

# Child Care and Prekindergarten Capacity Baseline Report

Sec. E.318.3 Act 11 of 2018 Special Session  
November 15, 2018

Prepared by  
Vermont Legislative Joint Fiscal Office  
Stephanie Barrett  
Chloe Wexler

## Executive Summary

This report compiles data on a statewide and a county basis for each of the areas of regulated child care including center based care and registered home as requested in the statutory charge for this report, Sec E.318.3 of Act 11 of the 2018 Special Session. Our analysis includes: age 0–5 demographics; child care slot capacity, including prequalified prekindergarten providers; and impacts to capacity from provider closures. Data across a span of 42 months, from Dec. 2015 through Jun. 2018 was analyzed. Statewide and county information are provided in detail in the body of this report. The capacity data was based on the desired capacity reported by providers, which began being collected in 2015. The primary report findings and statewide summaries are provided here. County specific is provided in the report and can differ significantly from the statewide picture.

The comparison of population to slot capacity could easily be made, however this may overstate the true size of the child care supply shortage. Act 11 requires a survey of parents of young children. The results of this survey should provide current demand data by age, the need for full-time versus part-time slots, as well as affordability constraints. Once the survey is complete a more accurate assessment of the child care shortage in Vermont can be made.

### Registered Homes (Home Based Care)

The most striking result of this analysis of child care capacity is the significant reduction in home providers and child care slots. These declines are universal across the counties with variation only in the size of the decline. This is mostly due to older providers leaving the market and fewer new entrants. The reason for fewer replacement providers is an area for more study.

Registered Home Providers	# Providers	Infant Slots	Toddler Slots	PreK Slots	School Age Slots	Total Slots
Jun. 2018 Capacity	564	1,052	1,072	1,257	2,046	5,427
Chg from Dec. 2015	(204)	(368)	(336)	(377)	(773)	(1,854)
% Change	-26.6%	-25.9%	-23.9%	-23.1%	-27.4%	-25.5%

### Licensed Providers (Center and School Based Care)

Licensed care has been less volatile with net closures on the private side and with public programs partially offsetting private closures. There has not been a net loss of infant and toddler slots in this segment. There has been a small decrease of pre-K slots despite a nearly 8% increase in public prequalified pre-K programs and a 53% increase in prequalified private centers. This story differs greatly county to county, with some seeing slot losses and some significant increases. Chart1 and Chart 1a on page 19 and the county-specific sections provide more detail.

Center & School Based Providers	# Providers	Infant Slots	Toddler Slots	PreK Slots	School Age Slots	Total Slots
Jun. 2018 Capacity	532	2,125	2,325	10,504	1,913	16,867
Chg from Dec. 2015	(10)	114	78	72	(103)	161
% Change	-1.8%	5.7%	3.5%	0.7%	-5.1%	1.0%
Private Centers subset	# Providers	Infant Slots	Toddler Slots	PreK Slots	School Age Slots	Total Slots
Jun. 2018 Capacity	394	2,117	2,289	7,551	1,796	13,753
Chg from Dec. 2015	(20)	109	59	(142)	(134)	(108)
% Change	-4.8%	5.4%	2.6%	-1.8%	-6.9%	-0.8%

### Total Capacity of Regulated Care (Home and Centers Combined)

The combined total of both types of regulated child care results in reductions in the 7% range for infant and toddler slots, a small reduction in reduction pre-K slots and over 18% drop in the school aged slots, across the 42-month period.

All Providers	# Providers	Infant Slots	Toddler Slots	PreK Slots	School Age Slots	Total Slots
Jun. 2018 Capacity	1,096	3,177	3,397	11,761	3,959	22,294
Chg from Dec. 2015	(214)	(254)	(258)	(305)	(876)	(1,693)
% Change	-16.3%	-7.4%	-7.1%	-2.5%	-18.1%	-7.1%

### Vermont 0–5 Age Population

The population for this group of the youngest Vermonters saw a 2.3% decline from 2011 to 2016. The most recent data available is for 2016, the information statewide by each age cohort and for this group is summarized as follows:

2016 POPULATION							
	Infant		Toddler	Pre-K		Pre-K / K	TOTAL
AGE	0	1	2	3	4	5	0 - 5
VERMONT	6,051	6,111	6,187	6,039	6,253	6,177	36,818

Based on snapshots of Medicaid and SNAP program enrollments, the 0–5 age group in families at or below 100% of the Federal Poverty Limit (FPL) is in the approximate range of 20%<sup>1</sup>. This analysis indicates over 60% of the 0–5 age population are in families with income over 317% of FPL. The remaining 20% of families fall between 100% and 317% with the majority, 15%-16% in the 100% -237% FPL range.

<sup>1</sup> The SNAP program is the source for the FPL of 100% and under approximation. There are disallowances and deductions for income for the eligibility calculation, these differ slightly from Medicaid. Alternate sources may result in slightly less in the “100% and under” column and slightly more in the “100% to 237%” category.

## Statutory Charge

The requirement for this report is found in Sec E.318.3 of Act 11 of the 2018 Special Session.

