Subject: Carbon Pricing

Ms. Rebecca Buck,

I was unable to attend any of the public hearings this week, so I am writing to *strongly* urge the Appropriations Committee to include a full and fair carbon pricing study in the state budget. We need to fight climate change. The governor's own climate commission recommended support for an independent, non-partisan study of carbon pricing and, most unfortunately, the governor rejected that recommendation.

I request that the legislature step up and take the leadership role in addressing this vital issue by moving ahead on the study.

Sincerely,
Phyllis Harmon
Strafford, VT
