

The Treasury by the Number\$

Vermont State Treasurer's Office
Presentation to the General Assembly
Updated January 2017

Agenda

- Retirement Operations and Pension Obligations
- Capital Financing and Debt Management
- What's next?
 - Legislative Initiatives

Treasury Functions

- Unclaimed Property
- Retirement Operations
- Treasury Operations/Banking
- Investments/Pensions
- Debt Management/Bond Issuance

Retirement Operations and Pension Obligations

Guiding Principles for a Retirement Plan

Fairness and Sustainability Are Both Essential to Benefit Plans

What Do We Want From Our Retirement Benefit Plan?

- ▶ **Recruitment** – The benefit plan should act as an incentive for recruiting high quality employees. The plan must be competitive with those in other states and within Vermont.
- ▶ **Retention** – The benefit plan should act as an incentive for retaining high-quality employees and maintaining a stable workforce. The plan should also be compatible with changing workforce and demographic trends.
- ▶ **Reward** – The benefit plan should provide a solid foundation for retirement security following a career in public service.
- ▶ **Sustainability** – The cost of the benefit plan should be sustainable and predictable over the long term.
- ▶ **Affordability** – The cost of the benefit plan should be affordable for current and future public employees and other taxpayers.
- ▶ **Fairness** – The benefit plan should be fair to workers and other taxpayers.
- ▶ **Equity** – The benefit plan should be equitable for all parties.

Retirement Customers

- Serves 51,211 active, retired, inactive, and vested members
- \$299.5 million in pension benefits paid in FY 2016
- \$58.9 million in healthcare premium payments made in FY2016

Investment earnings comprise the greatest source of revenue

Figure 3: Public Pension Sources of Revenue, 1985-2014

Source: Compiled by NASRA based on U.S. Census Bureau data

Annual Required Contribution

- Method by which UAL is eventually paid off (assuming it is funded)
- Annual Required Contribution (ARC):
 - A measure of needed plan funding
 - The actuarially determined pension fund contribution in a single year
- The ARC has two parts:
 1. The Normal Cost
 - The normal cost generally represents the portion of the cost of projected benefits allocated to the current plan year
 - The employer normal cost equals the total normal cost of the plan reduced by employee contributions
 2. Amortization, which is the annual amount needed to eliminate the unfunded liability over the plan's amortization period

Upward Budget Pressures on Funding of the ARC

- Historical
 - Great Recession Impact
 - Lack of Funding of the ARC in past years, especially the teachers' system
- Demographic/Experience and Economic Assumptions vs. Actual
- Experience Study
 - Interest Rate Assumption
 - Mortality
 - Other
- Retirement Incentive
- Teacher Retirements/Education Workforce Changes

FY 2016 VSERS Valuation Results

- Incorporates an FY 2018 ARC recommendation of **\$52,065,397**
 - Normal \$14,037,814
 - Accrued Liability Amortization \$38,027,583
- Increase from prior year of **\$3.6 million**
- Normal Cost: 2.88% of projected payroll
- Recent experience study incorporated upward pressures due to the changes in interest rate and new mortality assumptions.

FY 2016 VSTRS Valuation Results

- Incorporates an FY 2018 ARC recommendation of **\$88,409,437**
 - Normal \$ 8,346,261
 - Accrued Liability Amortization \$80,063,176
- Increase from prior year of **\$5.7 million**
- Normal Cost: 1.33% of projected payroll
- Recent experience study incorporated upward pressures due to the changes in interest rate and new mortality assumptions
- Increasing amortization payments have greater impact on VSTRS
- Increase in retirements, local workforce changes
- Overall, the number of active teachers continues to decline

Funding History

	Year ending June 30	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) (b)	Unfunded AAL (UAAL) (b-a)	Funded Ratio (a/b)
VSERS	2016	\$ 1,707,268	\$ 2,289,452	\$ 582,184	74.6%
	2015	1,636,268	2,178,827	542,559	75.1%
	2014	1,566,076	2,010,090	444,014	77.9%
	2013	1,469,170	1,914,300	445,130	76.8%
	2012	1,400,779	1,802,604	401,825	77.7%
	2011	1,348,763	1,695,301	346,538	79.6%
	2010	1,265,404	1,559,324	293,920	81.2%
	2009	1,217,638	1,544,144	326,506	78.9%
	2008	1,377,101	1,464,202	87,101	94.1%
	2007	1,318,687	1,307,643	(11,044)	100.8%
	2006	1,223,323	1,232,367	9,044	99.3%
	2005	1,148,908	1,174,796	25,888	97.8%
	2004	1,081,359	1,107,634	26,275	97.6%
	2003	1,025,469	1,052,004	26,535	97.5%
	2002	990,450	1,017,129	26,679	97.4%
	2001	954,821	1,026,993	72,172	93.0%
	2000	895,151	967,064	71,913	92.6%
	1999	804,970	876,412	71,442	91.8%
	1998	733,716	804,501	70,785	91.2%
	1997	639,128	753,883	114,755	84.8%

note: amounts in thousands.