*Sec. E.318.3 CHILD CARE AND PREKINDERGARTEN CAPACITY BASELINE  
REPORT*

*(a) In order to better understand the relationship between the pre-Kindergarten system and the impact on child care and early education facilities not operated by public school districts, the Joint Fiscal Office shall research and assemble the following for each of the last five years:*

*(1) The demographic information of Vermont children zero to five years of age, by town, county, or region and to the extent possible by family household income.*

*(2) Array by town, county, or region the known capacity or “slots” at licensed child care facilities, registered child care providers, and pre-Kindergarten programs operated by school districts for each age group between zero and five years of age.*

*(3) To the extent possible, an analysis of the age composition of enrolled children at licensed providers who have ceased doing business in each of the last five years.*

*(b) The Joint Fiscal Office shall have the assistance and cooperation of the Department for Children and Families as well the Agency of Education and shall report to the Senate and House Committees on Appropriations and on Education not later than November 15, 2018.*

## Overview

Reliable data for capacity provided (as opposed to licensed limits) was available from Dec. 2015 forward and is the primary basis of the findings presented in this report. This report compiles data on a statewide and a county basis for each of the areas of regulated child care requested in the statutory charge for this report.

Age 0–5 demographics

Child care slot capacity including prequalified pre-K providers, and

Impacts to capacity from provider closures

## Acknowledgements

The authors would like to acknowledge the assistance of the Department for Children and Families (DCF) Child Development Division (CDD) in providing the base data and explanations of the nuances of child care regulation in Vermont and the Agency of Education (AOE) for explanations regarding pre-K prequalification and related funding. We are grateful to the Department of Health Access (DVAH) and DCF Economic Services Division (ESD) for program data that allowed us to provide a frame of family income distribution for the Vermont 0–5 year old population. We have relied on the published population data by age and county from the Vermont Department of Health (VDH). We appreciate review and especially the assistance in mapping from our JFO colleagues.

## Data

The Child Development Division (CDD) maintains data on licensed providers (centers and schools) and registered homes and in late 2015 began including information on the actual desired slot capacity reported from each provider monthly and compiled periodically. While the license capacity determines the maximum capacity of any given provider at any given time, the actual slots offered by the provider may be less than the licensed level. This ‘desired’ capacity provides the best picture of the available supply of slots in the system overall. CDD staff provided four data sets including Dec.2015, Dec.2016, Dec. 2017 and Jun. 2018. This data is the source of the capacity and closure analysis statewide and by county. Although the four data sets span a 2.5 year period, and provides data in four different years, this is less than the full five year horizon requested in the statutory charge.

Adjustments were made to the data for Jun.2018 in one regard, the specification of whether a program was a prequalified private or public pre-K program appeared to have not been updated for all providers at the time of that data run. The adjustment made was to substitute the prequalified pre-K status of each provider as of Sep. 2018<sup>2</sup>.

The ‘non-recurring’ programs are included in the data analyzed. These are the licensed centers at ski resorts that provide slot capacity but some/many or all are filled by non-recurring children of guests but these programs can also provide care in some cases for children of employees.

---

<sup>2</sup> The Sep. 2018 data does indicate some additional program closures and openings since Jun. but Sep. 2018 desired capacity was not available as of the date of this report, all closure and capacity findings are as of Jun. 2018.

Not included in the data we analyzed are programs that are after school only for kindergarten and older school-age children. No information about informal child care or legal unregulated care is included in this report.

The Vermont Department of Health compiles annual census estimates by age both statewide and by county. This is the source of data for the population of 0 to 5 year old Vermonters from 2011 to 2016 which is the most recent data available as of the date of this report. This report does not make any population estimates for this age group in the future or make any conclusions about the child care and pre-K slot capacity needed based on this population data.

An estimate of the family income for the Vermont 0–5 age population relies on analysis and data provided by DVHA regarding the Medicaid enrollment for kids of this age. Because the take up rate in is so high for Vermont kids who are eligible for Medicaid (i.e. a very low eligible but unenrolled rate) this program provides a strong foundation for placing family income for the 0–5 population into a reliable frame. This family income picture is further refined by analysis and data provided by the DCF- ESD on SNAP (formerly food stamps).

## Child Care Terms

Listed below are the specific uses and/or definitions of several terms related to child care and pre-K services used in this report.

### **Kids or Children**

Kids are real human beings below a certain age. In this report specifically between the ages of 0 (birth to 12 mos.) through 5 years old (up to 60 mos.). The demographic information provided is based on the estimated actual number of kids within this age group in Vermont as provided by VDH by age and county for 2011 through 2016<sup>3</sup>.

### **Slots**

Slots are not kids. Licensed slots are the legal limit of the total number of kids of a specific age that a provider can serve at any given time. While many kids require a full-time (i.e. 8hr/day-5day/week) slot, many families cobble together various types of child care coverage and require less than a full-time slot. The same slot can be occupied at different times by different kids. Regulated providers are licensed for a specific number of slots. Providers may not exceed the licensed limit. The actual number of slots offered by the provider may be below the licensed level known as the desired (per the providers) slots. Slots are designated by type as follows:

Infant Slots - kids birth thru 24 mos. or 0 and 1 year-olds

Toddler Slots - kids 24 to 36 mos. or 2 year-olds

Pre-K Slots - kids 36 to 60 mos. or 3, 4, and 5 year-olds who are not yet in kindergarten

School Age Slots – kids in kindergarten and higher grades, generally up to 12 years old

---

<sup>3</sup> VDH population data reflect initial Census estimates for each year. For example, the 2013 population estimate for VT reflects vintage 2013 estimates. VDH does not update each year's population estimates as the Census Bureau updates its prior estimates.

## **Prequalified Prekindergarten Programs**

This is a qualification a provider can seek from the Agency of Education. This allows the designated provider to receive payment from the Education Fund for pre-K education programming provided to pre-K age kids. This payment which for 2018/2019 school year is \$3,267 and covers 35 weeks at 10 hours per week; it is made via the school district to any prequalified provider, private center, home provider or public school prequalified programs.

