## **Department Mission Statement**

The mission of the Vermont Department of Environmental Conservation is to preserve, enhance, restore, and conserve Vermont's natural resources, and protect human health, for the benefit of this and future generations.

## **Description of Divisions, Appropriations, and Programs**

By statute and through delegation from the Agency of Natural Resources, the Department of Environmental Conservation is charged with protecting public health and the environment. The Department meets this challenge through: (1) limiting environmental impacts through permits, compliance inspections, and enforcement; (2) delivering financial assistance to communities, citizen groups and businesses; (3) providing public education and technical assistance to communities, citizen groups and businesses; (4) monitoring environmental quality and public health; and (5) protecting and restoring natural resources. The Department strives to treat citizens and businesses fairly, honestly and openly, to provide programs that are efficient and cost-effective, to lead by example, and to make timely decisions.

The Department administers various state and federal programs with responsibility for regulating the discharge or emission of pollutants into the air, water or soil. Many of these programs are administered under the authority of federal law with the approval of the United States Environmental Protection Agency. In this way, the State of Vermont retains a central role in decisions affecting its citizens and is eligible to receive federal funds to implement these programs.

The Department has three appropriations that cover the Department's work across seven divisions. Descriptions of each division are located below under their appropriation. An appropriation for the Connecticut River Valley Flood Control Compact for Tax Losses, formerly its own appropriation, is included for the first time in FY18 in the Office of Water Appropriation.

## **Management and Support Services Appropriation**

### Commissioner's Office

The Commissioner's Office provides leadership, management, business, policy and planning services for all departmental divisions and programs.

### Environmental Compliance Division

The Environmental Compliance Division houses the Environmental Assistance Office and the Environmental Enforcement Office, providing the regulated community the full range of compliance activities. Assistance activities include providing guidance to permit applicants, environmental compliance assistance to Vermont businesses and municipalities, recognition programs for green businesses, and support to municipal household hazardous waste programs. The Division assists businesses, communities, state agencies, and others in identifying effective and economical ways to reduce waste at the source in order to avoid waste treatment and disposal costs and to safeguard human health and the environment. The Division is also charged with enforcing the laws and regulations administered by the Agency of Natural Resources, primarily for the Department of Environmental Conservation, but also for the Department of Forests, Parks and Recreation. The Department of Fish and Wildlife handles most of its own enforcement. The Division also coordinates with the Agency of Agriculture, Food and Markets regarding cases involving that agency's jurisdiction. Enforcement activities include civil and criminal investigations, prosecution of administrative enforcement cases before the Environmental Court, and screening and referrals of criminal and civil cases (as appropriate) to the state's attorneys and the Attorney General. The goal is to integrate all compliance activities in a manner that protects the environment and public health, ensures the integrity of the Agency's regulatory programs, and provides an even playing field for all Vermonters. Providing the full range of compliance strategies under one division allows for the strategic administration of Department compliance services and promotes the recognition of and responsiveness to compliance trends.

### Vermont Geological Survey

The Vermont Geological Survey conducts mapping, research and provides aid and advice about the state's geology, mineral resources and topography. The Geological Survey performs bedrock and surficial mapping, applied studies, digital map products, data distribution, and education. Geological information collected, analyzed and disseminated by the Survey plays a significant role in locating groundwater supplies, arranging waste disposal, understanding the movement of contaminants, and addressing natural hazards such as landslides, radioactivity, erosion, and earthquakes. Public service maps derived from the base geology are used to protect public health and safety.

## Administration & Innovation Division

The Administration & Innovation Division encompasses a range of central services functions which serve the entire Department. Those functions include: financial management; operational services including resource allocations (e.g. information technology, personnel, Fleet, records management, procurement, office space and logistics); and Department-wide planning and reporting (e.g. US Environmental Protection Agency Performance Partnership Agreement, strategic planning, results based accountability and performance measures tracking). In addition, the Department's Business Transformation Initiative is led by this division. This Initiative involves coordination with both internal and external entities as DEC undertakes a system of continuous improvement in our business practices. The Initiative is a growth strategy, allowing the Department to free up and shift capacity to higher value work as efficiencies are found. The result is an increase in our level of service to the Vermont public, making it easier for businesses, municipalities and citizens to get permits and assistance. A related goal of this effort will be to increase the transparency of the department's work – making information more readily available and accessible electronically.

