

VERMONT

**AGENCY OF TRANSPORTATION
Governor's Highway Safety Program**

Transportation Committee Handout 2018

<http://ghsp.vermont.gov/content/reports-and-data>

Presented by:

Keith Flynn, Chief

Bruce Nyquist, Director Office of Highway Safety

Allison Laflamme, Financial Manager

Introduction:

The Governor's Highway Safety Program (GHSP) would like to thank the Senate/House Transportation Committee for the opportunity to present information about the program. The GHSP is 100% federally funded through the National Highway Traffic Safety Administration (NHTSA).

The mission of the GHSP is "working toward the goal of "Zero Deaths" by promoting highway safety awareness through education and enforcement, thereby reducing crashes, saving lives, and improving the overall quality of life for those using Vermont's roadways." To achieve this mission the GHSP seeks participation from its law enforcement partners, other state and federal agencies, and community partners in making Vermont's highways the safest in the country.

The GHSP employs a result-based accountability methodology in awarding grants and measuring success, this approach is utilized to assure that each dollar spent is for the benefit of those using Vermont's roadways. GHSP sponsors the Vermont Highway Safety Alliance (VHSA) that is charged with the development and implementation of the Vermont Strategic Highway Safety Plan (SHSP). The SHSP provides a roadmap for the Highway Safety Plan that is created for each year and utilizes proven countermeasures to address highway safety issues in Vermont.

The SHSP identifies seven Critical Emphasis Areas:

1. Improve Infrastructure
2. Curb Speeding and Aggressive Driving
3. Increase Use of Occupant Protection
4. Vulnerable Users & Motorcyclists Safety
5. Age Appropriate Solutions
6. Reduce Impaired Driving
7. Curb Distracted Driving and Keep Drivers Alert

Two Significant Emphasis Areas:

1. Reduce Medium and Heavy Vehicle Crashes
2. Improve Work Zone Safety

Two Special Emphasis Areas:

1. Improve Vermont's Data in the Interest of Safety
2. Enhance Vermont's Emergency Medical Services Capabilities

Funding:

The GHSP receives funding from four federal sources:

- 1). S.402 Safe and Community Highway Safety
- 2). 405 National Priority Safety Programs
- 3). SAFETEA-LU
- 4). Federal Highway

402 Funds

Planning and Administration
Occupant Protection
Police Traffic (Law Enforcement Support)
Motorcycle Safety
Safe Communities (Education)
Paid Advertising

405 Funds

405(B) Occupant Protection
405(C) State Traffic Safety Information System Improvement
405(D) Impaired Driving Countermeasures
405(E) Special Distracted Driving
405(F) Motorcyclist Safety

SAFETEA-LU

1. Planning and Administration
2. Alcohol Countermeasures

Federal Highway

1. Requests approved from FHWA become S.164AL funds

Below you will find the dollars spent for Federal Fiscal Years 2015 – 2017.

As evidenced above NHTSA funding for this program is decreasing and carry forward is being spent down.

Overview of Each Funding Source:

FFY2017 GHSP Annual Report Excerpts

GHSP Planning and Administration

GOAL: To provide the management, supervision, and support services for the activities necessary to operate the traffic safety program in the State of Vermont.

Strategies

Conduct business guided by all applicable rules, regulations, laws and statutes. Provide highway safety guidance and assistance to all appropriate traffic safety partners in the state.

Project Evaluation

These operations activities were reviewed and monitored on a regular basis following VTrans and GHSP policies and procedures.

Project Number(s)	Project	Budget	Expended	Source

Occupant Protection Program Area

Click It or Ticket (Day and Night) National Mobilizations, Ongoing and Periodic Seatbelt and Child Passenger Restraint Enforcement and Support Equipment

GOAL: To increase the statewide use of proper occupant restraints, including properly installed child passenger safety seats.