The remaining combined hours and weeks of care and/or pre-K education are paid for by the parent, or some combination of the parent, local district and/or the state for families that qualify for the state's child care subsidy program. In order for this pre-K education payment to flow to a provider and for a child to be counted in the system; parents must enroll the 3-5 year-olds with their local education agency (district or SU) even if the pre-K education programming is provided by a private provider. A more detailed description of the Vermont pre-K system is available from the Agency of Education links to these documents are in the Appendix.

This report provides statewide and county information for the desired capacity reported by child care providers across all type/age slot categories; this detail is provided in Chart 4 in the statewide capacity section of this report. The pre-K slots reported are totaled for all prequalified pre-K programs, both public and private. However, this does not mean that every prequalified pre-K slot receives a pre-K education payment. The number of desired pre-K slots can be more than the actual enrollment in these programs. The actual pre-K education payments will be a subset of the total pre-K slots available in these programs reflecting only those enrolled and verified through the local education agency.

## **Regulated Child Care**

The Child Development Division (CDD) in DCF licenses and monitors registered child care homes and licensed programs to make sure they provide safe and healthy environments for children and contribute to their development.

### **Registered Homes (Home Based Care)**

Registered homes provide child care located in a provider's home. The typical total number of children served is 10, with no more than two under 2 years old (i.e. 2 infants), four or less between the ages of 2 and 5, for a total of six at age 5 and under. The remaining slots can serve school age children, which is typically four slots for this provider type, if all six lower age slots are filled by kids aged 5 and under.

### **Licensed Programs (Center and School Based Care)**

A licensed program is an early childhood and/or after school program that provides care and education services in accordance with 33 V.S.A. § 306(b) and 33 V.S.A. § 3502(d). These programs provide care outside the providers own home; or in home but for more than the capacity allowed

for registered homes. The available staff and space determines the specific licensed capacity of a given program.

## **STARS**

The STep Ahead Recognition System is a quality rating and improvement program that began in 2003. The purpose of this quality recognition system is to promote, reward and recognize child care and education programs (private and public) that achieve standards above the licensing requirements of the DCF-CDD. Levels are based on certificates of achievement across several dimensions including: compliance history; staff qualifications/professional development, families and community, program practices, and program administration. The capacity information in this report includes the STARS level of each provider at the time of the data sets analyzed.

## **Non-Recurring programs**

These are the licensed centers at ski resorts or clubs that provide slot capacity but some/many or all are filled by non-recurring children of guests. Some of these programs may provide recurring care for children of employees. The slot capacity of these programs is included in the analysis presented in this report but is also summarized in total and by county in the statewide capacity section.

## **Informal Child Care**

Informal care is not regulated but is legal when someone is providing care to not more than 2 families other than their own. It is illegal to provide child care to more than two other families, to operate a program that does not meet the minimum regulated safety requirements, to operate an enterprise that appears to be a regulated facility but is not licensed by DCF-CDD, or does not meet specific license exempt guidelines.

## **Context**

This report is one of several child care and pre-K related studies required by Act 11 of the 2018 Special Session. The other required studies are:

- Sec. C.105.1 (a) (9), a survey of families in Vermont with children under six years of age about their child care arrangements and preferences and what factors may constrain parental choices with results to be reported in January 2019.
- Sec. E. 500.7, Prekindergarten and independent study jointly commissioned by AoE and AHS to recommend how to more effectively and efficiently provide prekindergarten education. A status report is due in March 2019 with a final report due July 2019.

This report is also part of continuum of activities related to child care, early education and prekindergarten that includes research, advocacy as well as policy and funding discussions. A list of the most recent activities and links to related documents include:

## Recommendations for Further Study

The population, closure, and capacity findings are reported in the subsequent sections of this report, but the most dramatic finding is the significant decline of registered home providers. Since 2015, home providers are down 26% with home based slots down 25%. In Grand Isle the loss is up to 50%. In 2017, DCF-CDD published a [provider closure report](#) from 2012 through 2017 with similar findings. Analysis of why this is happening is one area for continued research given the scale of change in this relatively short period of time. Anecdotal discussions during this capacity research indicate several potential issues that could be contributing factors:

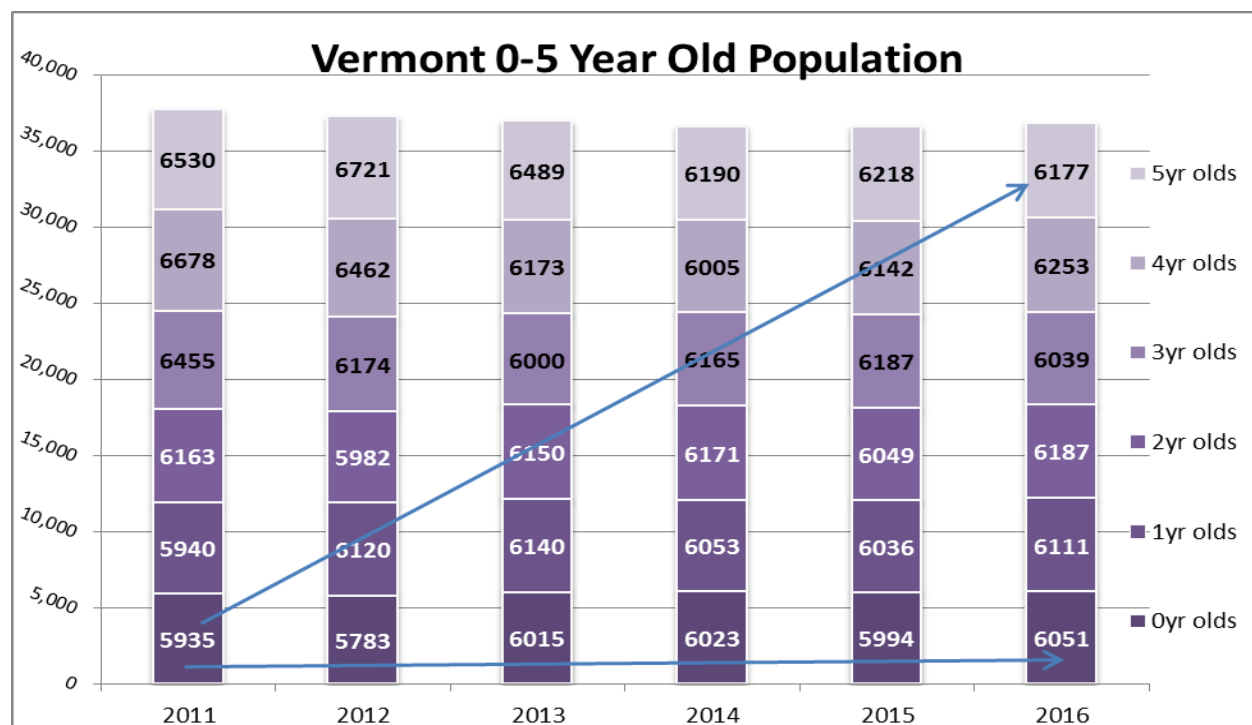

- older home-based providers retiring, and younger replacement providers not entering the market
- perceptions of more onerous regulations and requirements
- negative perceptions expressed and/or active discouragement by exiting and current providers regarding the rewards and satisfaction of this career
- perceptions that advocacy initiatives, and/or training and support programs are more oriented to center-based care providers
- economics of this business model versus other opportunities that potential entrants have given the current low unemployment climate in Vermont
- family formation and housing - do later birth ages, smaller families, and the ability to own a home versus rent limit new people from becoming home providers?

## Statewide Data

### Population - Vermonters 0 to 5 Years Old

The Vermont Department of Health<sup>4</sup> provides annual population estimates by age and county. The most recent data is from 2016 with data for 2017 expected to be available in December, 2018. Following are several charts presenting population information for 0–5 year-olds between 2011 and 2016.

The first chart is a bar graph showing 0–5 population by year for each year. The top line of these bars provides the overall trend for this group. It shows a modest decline in the early part of the period, and then remains fairly flat in the second half for the 0–5 population collectively. Diagonally, this chart shows the youngest age growing to the oldest age across this period, including net in/out migration year to year. Reading the chart horizontally gives the picture of a specific age in each year and, while this is generally consistent, any given age cohort can and does fluctuate from year to year. At the county level, these fluctuations can be significant from one year to the next. County specific charts are included in the county sections of this report.

The next chart provides the detailed data for 2016 by age and by county. It shows the total 2016 population of 0–5 years (the same information as the last bar of the first graph) as well as each county's share of the 0–5 total population. This chart also shows Vermont total population for all ages and each county's share of total state population. Most counties' 0–5 share is fairly consistent with its share of total state population. Five counties have the same share for both 0–5

<sup>4</sup> VDH population data reflect initial Census estimates for each year. For example, the 2013 population estimate for VT reflects vintage 2013 estimates. VDH does not update each year's population estimates as the Census Bureau updates its prior estimates.

and all age population. Four counties are very close with two showing just slightly higher 0–5 shares and two showing slightly lower shares for the 0–5 group. Addison; Rutland; Windham; and Windsor are where the 0–5 shares are more markedly lower. Then there is Franklin county, where the share of 0–5 years is significantly higher than its share of the total population.