## **Air and Waste Management Appropriation**

### Air Quality and Climate Division

The Air Quality and Climate Division (AQCD) implements state and federal programs to protect and improve air quality, with the goal of protecting public health and the environment. As part of this implementation, the AQCD monitors air quality and air pollution sources, conducts emissions inventories and modeling, proposes regulations to improve existing air quality, ensures compliance with the regulations, and issues permits to control pollution from sources of air contaminants across the state. Additionally, the AQCD has been actively involved at the national level in efforts to document and reduce the impact of out-of-state coal-fired power plants on public health and the environment in Vermont. The Division has worked with neighboring jurisdictions to develop a regional climate action plan, and participates in the Regional Greenhouse Gas Initiative (RGGI), the first market-based regulatory program in the US to reduce greenhouse gas emissions. The Division actively advances strategies to reduce sources of air pollution in Vermont, including efforts to increase zero emission vehicles and the corresponding infrastructure in Vermont, and to decrease particulate matter emissions from outdoor wood boilers and wood stoves. The Division has been at the forefront of greenhouse gas reduction initiatives and is one of a small number of states that have joined with California in adopting Low Emission Vehicles Rules. The AQCD's five Sections (Planning, Monitoring, Compliance, Permitting, and Mobile Sources) coordinate to protect and improve air quality through identification, characterization, and management of risks and impacts to public health and the environment.

## Waste Management and Prevention Division

Through a combination of assistance, planning, regulation, permitting, and inspections, the Waste Management and Prevention Division oversees the management of solid and hazardous wastes to protect the public health and the environment. Hazardous and solid waste programs are managed to meet Vermont environmental law and regulatory standards and U.S. Environmental Protection Agency standards for the Resource Conservation Recovery Act. This program also implements the State's Materials and Solid Waste Management Plan with a focus on helping Vermont households and businesses find convenient, affordable ways to divert organic material (yard and food waste) and recyclables away from landfills and into economically valuable uses. The Division also oversees the investigation and remediation of sites contaminated by hazardous wastes from petroleum, chemical, and industrial release. The Petroleum Clean-up Fund is managed to remediate sites contaminated by petroleum. The Brownfield Program promotes and assists in the clean-up and reuse of contaminated properties. The Underground Storage Tank Program is responsible for overseeing the management of underground storage tanks. In addition, the division maintains a 24-hour Spill Response Team to provide assistance in the control and clean-up of spills.

## **Office of Water Appropriation**

### Facilities Engineering Division

The Facilities Engineering Division assists in the planning, design, construction and first year operation phases for the new construction or upgrade of municipal and private potable water supply systems (including schools) and municipal wastewater systems. The Division also administers the state and federal grant and revolving loan programs that fund this work. It plans and implements the original construction or improvement projects for state-owned dams, and for the Departments of Fish and Wildlife and Forests, Parks and Recreation projects such as fishing access areas, fish culture stations, and state park facilities. In addition, the Division administers the Dam Safety and Hydrology Program, which involves safety inspections of non-power generating dams, and review and permitting for dam alteration or construction projects.

## Watershed Management Division

The Watershed Management Division is responsible for managing surface water quality and quantity for over 800 significant lakes and ponds, 23,000 miles of rivers and streams, and 300,000 acres of wetlands that exist within Vermont. To accomplish this mission, the Division's eight major programs act to protect, maintain, enhance, and restore surface waters in the following ways.

The Division provides regulatory oversight and technical assistance to ensure proper design and construction of storm water treatment and control practices as well as construction-related erosion prevention and sediment control practices, necessary to minimize the adverse impacts of storm water runoff to surface waters throughout Vermont. It also administers the federally delegated permitting programs for municipal and industrial wastewater discharges, and the state permitting programs for residuals management. The Division oversees the wastewater operator certification program.

The Division conducts chemical, physical and biological environmental monitoring and provides guidance to citizen monitoring programs to determine current quality and threats to that quality. It publishes assessments of streams, rivers, lakes and wetlands and prepares watershed plans for each basin through public-private collaborations that work to identify waters that are experiencing difficulties and to develop and implement corrective strategies. It uses these assessments in issuing grants and providing technical assistance for local nonpoint source pollution management activities in lake and river watersheds.

The Division is responsible for identifying and protecting wetlands and the functions and values they provide. Activities to achieve these goals include education and permitting. Similarly, the Division protects lakes and through providing assistance regarding lake management and protection to municipalities, lake associations, and individuals. Finally, the Division protects river systems and floodplains to protect their ecological integrity and recover equilibrium conditions. The Division provides technical and regulatory assistance for projects in river corridor and floodplains to avoid and mitigate flood and erosion hazards, and to increase retention of sediments, nutrients, and riparian habitat. This program also coordinates hydroelectric dam licensing reviews, and assures that stream flows below dams, water withdrawals, and hydropower reservoirs meet minimum standards.