Strategies

Using statewide and local data, conduct sustained occupant protection enforcement, high visibility enforcement and support the national CIOT campaign efforts in selected areas throughout the state. Enforcement activity will be supported with equipment directly related to occupant protections enforcement efforts.

Project Evaluation

Each year these CIOT Task Force teams work in conjunction with other Vermont law enforcement agencies to participate in several media reported kick-off events that set the stage for the May CIOT campaign. The Vermont GHSP and the LELs coordinate with their counterparts in New York State to participate in a Border-to-Border CIOT Kick-Off event in New York and Vermont. This year on May 22, the first day of the CIOT campaign, Vermont Law Enforcement again met with New York State Police on the Ferry from Charlotte Vermont to Essex New York. This Border to Border event signifies the start of the CIOT campaign, demonstrates the commitment both States have to traffic safety, and is well covered by the media from both States.

During the CIOT May 22 to June 04 campaign Vermont had the following participating LEAs:

41 Municipal Departments

2 Town constables

10 Vermont State Police Barracks

14 County Sheriff's Departments

The Department of Motor Vehicles

University of Vermont Police

6000 hours of high visibility patrol was conducted which resulted in the following:

17,000 vehicles contacted

476 Seatbelt tickets

69 Child Passenger tickets

5000 other motor vehicle related tickets

215 Criminal arrests.

Task Force Team Captain Al Fortin of Shelburne PD, and Team Lieutenant Kevin Geno of the Rutland County Sheriff's Department participated in media and other events to include: Multiple radio talk shows in Chittenden and Rutland Counties, a Public Service Announcement for Channel 3, an interview with Fox 44, partnering with the Red Cross, and conducting blood drives to promote seatbelt safety.

Vermont Governor’s Highway Safety Program

During the second week of CIOT, the Task Force leaders along with GHSP, NHTSA, and AAA, partnered with four trucking companies to promote the See it, Click it, Commit to it, initiative. This initiative promotes seatbelt safety by attaching large CIOT signs on the back of commercial motor vehicles that promote the use of seatbelts. The participating companies included JP Noonan, Markowski Excavating, Fabian Earth Moving and Farrells Distributing. This program started with a 2016 partnership with the Vermont Truck and Bus Association and involved Click it or Ticket posters attached to the back of Bellavance Trucking Commercial vehicles. This is an innovative program that spreads the message of seat belt saving lives throughout the year in Vermont, New England and beyond.

The task forces participated in the other continued to enforce seatbelt laws throughout the year. The task force in Rutland County has monthly meetings with participating LEAs in order to promote a focus on occupant protection enforcement. During those meetings, there is an emphasis on making sure all occupants of vehicles contacted are restrained in a seatbelt, and to look closely for child safety seats infractions. This has led to several tickets for Child Restraint Systems being issued at DUI checkpoints. When doing high visibility or saturation patrols with one person tasked with speed detection or observing use of electronic devices, the Officer will also concentrate on seat belt violations. The task force worked several construction zones during the summer where Deputies directing traffic looked for violations, and indicated to task force members the violation and if the occupants were belted.

Vermont LEAs and Task Forces participated in a voluntary CIOT mobilization during the Thanksgiving Holiday. As a tourist destination State there is a significant increase in motor vehicle travel during the holiday. This increased volume of traffic correlates with the increased number of motor vehicle crashes and impaired driving arrests during these periods.

In addition to the task force teams, the VHSA Occupant Protection Task Force, known as OP- 802 was led by Vermont’s northern Law Enforcement Liaison and supported law enforcement officers, community leaders and private industry in an area of the state known as the Northeast Kingdom. This is a geographic area made up of three counties. The annual seatbelt surveys show this area as being the least compliant in the state. The mission of this task force is to use education and strict enforcement to combat the low usage rate and reduce the number of unbelted fatal crashes which occur during the specified periods.