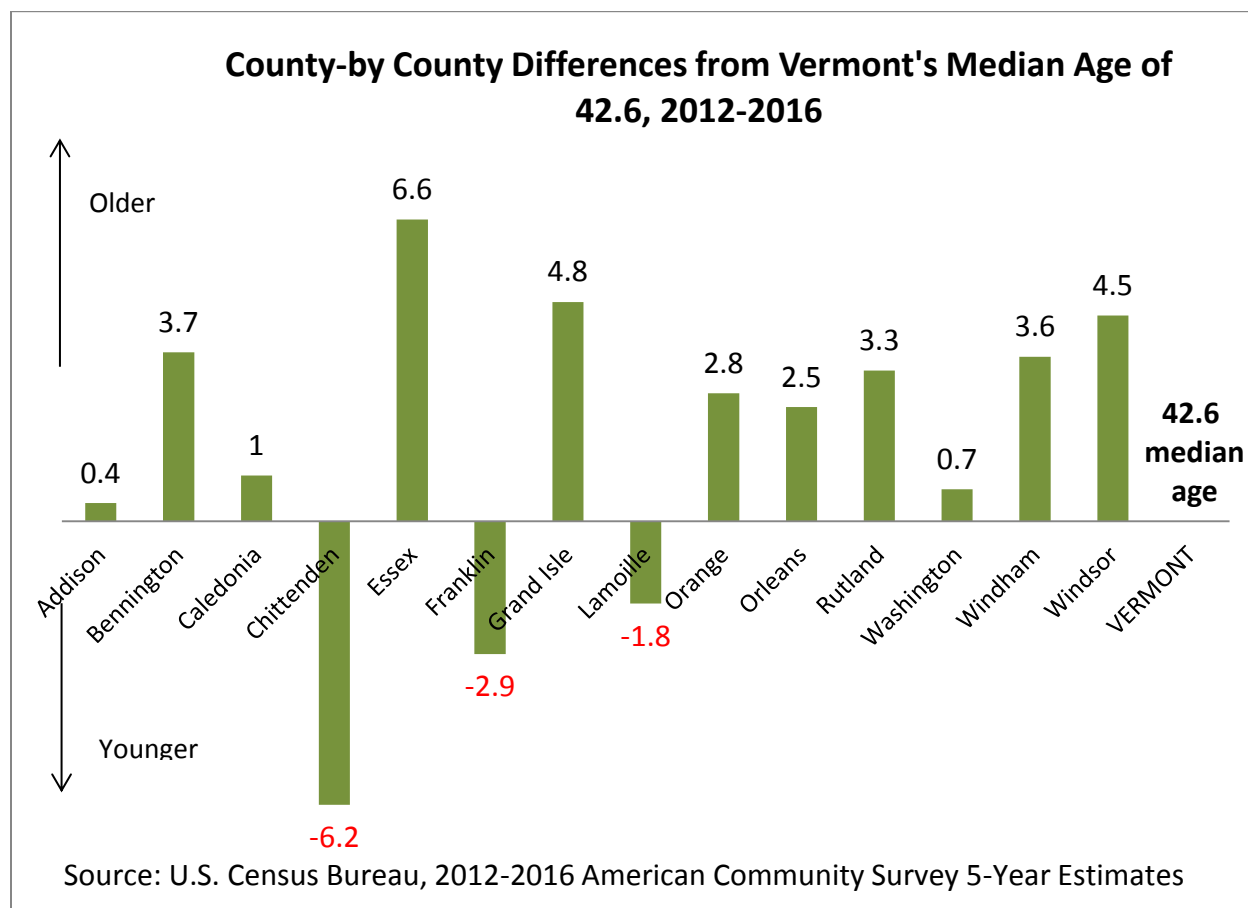

2016 POPULATION											
	Infant		Toddler	Pre-K		Pre-K / K	TOTAL	%	TOTAL	%	Diff
AGE	0	1	2	3	4	5	0 - 5	0 - 5	VT	VT	0-5% - VT%
<b>VERMONT</b>	<b>6,051</b>	<b>6,111</b>	<b>6,187</b>	<b>6,039</b>	<b>6,253</b>	<b>6,177</b>	<b>36,818</b>	<b>100%</b>	<b>624,594</b>	<b>100%</b>	<b>n/a</b>
Addison	306	330	331	338	321	334	1,960	5.3%	36,959	5.9%	-0.6%
Bennington	343	334	352	356	368	321	2,074	5.6%	36,191	5.8%	-0.2%
Caledonia	288	274	314	277	302	320	1,775	4.8%	30,333	4.9%	n/a
Chittenden	1,629	1,639	1,591	1,569	1,540	1,533	9,501	25.8%	161,531	25.9%	-0.1%
Essex	52	68	64	55	61	63	363	1.0%	6,176	1.0%	n/a
Franklin	619	599	596	622	624	586	3,646	9.9%	48,915	7.8%	→ 2.1%
Grand Isle	67	62	61	63	80	61	394	1.1%	6,919	1.1%	n/a
Lamoille	255	278	256	269	269	277	1,604	4.4%	25,333	4.1%	0.3%
Orange	265	265	294	264	299	293	1,680	4.6%	28,919	4.6%	n/a
Orleans	270	257	272	260	315	255	1,629	4.4%	26,863	4.3%	0.1%
Rutland	540	539	589	526	576	536	3,306	9.0%	59,310	9.5%	-0.5%
Washington	561	577	577	515	592	640	3,462	9.4%	58,504	9.4%	n/a
Windham	387	382	409	427	392	416	2,413	6.6%	43,145	6.9%	-0.4%
Windsor	469	507	481	498	514	542	3,011	8.2%	55,496	8.9%	-0.7%

The final two population charts show the change in Vermont population between 2011 and 2016 and median age by county. In Vermont the overall population declined 0.3% with the 0–5 group dropping faster at -2.3%. Only four of the counties saw growth in overall population during this period – Addison, Chittenden, Franklin and Lamoille. All the other counties declined in total population with modest drops in Orange and Grand Isle and larger declines in Rutland, Caledonia, and Windham.

The 0–5 population rates of change are more dramatic, ranging from +12.7% to -12.9%. Again, only four counties show 0–5 growth in this five year period, Chittenden, Franklin, and most dramatically the smallest counties Essex and Grand Isle show the highest rate of growth in the 0–5 population. All the other counties show declines, with the largest 0–5 population rates of decline in Caledonia and Lamoille.

Vermont Age 0-5 Population		
Change 2011-2016	ALL VTs	0-5 yr olds
<b>VERMONT</b>	<b>-0.3%</b>	<b>-2.3%</b>
Addison	0.6%	-4.0%
Bennington	-2.1%	-6.4%
Caledonia	-2.7%	-12.9%
Chittenden	2.6%	2.6%
Essex	-1.8%	12.7%
Franklin	1.7%	2.5%
Grand Isle	-0.2%	4.8%
Lamoille	2.6%	-8.4%
Orange	-0.3%	-1.6%
Orleans	-1.1%	-2.9%
Rutland	-3.2%	-2.0%
Washington	-1.9%	-6.1%
Windham	-2.5%	-3.3%
Windsor	-2.1%	-5.9%

Median age by county also varies significantly. The youngest counties are also counties that saw growth since 2011. Chittenden is the youngest county but is also the largest county with nearly 26% of the total state population. Essex is the oldest and the smallest at 1% of the state total.