	Year ending June 30	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) (b)	Unfunded AAL (UAAL) (b-a)	Funded Ratio (a/b)
VSTRS	2016	\$ 1,716,296	\$ 2,942,024	\$ 1,225,728	58.3%
	2015	1,662,346	2,837,375	1,175,029	58.6%
	2014	1,610,286	2,687,049	1,076,764	59.9%
	2013	1,552,924	2,566,834	1,013,910	60.5%
	2012	1,517,410	2,462,913	945,503	61.6%
	2011	1,486,698	2,331,806	845,108	63.8%
	2010	1,410,368	2,122,191	711,823	66.5%
	2009	1,374,079	2,101,838	727,759	65.4%
	2008	1,605,462	1,984,967	379,505	80.9%
	2007	1,541,860	1,816,650	274,790	84.9%
	2006	1,427,393	1,686,502	259,109	84.6%
	2005	1,354,006	1,492,150	138,144	90.7%
	2004	1,284,833	1,424,661	139,828	90.2%
	2003	1,218,001	1,358,822	140,821	89.6%

2015	576,393,699	72,857,863	72,908,805	(50,942)	100.1%

Vermont Maintains a Strong Commitment to Funding Pension Liabilities

- Vermont is one of 15 states that achieved positive amortization in 2014.
- Vermont enacted statutory changes in 2016 to affect more rapid amortization.
- Vermont has paid more than the ARC/ADEC in the most recent five-year period and continued this trend in FY 2016 and expects to do so in 2017.
- Vermont does not operate under restrictive statutes that cap annual contributions or increases in contributions as a percentage of payroll, which was noted as an issue in other states in a recent publication by FitchRatings.

Net Amortization as a Share of Covered Payroll
15 states achieved positive amortization in 2014

ARC/ADEC Paid and Amortization Summary

System Name	2011	2012	2013	2014	2015	Five Year Average	Period (Years)	Basis	Method

Source: Adapted from Fitch Ratings, 2016 State Pension Update: New Accounting, Old Challenges, November 15, 2016

Vermont continues to compare favorably with its Triple-A peers

In FY2016, Vermont continued its efforts to contribute in excess of the ARC/ADEC:
 State retirement System: 117.5%, State Teachers retirement System 101.1%

Drivers of Changes in the Unfunded Liability

Cumulative impacts on unfunded liability 2003 – 2013

(Positive Numbers Reflect Negative Experience that Increased the Liability)

VSTRS Active to Retiree Ratio

Issues related to Active to Retiree Ratio

- Unlike a “pay-as-you-go” plan such as Social Security, the actuary takes this in account when developing models to prefund benefits.
- The increasing trend may get ahead of actuarial demographic assumptions, creating actuarial losses.
- Trends are indicative of a maturing plan and can make it more difficult to achieve the objectives of full funding.
- Potentially creates more volatility in employer contribution rates.
- As more funds are needed for benefit payments, the system has a greater negative cash flow (benefit payments exceed contributions), requiring more liquid assets to fund these payments.
- Impacts asset allocation strategy over time. May have VPIC impacts.

History of Disciplined Incremental Steps to Reduce Pension and Retiree Health Care Costs To Taxpayer

