(B) the accuracy of electric metering and submetering technology for charging EVs;

(C) strategies to encourage EV usage at a pace necessary to achieve the goals of the State's Comprehensive Energy Plan and its greenhouse gas reduction goals, without shifting costs to electric ratepayers who do not own or operate EVs; and

(D) any other issues the Commission considers relevant to ensuring a fair, cost-effective, and accessible EV charging infrastructure that will be sufficient to meet increased deployment of EVs.

(e) During the course of the evaluation and in its report, the Commission shall identify recommendations on the issues identified in subsection (c) of this section that may require enabling legislation.
