

BGS Fleet Management Services

Fleet Composition

The program right-sizes vehicles by matching the expected use with the most economical, fuel-efficient, and lowest emissions vehicle possible. Administrative travel and passenger transport is best accomplished by partial- or zero-emission sedans, and larger vehicles reserved for bulky or heavy cargo transport, off-road travel, or other special needs.

FY17 – Inventory as of July 3, 2017
includes 48 transitioning new/retired units
