

In response to the questions below:

- \$80,000 is the amount our vendor, PCC Technologies, Inc., quoted us last year when we asked to add a new filing entity.
- This is a modification to our existing system. For a variety of reasons we would only add this to our existing system and would not prefer a separate system.
- The system, unfortunately, is rather intricate under the hood and requires a lot of intertwined parts to be touched to integrate a new filing entity.
- A \$100 fee is based on an estimated 200 data brokers being registered in the state, generating \$20,000 per year over four years to pay for the initial investment.
- We really have no way of knowing how many will register. If it is fewer than that, we may need to come back for a fee adjustment.
- If we do not receive a fee for the registration, we require an appropriation to do the work.