## Groundwater and Drinking Water Protection Division

The Division's drinking water programs are responsible for ensuring that Vermont's 1,400 public water systems provide clean and safe water to their customers. It does this through permitting all aspects of source water development, construction and operation. In addition, public health protection is provided by performing sanitary survey inspections, providing technical assistance, performing compliance assistance, certifying public water systems operators (including operator training), performing implementation management of EPA regulations of the Safe Drinking Water Act, and developing a public water system's managerial, technical and financial capability of operating (otherwise known as the

capacity development program). Some recent successes of the capacity development program were providing leak detection services and asset management training, which helped water systems target needs for improvements and funding. For example, the Drinking Water State Revolving Fund is a low interest loan program that has been used to help finance technical and compliance issues. In support of the Groundwater Public Trust concept, the Division also oversees the state's groundwater protection and well driller's regulatory programs, and regulates large groundwater withdrawals.

The Division administers the wastewater system and potable water supply rules from its five regional offices. These rules regulate soil-based wastewater systems and on-site water supplies with a design capacity of less than 6,500 gallons per day as well as all connections to the municipal water and wastewater systems. The program currently covers all single family residences, commercial development, public buildings, mobile home parks, and campgrounds and issues approximately 3,000 permits annually. This division also licenses the designers of the systems it permits.

The Division issues Underground Injection Control permits that regulate the discharge of non-sanitary wastewater into the ground. The Division also issues permits for land-based sewage treatment and disposal systems greater than 6,499 gallons per day, including septic tanks, leachfields, and treatment plants and spray disposal systems

The Connecticut Valley Flood Control Compact was formerly in its own appropriation. We have folded this small appropriation into our Office of Waters appropriation for the first time in this FY'18 budget. This appropriation facilitates the management of receipts from Connecticut and Massachusetts for tax losses in Vermont towns where the U.S. Corps of Engineers has built flood control projects.

## **Department Key Budget Issues**

The Department of Environmental Conservation (DEC) FY'18 budget reflects a net increase of \$1,799,770 over our FY'17 Budget as Passed. Much of this increase is due to the increase in personnel costs (\$1.5 million), increase in the Environmental Contingency Fund (ECF) (\$1.2 million) and DEC's share of the National Life Lease cost, which was transferred with funding by the Agency of Natural Resources (ANR) Central Office (\$792K), as well as the decrease DEC's share of the Clean Water Fund allocation (-\$2.1 million). The remaining increases were absorbed by reducing budgeted line items based on realized savings, reallocating federal and special funds, utilizing existing cash balances, as well as redirecting programmatic work where possible to leverage new federal dollars.

The demand on the ECF over the next four years will greatly exceed the projected fund balance. The state's Superfund obligations and PFOA response are the major drivers of the future projected deficit. Unfortunately, due to these obligations, the ECF will become insolvent in FY18 and beyond. The Department recommends that the capital eligible costs at state-lead and Superfund sites be incorporated into the state's FY18-FY19 capital bill to help address this shortfall. Given that the ECF lacks financial resources to cover these projected obligations in FY18 and beyond, they will otherwise need to be fully absorbed by the General Fund or some other revenue source. Also, at the Legislature's request, the Department submitted a report on possible revenue sources in January 2017, which further details the ongoing needs of this fund.

This budget, for the first time, also includes the use of our Clean Water & Drinking Water State Revolving Loan Fund Program (SRF) administrative fees. Historically, we have had overlapping federal State Revolving Loan capitalization grant awards available, as well as project specific federal STAG awards and state capital funds which has helped cover these program costs. Due to some increased project loan award activity and federal funding pressures, we no longer have several overlapping federal grant awards; nor do we have any project specific STAG awards or state capital funds expected in FY18 resulting in our need to access these administrative fee funds in FY18 to cover a portion of the program costs.