Summary of the May CIOT enforcement data:

May 2017 Click It or Ticket	# Hours at Patrols and Checkpoints	# of Contacts	Total # of Seat Belt Tickets	Total # of CPS Tickets	Total # Speed Tickets	Total # Other Tickets	#Arrests

Countywide Safe Highway Accident Reduction Program (SHARP)

GOAL: To identify and prioritize critical targeted areas countywide so that officers can be deployed, and resources directed to high risk areas with a cohesive strategy and consistent oversight.

Strategies

Address the ongoing highway traffic safety mission through implementation of a countywide project to consolidate law enforcement agencies into an umbrella sub-award (a unified SHARP team) as a single grant project with sub-awardees. The project will include a countywide Program Coordinator who will organize, supervise, and promote enforcement as well as plan and implement educational activities. In addition, the coordinator will facilitate and supervise OP and DUI enforcement activities and funding for combined countywide sub-awards.

Project Evaluation

This countywide approach to traffic enforcement in Vermont’ two most populated counties has proven to be very effective. The model is described in the 2017 H/S Plan, but briefly, Vermont’s Highway Safety Office has awarded both Occupant Protection and DUI enforcement funds to the Project Coordinators in both Chittenden and Rutland County. The Coordinators are full-time certified police officers in Vermont that have proven to be highway safety champions for years. They have organized all of the law enforcement agencies in their county to work together to combat the problems of Speeding, Distracted/Aggressive Driving, Impaired Driving and failure of drivers and passengers to wear safety restraints. These participating agencies have pledged to participate in every enforcement action scheduled by their local Coordinator. In addition, they have the approval of their Chief or Sheriff as well as that agency’s town or city government to develop this project in their respective counties.

Besides having well-staffed, very visible and very well-organized patrols, the Coordinators are an active part of each patrol. Consequently, the result is close supervision of the patrol team with accurate and timely reporting of grant funds used and the productivity generated.

In addition, each participating agency has a smaller portion of the total countywide enforcement grants, (O/P and DUI) to use in their respective community for special events or local and/or emerging traffic problem areas.

Child Passenger Safety Statewide Program

GOAL: To provide Child Passenger Safety (CPS) education and services to all areas of the state and reduce the number of deaths and injuries by promoting regular use of child safety seats and safety belts.

Strategies

Maintain a roster of trained and certified technicians by location(s), local fitting stations statewide, annual schedule of public inspection events, website, helpline and printed materials for outreach and education and voucher system for income-eligible families to access seats.

Project Evaluation

During FFY17, the focus of the funded activities included four-full courses for new technicians, located in regions based on identified need for CPS technicians. The number of nationally certified technicians increased modestly again this year, from 162 to 177 statewide. We distributed over 900 child safety seats to low income families. The low-income seat voucher distribution program remains in place through the twelve WIC offices statewide to assure access for income qualified families (less than 300% poverty level), one per child installed in a vehicle by a certified technician with the child present (or expectant mother). This program works to increase awareness of existing fitting stations as a community resource and will ultimately decrease misuse.

The Vermont Police Academy implemented a new training program to increase awareness of CPS concerns to all new law enforcement officers. The first course was presented in June and will become a regular part of curriculum for law enforcement officers. Law enforcement technicians act as resources within their communities to assist un-trained officers on child restraint laws and enforcement of Vermont’s Child Passenger Safety laws. Currently, 25% of all the certified technicians in Vermont represent law enforcement. During FFY 2017 11 of the 14 counties in Vermont had certified technicians placed within law enforcement agencies.

The Vermont Child Passenger Safety program held courses in some of the counties that are without trained law enforcement personnel. The hope was to add some new law enforcement personnel to these areas. We were able to train two officers in Lamoille County and two officers in Addison County. We will

work with the Vermont State Police and local law enforcement agencies to identify potential candidates for our 2018 training schedule. We are planning to hold New Tech trainings in the Northeast Kingdom, Franklin County and Rutland County for FFY 2018.

Project Number(s)	Subgrantee(s)	Budget	Expended	Source

Road Users Group Statewide Program

GOAL: To provide statewide safety education and training focused on pedestrians and EMS providers on traffic safety best practices.

