Department Narrative - Public Health in Vermont

Vision - Healthy Vermonters living in healthy communities.

Mission - To protect and promote optimal health for all Vermonters.

The Department of Health is proud to continue a long tradition of public health service in Vermont. We are the state's lead agency for public health policy and advocacy.

Public health is the system that works to protect and promote the health of citizens. It is the science and art of preventing disease, prolonging healthy life, and promoting physical and mental health. Not only do people with better health habits generally live longer; those years are more likely to be free of disease and disability.

The Health Department's many programs and initiatives help Vermonters live fuller, healthier lives from birth through old age. We focus on prevention, which is perhaps the best investment that can be made in health.

We educate and inform Vermonters about eating a healthy diet, regular exercise, and not smoking.

We promote and improve access to immunizations, mammograms, HIV/AIDS testing and care, and prenatal care.

We license physicians and hospitals, inspect food and lodging establishments, and enforce health regulations.

We prepare for and respond to public health emergencies and threats, and provide the public with information to help them stay safe and healthy.

Essential public health and disease prevention services are available across Vermont through our 12 district offices. The district offices work in partnership with local health care providers, voluntary agencies, schools, businesses, and community organizations to improve health and extend statewide initiatives in local communities throughout the state.

As part of the Agency of Human Services, the department works in concert with the Departments of Mental Health, Children and Families, Disabilities, Aging and Independent Living, Corrections, and the Department of Vermont Health Access to improve the health and well-being of Vermonters.

The Laboratory is certified under the Clinical Laboratory Improvement Act (CLIA) for clinical testing by the Centers for Medicaid and Medicare Services and accredited by the National Environmental Laboratory Accreditation Program (NELAP) for drinking water analyses. When new health risks emerge, or well-known problems reoccur, public health laboratories analyze the threats and provide the information with which health authorities, first responders, and other officials mount an effective response to protect citizens.

While private medical laboratories perform tests to diagnose problems afflicting individual patients, public health laboratories are engaged to safeguard entire communities. Across the nation, public health laboratories:

- monitor communities for pathogens that spread in food or through contact with people or animals.
- screen 97 percent of the babies born in the US for potentially life-threatening metabolic and genetic disorders.
- perform almost all testing to detect and monitor newly emerging infectious diseases like West Nile virus, SARS, and Avian Influenza.
- test drinking and some recreational water for bacteria, parasites, pesticides, and other harmful substances.
