on eliminating some of the systemic racism that exists in our institutions partly because we have historically been such a "white" state and we don't have that many opportunities to see our our own racial biases. This is especially important in terms of our criminal justice system.

Thanks you very much,
Judy Davidson

Brattleboro