Strategies

Deliver occupant protection education to Vermont EMS providers to reduce the number of severity of motor vehicle crashes involving emergency vehicle (ambulances). Implement Evidence-Based Fatigue Risk Management Guidelines for Emergency Medical Service.

Project Evaluation

The creation of the project evaluation, in progress, is based on current available data. We have completed an initial literature review, assessment of relevant and accessible data sources, and initial data analysis utilizing EMS run data, hospital discharge data, and vital records data. The evaluation will be directed at the findings of the initial analysis and will include process measures like; number of trainings delivered, number of toolkits distributed, number of community partners promoting messaging. Outcome measures will include; number/rate of pedestrian injuries and deaths, number of ambulance crashes, number/rate of injuries/deaths resulting from crashes.

Priority activities for 2017 included the following:

- A. Personnel. The program did not receive funding until 6 months into the fiscal year. At that point we began the state new position approval process and hiring processes. We were only able to secure staffing for the Occupant Protection for EMS position starting September 2017 and the Pedestrian Safety Coordinator position October 2017.
- B. Data identification and analysis.
- C. Programmatic research review.

Vermont Highway Safety Alliance (VHSA): Partnership for Education and Outreach

GOAL: To bring together like minded highway safety advocates in a forum that facilitates the exchange of ideas and methodologies to promote highway safety.

Strategies

To provide funding, resources and support for the VHSA to provide community education and outreach activities.

Project Evaluation

The VHSA increased partnerships and Alliance membership through networking and professional communications. The VHSA also engaged in public education and awareness activities thru forms such as; fairs, professional conferences, social media, and safety events. The VHSA, with SPIKE Advertising, developed a safety display for community outreach for the Road User Safety Pledge. Sixty-five organizations agreed to place over 100 displays in their place of business, including the DMV. In addition, the Vermont Tourist Centers are displaying 40 highway safety informational posters in their facilities statewide. The VHSA has leveraged opportunities for media coverage and PSA’s through coordination of marketing efforts with partners. The VHSA contracted with SPIKE advertising to develop and produced three public safety videos for release and use with earned and purchased media outlets. The focus was on developing and implementing strategic outreach programs designed to change driver behavior and promote road safety for all ages, with a focus on a message that is appropriate for a young audience.

The VHSA conducted the 2016 VHSA annual meeting in at Mt. Snow, and planned for the 2017 annual meeting entitled “The Road to Highway Safety is Paved with Technology” in Burlington during the FFY2107 grant period.

The VHSA worked with Regional Planning Commissions (RPC’s) who helped with media outreach for speeding and aggressive driving with a focus on the Central Vermont, Southern Windsor, Two Rivers, Chittenden County and Windham RPC’s for the Operation Safety Corridor project.

The VHSA maintained an open access highway safety related data portal on their Website. Partner organizations have contributed to highway safety educational events with subject matter experts, volunteers and donations all focused on the mission of "Toward Zero Deaths".

Project Number(s)	Subgrantee(s)	Budget	Expended	Source
NH17402-426	VHSA	70,000	55,745.65	\$402

Annual Safety Belt Survey

GOAL: To determine the annual post Click-It-or-Ticket seat belt usage rate statewide, analyze multi-year variations and use the results to improve statewide average and low rate areas of the state.

Strategies

To post Click-It-or-Ticket NHSTSA compliant observational study and analysis, i.e. Seatbelt compliance rate.

Project Evaluation

This year’s field survey was conducted during the month of June in 2017. The post-enforcement rate for all front seat occupants was 84.5%, up from the 2016 low of 80.4%. This represents a return to baseline averages in the mid 80% range.

For the past several years the usage rate has continued to hold remarkably steady. For some years, it seemed to vary in response to the CIOT campaigns, but for the past few years, even that variability has diminished, varying little from just below 85%. The overall rate has, for the past several years, also been unresponsive to the enforcement campaign, although, without a pre-enforcement survey, it is impossible to know this for definitively.