- 2005 Teacher Study made changes to the state's actuarial methods and put full funding of ARC on track. Legislature has consistently adopted a budget with full funding of the ARC since 2007.
- 2008 Committee restructured state system (VSERS) Group F benefits, lengthening age of retirement, effective in FY 2009, in concert with health care changes.
- 2009 Pension and Health Care Study completed providing basis for negotiated savings over the next few years for both state (VSERS) and teachers (VSTRS) system.
- 2010 VSTRS: Lengthen age for normal retirement, contribution increases, and other changes, effective in FY2011, resulting in **\$15 million in annual pension savings to taxpayer. In addition to pension costs, additional health care savings accrued.**
- 2011 VSERS: Employee contribution rate increases beginning FY2012, **\$5 million in savings per year.**
- **2011-2012 VSTRS:** Secured **one-time revenues in excess of \$5 million for VSERS and VSTRS** under the Federal Early Retirement Reinsurance Program.
- 2012- 2015: Incremental increases in employee and employer contributions to municipal system, demonstrating shared responsibility by all parties. Put the municipal system on a stronger financial track.
- 2014 VSTRS: additional contribution increases for new and non-vested members, effective FY 2015, **\$1 million initial annual savings, increasing each year.**
- 2014: VSTRS: Statute change permitting the charging of pension costs to federal grants, effective FY 2016, estimated **\$3 to \$4 million savings per year.**

History of Disciplined Incremental Steps to Reduce Pension and Retiree Health Care Costs To Taxpayer (cont.)

- **2015: Created Retired Teachers' Health and Medical Benefits Fund starting FY2015**
 - Since the 1980s, health care premiums for teachers paid out of a sub-trust of teachers pension fund; by 2014 costing over \$20 million per year in interest costs to taxpayer
 - Collaborative solution: Successfully convened over a dozen stakeholders, including employee group, to address the problem including combined pension/health care changes. In addition to pension and health care changes previously stated, a new health care assessment for LEAs, linking local employment decisions to the benefit costs.
 - **Projected to save taxpayers \$480 million** in unfunded liability interest costs through FY2038.
- 2016: Changes to the amortization financing schedule for the State and Teacher systems. **Will result in saving the taxpayer \$165 million** in interest from present to 2038. See next page for explanation.
- 2016: Increased employee contributions will result in **\$1.2 million in annual savings, with savings growing larger in future years.**

At the same time creating additional Transparency and Accountability

- 2013: Pension forfeiture statute, applicable to all three systems (state, teacher and municipal).
- 2015: VSERS Disability retirement reform permitting wage verification of disability pensioners.

Collaborative Approach Key to Success

- All benefit changes made through collaborative efforts involving Administration, Treasurer's Office, General Assembly and Employee Groups.
- No court litigation/disruptions in planned implementations.

2016 Amortization Change Explained

- While the State has a date set in statute, 2038, to pay down the unfunded liability, the payment schedule was established with increases in 5% increments each year
- This has the effect of increasing interest costs associated with the payment of these liabilities
- Leveling out the payment schedule would:
 - increase ARC payments in the short-term but have the effect of saving the taxpayers millions of dollars over the long-term
 - more rapid reduction of the unfunded liability
- Changes to amortization schedule phased-in to cushion budgetary impact
- Adopted by the Legislature in 2016
- Treasurer's Office proposed and the Legislature adopted phasing in a payment schedule with increases at 3% increments each year, closer to the projected long-term rate of inflation.
Interest savings through 2038 estimated at \$165 million.

Capital Financing and Debt Management

History of Vermont's Debt Policies

- In the early 1970s, Vermont lost its Triple-A bond rating, largely because of a significant accumulation of bonded indebtedness. There were three principal causes for the increase in outstanding debt: interstate highway construction, extensive school construction and renovation, and sewage treatment plant construction.
- In 1975, Vermont enacted in statute the so-called “90 percent rule” as a policy device to reduce its large amount of accumulated tax supported debt.
 - New general obligation debt authorization was restricted to 90 percent of the debt being retired in the same fiscal year.
 - The ratio of debt as a percent of personal income, a key benchmark for rating analysts, was reduced from about 11% in the mid-1970s to about 3% in 1989.
 - The 90 percent rule policy was not sustainable and policymakers recognized it would eventually lead to unrealistically small amounts of allowable new debt.
- In 1990 the “90 percent rule” was repealed and the Capital Debt Affordability Advisory Committee was created to provide a new framework for determining the appropriate level of new debt issuance for the State.
- CDAAC Progress: In 1996, Vermont’s debt as percentage of personal income was twice the national median and we ranked 9th highest in the country. In 2012, the State is under the national median for that ratio and ranked 36th highest in the country; Vermont’s debt per capita ranked 34th highest in the country.
- Debt guidelines strengthened in 2004. State now benchmarks against triple-A rated states.
- In February of 2007, Vermont rejoined the ranks of Triple-A rated states when Moody’s raised its rating for the State from Aa1 to Aaa; in April 2010, Fitch “recalibrated” Vermont’s rating from AA+ to AAA; and in September 2012 S&P improved its outlook on Vermont’s AA+ rating from stable to positive although returned it to stable in November 2012.

