

<http://vtrans.vermont.gov/vtransparency>

VTrans has been improving our information portal and the resources that are available to our customers to get them the answers that they need. Here is a list of what resources you can currently find on the portal:

<b>Projects Map</b>	What projects are underway or planned? View a map of current and planned construction projects, including project descriptions and contact information.
<b>Road Conditions (511)</b>	What are the road conditions like? View a map of current closures, active projects, and road conditions for Vermont, New Hampshire, and Maine.
<b>Plow Finder</b>	Want to know when a plow is coming your way? Track where our plows are right now using this interactive map. You can also look at current weather cams and get forecasts along your route.
<b>Weather Cams</b>	The RWIS stations include cameras to check traffic and weather conditions. This page will help you find your favorite.
<b>Maintenance Districts</b>	How do I contact my local maintenance district? Use this map to find the maintenance district that oversees the transportation network in your region.
<b>Crash Query Tool</b>	What are the patterns in crash data? Use the tool to explore crash locations and trends, or download data for further analysis.
<b>Find a Project</b>	What projects are underway or planned? Use this tool to find and view project factsheets.
<b>Daily Traffic</b>	What is average traffic on roads in my area? View a map of prior year Annual Average Daily Traffic (AADT) for the Vermont highway system.
<b>Highway Closures</b>	Are you closing a road on my commute? View a map of current and planned highway closures and detour information.
<b>Bridge Inspections</b>	What is the condition of an individual bridge? Select a town to view and download bridge inspection reports and photos.

<b>Bridge Inspections</b>	What is the condition of an individual bridge? View a map of the most recent bridge inspection reports and view recent inspection photos.
<b>Pavement Condition</b>	How does your road compare with the rest of the state? View this map to see how the road system is performing overall or zoom in to any road segment to see the conditions over time.
<b>Pavement Performance</b>	How is VTrans managing our pavement network? View a report that compares two measures that are used to ensure a balance between good condition roads for the majority of travelers and a reasonable minimum condition for less traveled roads.
<b>Maintenance Work</b>	What are maintenance crews working on? View a map of the most recent maintenance activities, including cleaning culverts, fixing guardrail, filling potholes, clearing brush, and a host of other activities.
<b>Rail Asset Inventory</b>	Includes the best available data regarding rail lines, crossings, bridges, culverts, and switches. It is continually updated as more information becomes available.
<b>Rail Bridge Inspections</b>	What is the condition of an individual rail bridge? View a map of the most recent rail bridge inspection reports and view recent inspection photos.
<b>Rail Clearance</b>	What is the clearance from the center line of the railroad? View a map that depicts all known obstructions within 24' horizontally and vertically from the railroad center line.
<b>Rail X-ing Inspections</b>	What is the condition of an individual rail crossing? View a map of the most recent rail crossing inspection reports and view recent inspection photos.
<b>Open Data Portal</b>	Want to do your own analysis of our data? Use this tool to connect to or download raw data for transportation-related and other State of Vermont data sets.