Another item of note is the sizeable reduction in the Clean Water Fund from \$4,280,000 in FY17 to \$2,090,000 in FY18. The Clean Water Fund was established by the Legislature in FY15. It is funded through a property transfer tax, generating approximately \$5M per year through FY18. The funds support on-the-ground implementation of clean water compliance projects allocated and administered across ANR/DEC, AAFM, VTrans and ACCD. The ANR/DEC FY17 appropriation was based on the utilization of revenues received in part during FY16 plus a full year for FY17. The FY18

budget is now reflecting just one year of projected revenues and related expenses that will be allocated to ANR/DEC for clean water compliance projects. In closing, the Treasurer has released a report to the Legislature this session that makes several recommendations on how to deal with the long term revenue source needs for the fund. As such, we anticipate potential changes in this initiative based on those conclusions in future budget years.

<b>NARRATIVE/COMMENTS/STORY: Describe the program. Who/what does it serve? Are there any data limitations or caveats? Explain trend or recent changes. Speak to new initiatives expected to have future impact.</b>	
<p>Vermont has 440 dams impounding greater than 500,000 cubic feet of water and subject to periodic inspections by the Dam Safety Program.</p> <p>Annually the program inspects all the high hazard dams and generally meets the target number of inspections on significant hazard dams. Annual number of inspections on low hazard dams are not met due to staff resource restrictions. Currently, the program is working towards gaining resources needed to inspect a higher percentage of dams per year by:</p> <p>(1) reducing the staff resources needed to manage flood control dams by transferring ownership of three dams to the Army Corps of Engineers, and (2) seeking additional staff position to increase from 90 to 130 the number of dams inspected each year.</p> <p>Inspections determine the condition of each dam with poor being the lowest rating. More than a quarter of the significant and low hazard dams are in poor condition.</p> <p>About half of the low hazard dams have not been inspected in the last decade and in some cases may have become higher hazard dams due to greater dangers in the event of a dam failure, such as recent development down-river of the dam.</p>

**NARRATIVE/COMMENTS/STORY: Describe the program. Who/what does it serve? Are there any data limitations or caveats? Explain trend or recent changes. Speak to new initiatives expected to have future impact.**

Vermont's electronic waste law bans the disposal of certain electronic devices (computers, monitors, printers, computer peripherals and televisions) and provides for free and convenient collection of these materials from covered entities (consumers, charities, school districts and small businesses). The collection of these materials is funded through a product stewardship program funded by electronics manufacturers.

The State Standard Plan (SSP) is implemented by the State with fees being collected from registered manufacturers. A manufacturer, or group of manufacturers, may elect to provide for coverage under an opt-out plan (OOP). An approved OOP must be compliant with Vermont e-law requirements and is managed and funded independently and directly by the participating manufacturer(s).

This past year was the fourth year of the E-Waste Program in Vermont and was the second program year that an OOP was utilized by manufacturers. The lbs/person reported here reflects the amounts collected by both the SSP and the OOP. However, the cost per pound reported reflects only the SSP, as the State does not manage nor has any influence on the expenditures of the OOP. The SSP alone managed 5.9 lbs/person in FY15.

During the first years of collection under the E-Waste Program a higher percentage of the materials collected were older, heavy electronics. As the program progresses, it is likely that the average weight of individual electronic items collected will decrease as fewer of these old electronics are handled. This will affect the lbs/person collected, even though the actual number of items being diverted away from the landfill from this program may remain steady.

**FY 2018 GOVERNOR'S BUDGET RECOMMENDATIONS - PROGRAM PERFORMANCE MEASURES**

<b>AGENCY NAME:</b>	Agency of Natural Resources
<b>DEPARTMENT NAME:</b>	Department of Environmental Conservation
<b>DIVISION NAME:</b>	Waste Management and Prevention Division
<b>NARRATIVE/COMMENTS/STORY: Describe the program. Who/what does it serve? Are there any data limitations or caveats? Explain trend or recent changes. Speak to new initiatives expected to have future impact.</b>	
<p>The goal of the underground storage tank (UST) program is to minimize the exposure of Vermonters to hazardous materials. This is accomplished by ensuring the proper handling, containment and management of hazardous materials stored in UST's in order to prevent releases of these materials and the resultant site contamination and clean-up.</p> <p>In 2005, the UST program streamlined the inspection process and dramatically increased the number of annual inspections able to be completed. This increased site presence resulted in a nearly 30% increase in the number of facilities that are found to be in significant operation compliance with the relevant management practices.</p> <p>These continued efforts have directly decreased the number of emergency spill responses and the number of UST facilities which have to be listed as a contaminated site and complete clean-up efforts each year. However, new a new statutory requirement (10 VSA §1927(e)) directs regulated facilities to remove older tanks not up to current standards is expected to result in an increased number of releases over the next several years.</p>