Overall Debt Strategy....

- State has substantially reduced outstanding debt since 1990s, but
 - Need to manage recent trend vs. recent national trend of reductions in bond issuance
- Uncomplicated debt profile, almost entirely general obligation debt
 - Transportation Infrastructure Bonds
- 100% fixed rate
- Level principal produces rapid amortization (reducing debt by quick installment payments)
- Capital Appropriation Changes adopted by the General Assembly have improved the process:
 - Two year recommendations
 - Use of bond premium
 - Review and use of residual dollars from prior capital projects

Capital Debt Affordability Advisory Committee

- The CDAAC was created by State statute in 1989
- Annually reviews affordability of Vermont's net tax-supported debt
- Recommends annual debt issuance to Governor and General Assembly
- Recommendation is advisory; in practice, Governor and General Assembly have always adopted
- Reviews amount and condition of bonds, notes and other obligations the State has a contingent liability or moral obligation

Vermont's Credit Ratings History

(Highest Credit Ratings in the Northeast)

MOODY'S INVESTORS SERVICE

RATING ACTION	DATE
Aaa	1971
Aa	9/20/72
Aa2*	10/20/97
Aa1	9/29/99
AAA	2/05/07

* In 1997, Moody's began refining ratings with numerical modifiers. The shift to the "Aa2" rating was part of this process.

FITCH RATINGS

RATING ACTION	DATE
AA	8/18/92
AA+	10/25/99
AAA*	4/5/10

* Resulted from Fitch's "recalibration" of public sector credit ratings.

AA	10/14/98
AA+	9/11/00
AA+	9/18/12

Credit Rating Priorities for Legislature

- **Pension Funding:** Continue 100% funding of the annual required contributions (“ARCs”) of the Vermont State Employees’ and State Teachers’ Retirement Systems pension funds
- **Reserves:** Continue to maintain the 5% budget stabilization reserves, and build the newly-created General Fund Balance Reserve (or “rainy day reserve”) to a target level of 3% of the general fund incrementally and over time
- **Debt Recommendation:** Continue unbroken record of adopting the Capital Debt Affordability Advisory Committee’s (CDAAC) biennium recommendation of \$132.5 million net tax-supported debt
- **Teachers’ Healthcare:** Continue to fund retired state teachers’ healthcare costs from the annual budget, not from pension funds

CDAAC Recommendation

- This is the first year of the 2018-2019 biennium and the Committee recommended a 2-year debt authorization of \$132,460,000
- This represents a reduction of 8.01% from the previous recommendation of \$144,000,000

State of Vermont General Obligation (G.O.) Debt Authorizations, FY1994-FY2017 (\$ millions)