Based on the data, such an opportunity may exist geographically to address low compliance rates among males and pickup truck occupants suggests a potential opportunity for more carefully targeted education/awareness/ “consciousness raising” efforts.

Project Number(s)	Sub grantee(s)	Budget	Expended	Source
NH17405B-014	PRG	101,400	92,825	\$405(b)

Data Collection (Support of Child Passenger Safety Questions in VDH PRAMS)

GOAL: To determine the annual post Click-It-or-Ticket seat belt usage rate statewide, analyze multi-year variations and use the results to improve statewide average and low rate areas of the state.

Strategies: To include a series of four questions in the annual Vermont Department of Health PRAMS survey. These questions will focus on the use of child restraints for infants in Vermont.

Project Description: The VDH CPS program continues into its third year to include four additional questions in the 2017 Vermont administration of the Pregnancy Risk Assessment Monitoring System. This is a population-based survey which collects data on maternal attitudes and experiences before, during and shortly after pregnancy. Data will be collected at all hospitals statewide. The four CPS questions address new mothers’ preparedness to safely transport their infants in a car. The funds directly support the cost of including those questions in the survey instrument. It is anticipated that this opportunity will be continued for several cycles of the survey and provide useful information for the CPS program to improve outreach and education strategies.

NH17405B-017	Vermont Department of Health	8,000	8,000	\$405(b)

Law Enforcement Support

Law Enforcement Liaisons

GOAL: Continue to increase interest in the support of GHSPs priority initiatives. Increase LEAs participation in national enforcement campaigns to 90% by the completion of FFY 2017.

Strategies

The Law Enforcement Liaisons will provide specialized Law Enforcement knowledge, promote involvement in traffic safety initiatives, and act as a link between the State’s law enforcement agencies and the Governor’s Highway Safety Program.

Project Evaluation

The role of the LEL is to provide expert knowledge to GHSP staff and VHSA members about Law Enforcement operations and to use their vast amount of experience to facilitate communication and action between GHSP staff and the Vermont Law Enforcement Agencies. LELs use their contacts to network with their Law Enforcement Partners, and they promote and encourage the LEAs to participate and excel in the critical areas of traffic safety. LELs work with both the GHSP and the VHSA to advance highway safety programs with the goal of reducing traffic related fatalities, serious injury crashes and to promote overall safety of Vermont’s roadways.

Increasing law enforcement participation in highway safety activities and programs enhances likelihoods of achieving the State Highway Safety Office’s (SHSO) goals and objectives. Using networking and established relationships the LELs need to be prepared to lead Vermont Highway Safety partners and stakeholders through emerging issues and trends. In addition, their participation in activities generated through the VHSA ensure they are equipped to stay informed regarding state and national trends. This is done through information sharing and having immediate access to real time data that is available through the vast network of partnerships built by the LEL. Priorities of the LELs include partnering with VHSA, increasing law enforcement participation in high visibility enforcement campaigns, staying apprised of national campaigns, and the occupant protection and impaired driving task forces.

Vermont’s LELs were in a transition period during 2017, with one getting ready for retirement and another working on a part-time basis. At the end of July 2017 two contracted LELs were retained and they are looking forward to working with the GHSP, VHSA and Vermont’s LEAs. Despite this period of transition, the goal of 90% participation was nearly met as 87% of Vermont’s LEAs participated in at least one of the high visibility enforcement campaigns. In addition, 67% of Vermont LEAs participated in all four High Visibility Campaigns. For 2018 the objective of the LELs will be to attain the goal of 90% LEA participation in the National Enforcement Campaigns.

Crash Reconstruction Support

GOAL: To develop an effective cadre of troopers trained in the skills, science and technology of a crash reconstructionist in order to provide an appropriate response to each crash incident.

