Subject: include climate action in the budget bill

I was disappointed to hear that Phil Scott's budget bill didn't include any allocation for a study of carbon pricing proposals. We are behind on our greenhouse gas reduction targets, and carbon pricing could have a positive impact on Vermont's economy and job creation. I urge you to include \$100,000 for studying carbon pricing proposals. We do not have much time left to move forward on addressing the climate crisis.
