RE: H.679

February 12, 2018

Dear Chairman Deen and Committee Members,

I am writing this letter in support for H.679. Alva Waste Services, LLC is a waste and recycle hauling company that is looking to expand and open its own transfer station in 2018. I started this business in 2006 and have been hauling almost all of our waste to a New Hampshire facility because of the lack of facilities in our area.

Alva Waste Services new transfer station will be located less than a half mile from the border of Vermont and New Hampshire making this change essential for our company to compete in getting New Hampshire waste hauled into our facility. If H.679 is approved, it will certainly help our company provide lower costs to all of our customers by increasing our economy of scale, that in turn would lower our operating costs.

I appreciate you and the committee for taking into consideration Alva Waste Services support for H.679.

Respectfully submitted,

Matthew Priestley
