

Dear The Vermont State House, The Vermont State Senate, and Governor Phil Scott,

We are pleased to present you with this petition affirming this statement:

"H.105 has been introduced in the Vermont Legislature to prohibit the use of single-use plastic bags in Vermont. However, your support is needed to show our legislators that the bill deserves to have a Committee Hearing and to be advanced to the House and Senate chambers for a vote."

Attached is a list of individuals who have added their names to this petition, as well as additional comments written by the petition signers themselves.

Sincerely,
Bobby Arnell

As a state that claims to lead in environmental issues, there is no question that we need to prohibit the use of plastic bags in Vermont. Plastic bags are one of the leading threats to healthy oceans and are the health of our planet.

My sister lives in Takoma Park MD. A few years ago, her county (Montgomery County) stopped using plastic bags. In stores where that is all they use, customers could buy them. Most people learned and carried their own bags. Look up the statistics on this, but the amount of money saved in that county in a short time period, was staggering. It is a way of life now, for all demographics, SES, etc.

Banning plastic bags is a great thing. Think off the plastic killing all sea life and bird life, this needs to stop now, so act on removing this insidious convenience waste now.

john Bethune
charlotte, VT 05445
Mar 13, 2017

Why wouldn't we ban plastic bags? There are so many alternatives & plastic bags only do harm. They do no good. It just doesn't make sense to destroy the planet because we are too lazy to ask for a paper bag? While we are at it, let's go for plastic bottles too. We are smarter than this. It's well past time. Let's do the right thing for all living beings and the planet.

Please let help us show people how an abundance of convenience plastic is having devastating impact on our wild life and planet. All this garbage we create has to go somewhere. Let's form an educational plan to show people that we aren't trying to make their lives difficult or take something away from them. It is time we rip the band aid off everyone and start keeping reusable bags with us. It just takes some training and we would be doing something for the bigger picture.

One step in the right direction. Buy some cloth bags: no plastic needed. No plastic bags means less oil. Less oil means a cleaner, safer world for everyone, and eventually, hopefully more diamonds ;) it's a win-win!

Aaron Masi
Burlington, VT 05401
Mar 13, 2017

As I drove from Massachussets to northwestern Vermont, I saw a huge installation of plastic bags whipped up into the trees along the highway. For a moment I took it as an art instillation, but very quickly I gasped, knowing that it was a palpable sign of the human footprint upon our marvelous State of Vermont. We have existed for centuries by toting our purchased goods without the dreaded plastic bag. We can do this.

Long overdue. Push for money for public announcements and graphic pictures of the poor ocean life suffering and dying unnecessarily. We have been able to make plastic bags, plastic spoons, forks, knives from cornstarch for many years. Why isn't the EPA demanding that all plastic that is not biodegradeable be replaced by 2018. IT CAN BE DONE !! If we can keep upgrading phones then we sure can pay people in research and design to create strong biodegradeable plastics!!!! Please!!!

Burlington, VT 05401
Mar 12, 2017

While I re-use my plastic bags, and recycle all plastic others as well as all other plastic coverings and containers, still maybe we are better off without them. Half the problem is the lack of industry finding a way to use trashed material...preferring to bury or burn it. Where is the Yankee ingenuity???

I think banning single use plastic bags would be a wonderful thing. And we need to consider low income people and how to make this work for them, like providing reusable bags or funds for them, especially for people on the SNAP program.

Exceptions might be the meat counter area. Bagging meat separately avoids contamination issues. Also the plastic storage and freezer bags used in storing veggies etc harvested and frozen. Start with carry home bags, then move to the produce area after a few years.

Feb 28, 2017

Having moved here recently, I'm appalled that Vermont, which otherwise has a stellar reputation of environmental responsibility, is not banning these bags and requiring the recycling of other plastic bags. It's dead bang easy for shoppers to keep reusable washable bags in their cars and use them to shop. We need to join other states and cities to do the responsible thing. Thank you.

All the single use packaging should use compostable plastic or be not allowed. Raise the deposit so kids can earn some money collecting glass/plastic etc containers for the refund.

A ban is best but at least a fee for each is needed. It has worked wonders in Washington DC to clean up the rivers and reduce trash everywhere!

I understand there are complexities to this problem, but the core issue is this: inconvenient or not, plastic bags are a damaging use of resources. Please ban them.

Vermont is behind on this measure. Many other states and major cities have been successful with a plastic bag ban. Vermont citizens want this to move forward! And our beautiful Vermont nature *needs* this to move forward!