## Family Income

The U.S. Census Bureau's American Community Survey (ACS)<sup>5</sup> is one source for understanding income distribution. However, the Vermont ACS sample size in any one year makes this source less than ideal for providing a reliable frame of the annual distribution of family income for the 0-5 year old population. There are several social programs that serve families with children 0-5 years old. Medicaid and SNAP (formerly food stamps) enrollment for 0-5 year olds, statewide and by county, were provided by DVHA and DCF for specific periods of during 2017<sup>6</sup>. These could then be compared to the most recent 2016 population data published by VDH.

The following chart provides an approximation of how the total 0–5 year old population is distributed across four family income categories based on the SNAP and Medicaid enrollment

<sup>5</sup> The one year 2016 ACS for Vermont indicates a poverty rate for children under five years old of 15.5%. This is lower than the approximate 20% for all 0-5 year olds indicated above by SNAP program enrollment in 2017.

<sup>6</sup> Please note 2017 was chosen specifically to avoid any impacts from the suspended redetermination issues that ran out through 2016.

indications. These results must be considered a reasonable approximate and more indicative of a range for each income group. They should not be considered a highly precise percentage for each income range.

### Approximate Family Income Distribution<sup>7</sup> – VT 0–5 Population

Family Size	VDH 0-5 Population	0% to 100% FPL	100% to 237% FPL	237% to 317% FPL	Over 317% FPL
1 person - 2017 annual income		\$0 - \$12.1k	\$12.1k - \$28.6k	\$28.6k - \$38.2k	over \$38.2k
2 person - 2017 annual income		\$0 - \$16.2k	\$16.2k - \$38.5k	\$38.5k - \$51.5k	over \$51.5k
3 person - 2017 annual income		\$0 - \$20.4k	\$20.4k - \$65.7k	\$48.4k - \$64.7k	over \$64.7k
4 person - 2017 annual income		\$0 - \$24.6k	\$24.6k - \$58.3k	\$58.3k - \$78.0k	over \$78.0k
<b>VERMONT</b>	<b>36,818</b>	<b>20.6%</b>	<b>15.8%</b>	<b>2.2% to 3.3%</b>	<b>60.4% to 61.5%</b>
Addison	1,960	13.4%	21.9%	2.3% to 3.4%	61.3% to 62.4%
Bennington	2,074	29.7%	15.7%	1.9% to 2.9%	51.7% to 52.7%
Caledonia	1,775	22.1%	21.5%	2.9% to 4.4%	52.1% to 53.5%
Chittenden	9,501	16.3%	12.4%	1.9% to 2.9%	68.5% to 69.4%
Essex*	363	28.4%	21.2%	2.8% to 4.1%	46.3% to 47.7%
Franklin*	3,646	21.1%	10.6%	1.9% to 2.8%	65.5% to 66.4%
Grand Isle*	394	24.9%	10.6%	1.9% to 2.8%	61.7% to 62.7%
Lamoille	1,604	17.1%	20.5%	2.2% to 3.3%	59.1% to 60.2%
Orange	1,680	18.4%	19.6%	2.3% to 3.5%	58.5% to 59.7%
Orleans*	1,629	29.7%	21.2%	2.8% to 4.1%	45.0% to 46.4%
Rutland	3,306	27.1%	17.5%	2.6% to 3.9%	51.5% to 52.8%
Washington	3,462	18.7%	15.3%	2.1% to 3.1%	63.0% to 64.0%
Windham	2,413	24.0%	17.4%	3.0% to 4.5%	54.1% to 55.7%
Windsor	3,011	20.0%	15.1%	1.8% to 2.7%	62.2% to 63.1%

It is highly likely that families with newborns and very young children may make choices that reduce family income for a period of time. As workers age and gain experience, skills, and more specialized knowledge, their earning potential increases. Given these events, it is very probable that an analysis breaking specific ages down to more granular levels would show families with the lowest aged kids in this group are more highly represented in the lower income categories. For example, live births covered by Medicaid in SFY 2017 were 55% of the annual approximate 6,000 0-age population, indicating 55% of families with newborns statewide are below 317% FPL and 45% of families with newborns over 317% FPL. That 0-age specific indication is significantly different than the analysis above for the 0–5 combined group, which shows 60-61% families in the over 317% FPL category.

Continued and sustained analysis of program enrollments by age and income conducted on a systematic basis would provide a very valuable resource to the state in understanding annual income for Vermont families and how this distribution is or is not changing over time.

<sup>7</sup> The SNAP program is the source for the FPL of 100% and under approximation. There are disallowances and deductions for income for the eligibility calculation, these differ slightly from Medicaid. Alternate sources may result in slightly less in the “100% and under” column and slightly more in the “100% to 237%” category.

## Program Closures

The four data sets between Dec. 2015 and Jun. 2018 allowed a determination based on a unique provider identity number so that entities could be matched in a subsequent data set providing an initial indicator of facility closures. **Please note that the closures summarized here are not the same as the net change in capacity over the 42-month period which includes new entrants into the market, net impact is in the next section on Statewide Capacity.**

### Closures of Licensed Providers (Center and School Based Care)

For the licensed providers, meaning the centers and the prequalified public prekindergarten programs, it was clear the provider ID could change for many reasons and was not necessarily an indication that the enterprise had ceased operation. Additional detailed manual analysis was required to understand whether a provider ID discontinuation from one data set to the next was due to a technical change resulting in a new provider ID and license, a change in ownership or name or in some cases a change in location, or whether the program had ceased operations. In a few cases programs obtained a license but never actually operated a program.