State of Vermont G.O. Debt Outstanding, FY1995-FY2016 vs. National Trend

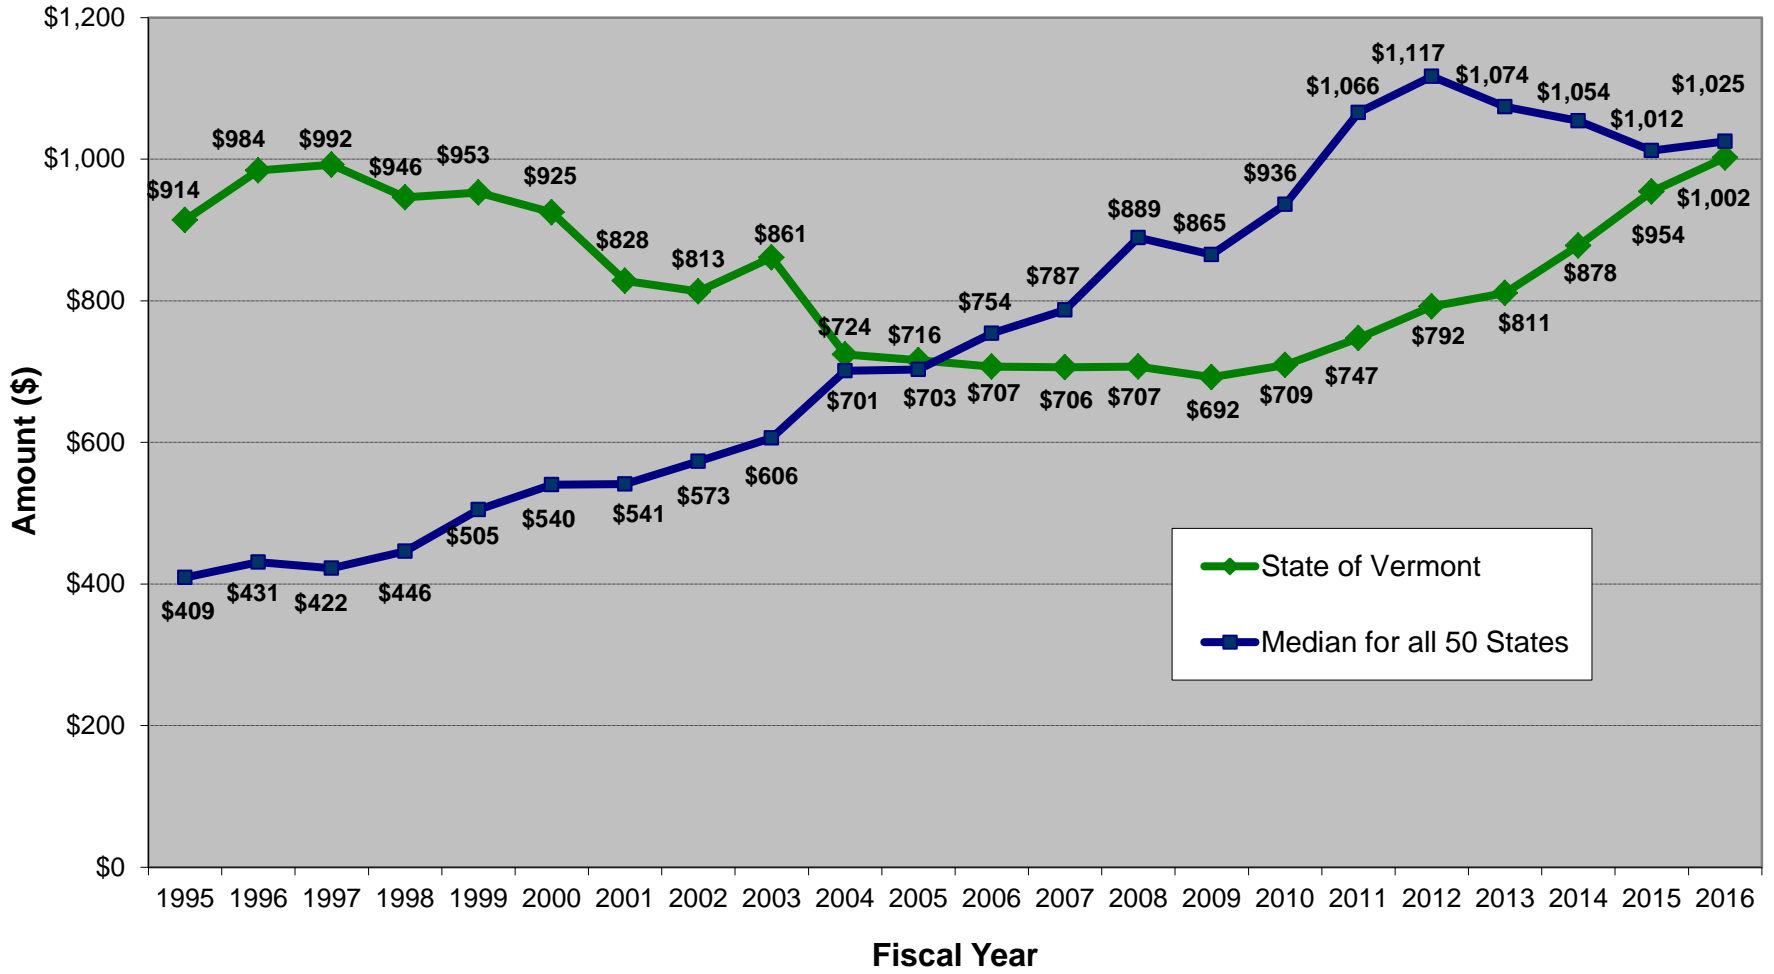

State of Vermont G.O. Debt Outstanding, FY1995-FY2016 Adjusted for Inflation (Using 1995 Dollars)

State of Vermont Net Tax Supported Debt Per Capita

State of Vermont Net Tax Supported Debt as a Percent of Personal Income