The result of this detailed analysis indicates 40 licensed providers ceased operating in this 42-month period. Of this total, two were the result of revocation of license, one each in Rutland and Orleans. Two closures were at non-recurring (ski resort based) centers, Jay in Orleans and Hermitage Club in Windham. Eight or 20% of these closures were prequalified prekindergarten programs; of which two were public school programs. Provided are the slots associated with these closed centers at the last period for which data was provided. Again, please note this is not actual capacity impact as these are closures only and do include new market entrants.

Closures of Licensed Providers Dec. 2015 through June 2018								
	# Closed	# Revoked	# non recurring	PreQ PreK	Infant	Toddler	PreK	School Age
Addison	2				10	3	28	0
Bennington	1					10		
Caledonia	0							
Chittenden	9			2 - private	35	60	178	23
Essex	0							
Franklin	4				43	33	48	2
Grand Isle	1			1-public			10	
Lamoille	0							
Orange	4			1- private	4	10	28	0
Orleans	3	1	1	1- private	21	31	57	10
Rutland	4	1		1-public	4	13	76	5
Washington	7				14	17	97	33
Windham	4		1	2-private	11	8	54	21
Windsor	1				0	3	8	1
<b>Statewide</b>	<b>40</b>	<b>2</b>	<b>2</b>	<b>6-private</b> <b>2-public</b>	<b>142</b>	<b>188</b>	<b>584</b>	<b>95</b>

This analysis also indicates that 51 provider IDs were discontinued due to a technical issue, name change, change of ownership, or change of location, etc. Nine provider IDs were discontinued due to consolidations of multiple locations or separately licensed programs into one location or under one license. The result of consolidations can vary, with some having a capacity impact while others do not. The consolidation net impact is reflected in the overall change provided in the following statewide capacity section of the report.

### Closures of Registered Homes (aka Home Based Providers)

Home based care has been much more volatile with many more homes ceasing operations in comparison to center based care. In the Dec. 2015 to Jun. 2018 period analyzed a total 332 home based programs closed, three due to license revocation. Of this total eight were prequalified pre-K programs. Listed below are the slots associated with the homes that are no longer registered providers. Please see statewide capacity charts for the net capacity impact on registered home slots.

Closures of Registered Home Providers Dec. 2015 through Jun. 2018						
	# Closed	Private PreQ PreK	Infant	Toddler	PreK	School Age
Addison	14	0	28	1	53	52
Bennington	20	0	32	33	40	81
Caledonia	19	0	38	38	38	72
Chittenden	51	1	86	93	104	195
Essex	5	0	10	10	10	20
Franklin	61	0	106	124	119	227
Grand Isle	9	0	17	19	17	33
Lamoille	13	0	22	22	22	44
Orange	15	0	28	27	33	44
Orleans	17	1	33	30	30	66
Rutland	37	1	73	71	72	142
Washington	33	0	53	62	56	129
Windham	19	3	37	36	39	53
Windsor	19	2	35	42	39	58
<b>Statewide</b>	<b>332</b>	<b>8</b>	<b>598</b>	<b>608</b>	<b>672</b>	<b>1216</b>

Consolidations are not an issue in the registered homes. Across the four data sets, there appear to be 17 provider ID discontinuations or changes that were technical in nature and not related to program closure. This analysis also indicated a small number of homes closed for a period, which then reopened at a later date. These are not included in the closure analysis as they were operational again in Jun. 2018.

### Public Early Education Programs – not Prequalified Pre-K

Included with the private center capacity data are public early education programs operating as of Jun. 2018 but are no longer **prequalified** pre-K programs as they were in Dec. 2017. These 8

programs are summarized below and are uniquely identified on the county maps found further on. These programs would not be eligible for the Education Fund pre-K payment.

Program Name	Town	County	PreK Slots in Program	
			Dec. 2017	Jun. 2018
Leicester Preschool	Leicester	Addison	9	9
ANWSD Early Education Program	Vergennes	Addison	10	10
Whiting Community Preschool	Whiting	Addison	15	15
Concord Early Childhood Program	Concord	Essex	15	15
Barlow Street School	St Albans	Franklin	15	15
Lowell Graded School	Lowell	Orleans	20	20
Rutland Town Elementary EEE	Rutland	Rutland	3	3
WNESU Early Education Center at Athens	Athens	Windham	15	15
<b>Total</b>	<b>8 progs</b>	<b>6 ctys</b>	<b>102</b>	<b>102</b>

### Non-Recurring Programs

These ski resort based programs are included in the center based capacity data analyzed. The number of these non-recurring programs has shrunk due to closure or consolidation. The number of slots in all categories has dropped in non-recurring programs. This means regular private centers that serve recurring kids actually increased their number of infant and toddler slots to a greater extent than the net increase in the executive summary and Chart 1a since regular programs also offset the loss of infant and toddler slots in these non-recurring programs.

Jun. 2018 Capacity Provider County	# Programs	Slots under non-recurring designated programs				
		Infant	Toddler	Pre-K	Sch. Age	Total
Bennington	1	12	10	52	0	74
Chittenden	1	4	6	10	10	30

## Statewide Capacity

### Findings – Licensed Providers (Center or School Based) - Chart 1

- Private centers dropped by 20 (-4.8%) to 394, but both infant and toddler slots increased while pre-K and school age slots decreased (Chart 1a)
- Private Prequalified pre-K programs total 209, meaning 53% of the private centers have programs and nearly 65% of the pre-K slots are in centers with a program. This is over a 20% increase from Dec. 2015 (Chart 4-private center detail )
- Public School Pre-K programs total 138 and pre-K slots here now total 2,953 slots. Both increased by 7.8%, by 10 and 214 respectively. (Chart 4-public pre-K detail)

### Findings - Home Based Care – Chart 2

- There are now 204 fewer home based providers, a drop of -26.6%. The number of home providers as of Jun. 2018 is 564.
- The reduction in home provider slots across all age categories is over -20%, with the total slot reduction at -25.5%
- Prequalified pre-K home providers are still a very small percentage of the total at 7.4% which covers 9.1% of pre-K home slots. This is nearly a 70% increase over Dec. 2015 (Chart 4-home pre-K detail)
- The one piece of good news in the home providers is that the number of 4 and 5 STARS rated homes have increased significantly. These highly rated homes are now 19% of the total home providers, up from just below 10% in Dec. 2015. The greatest decline has been in the unrated and 1 STAR programs this can be seen in home portion of Chart 5.

### Findings – Total Capacity – Chart 3

- Combined the impact of the home net closures and slots overwhelms the increase in licensed slots resulting reduced slots in every category.

Chart 5, is the detailed statewide capacity chart that includes all the statewide data from Charts 1 through 4 on one page. It is a bit dense to read, but it provides the most information including changes in STARS rated programs overtime as well as private and public prequalified pre-K. The left side of the chart provides the data on Center Based Licensed Providers as of Jun. 2018 and Dec. 2015 and the percent change for the period. Private center counts include both prequalified pre-K centers and those without this qualification. The Total Center Slots include the Public prequalified pre-K programs for the total for all licensed center and school based care. The right side of the chart summarizes the Home Based segment. A county capacity summary in the same format is provided for each county in the following sections of the report.

On the following pages are several charts that provide the current capacity by provider type statewide and by county as of June 2018. Data show the number of providers and the number of slots by category; the change in capacity since Dec. 2015; and the percentage change since the 2015 starting point.

## County Specific Data

On the following pages are county specific data on:

0-5 Population

Child Care Capacity Summary

Licensed Providers (Center and School based) – left side of summary

Registered Homes – right side of summary

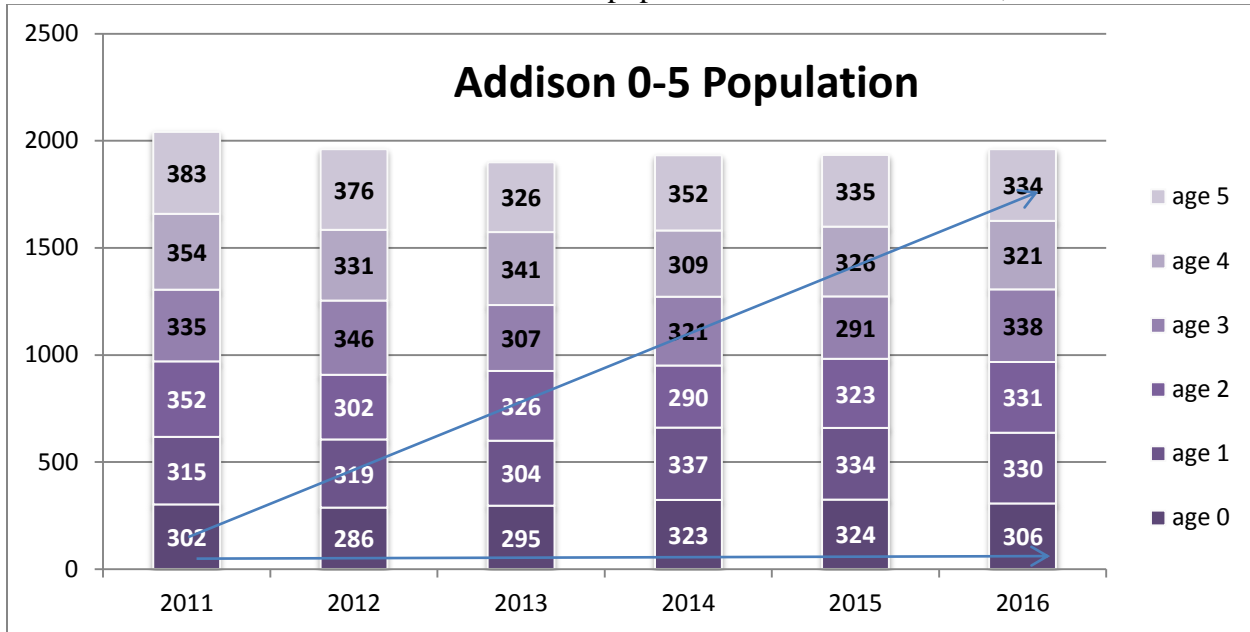

County Map showing center and school based providers

(Home based providers are not included on the county maps)

## Addison

### Population

0–5 total population as of Jun. 2018 is 1,960

### Provider Closures

Addison saw two licensed programs cease operation within the 42-month period analyzed. However new programs came online within the same time period leaving the center count the same.

In Addison county 14 registered homes ceased operation in the 42-month period analyzed. Some of this impact was mitigated by new entrants.

**Capacity – detailed capacity information is provided on the county summary chart**

**Non-Recurring Programs – None**

### Public Early Education Programs – not Prequalified Pre-K

In Addison there are three public early education programs that are not prequalified pre-K as of Jun. 2018.