Strategies

Provide crash reconstructionist training and equipment to the Vermont State Police.

Project Evaluation

GHSP provided funding to aid in the ongoing education of the crash team members. There were several out-of-state trainings attended on various collision analyses, and GHSP funded three troopers to attend in the grant period.

The team averages responding to 60 serious injury/fatal collisions per year. Many calls are to assist local and county law enforcement agencies. The Crash Reconstruction team’s support in these serious crashes has improved overall traffic reporting in determining the most accurate causation of the collision. Complete and extensive investigation of traffic crashes provides the first step toward successful determination of causation factors.

GHSP funded the purchase of the software updates for the reconstruction equipment, including a Hyundai EDR Kit, the Bosch Crash Data Retrieval (CDR) software and cables that plug into vehicles.

NH17402-201	Vermont State Police	218,000	13,571.48	\$402

Work Zone Safety

GOAL: To decrease speed-related crashes in highway work zones.

Strategies

To increase enforcement of speed and distracted driving laws in select work zones across the state using grant funding.

Project Evaluation

In FFY 2017, three county sheriff departments participated in work zone safety, logging 76 hours on work zone speed and distracted driving enforcement. During these hours 96 vehicles were stopped, 73 warnings were issued, 75 speeding tickets were issued, and 13 other tickets were issued.

Project Number(s)	Subgrantee(s)	Budget	Expended	Source

Highway Safety Program Coordinators

GOAL: To ensure quality, accuracy, accountability and consistency with grants and contract deliverables which are designed to address the critical emphasis area in the Strategic Highway Safety Plan and the Highway Safety Plan.

Strategies

The designated staff is responsible for all duties related to oversight of Impaired Driving and Occupant Protection Programs including application review, programmatic monitoring, technical assistance, review of monthly and quarterly reports and analysis of grant data. The coordinators ensure quality and consistency with sub-award and contract deliverables, all of which are designed to address the critical emphasis areas in the SHSP and the HSP. The staff members ensure Federal, State, NHTSA and GHSP regulations are followed for compliance, through email correspondence, by telephone and on-site visits.

Project Evaluation

The HS Program Coordinators review and assist the sub- awardees to manage their projects effectively. For the law enforcement and equipment sub-awards, each agency’s activity was reviewed for: the monthly financial reporting and quarterly progress reports for each grant. The enforcement grants required tracking and submission of pertinent data and statistics documenting their enforcement hours, contact numbers, citations, arrests, patrol activity, etc.

Project Number(s)	Subgrantee(s)	Budget	Expended	Source
NH17402-290	HS Program Coordinators	220,000	109,251.90	\$402

Speed Enforcement

GOAL: To decrease speed-related fatalities 7.1 percent from the five-year average of 22.6 in 2010 – 2014 to a five-year average of 21.0 by December 31, 2017 as per the 2017 HSP

Strategies

Crash location maps and other data will be used to target areas and roadways for enforcement of Vermont’s major routes, consistent with the E-BE model.

Project Evaluation

The VSP targeted speed enforcement in Operation STRIVE (Safe Travel on Roadways In Vermont Everyday) over the summer months as well and Operation Safe Corridors on four interstate corridor locations. Speed trailers continue to be deployed in high speed crash locations throughout the state.

Vermont Governor's Highway Safety Program

Speed enforcement is also integrated into strategies to identify impaired drivers and occupant protection in DUI Mobilization patrols as well as Operation C.A.R.E. over the holiday periods.

State Traffic Safety Information System Improvements

AOT Crash Data Reporting System

GOAL: Crash Timeliness: Increase the timeliness of crash reports from the average timeliness of 26.86 days during the period of April 1, 2015-March 31, 2016 to 24 days during the same period ending in 2017

Strategies

Agency of Transportation (AOT) staff, Traffic Records Data Coordinator will work with the subcontractor to effectively gather electronic Crash Data from statewide Law Enforcement Agencies. This will be done in coordination with the Traffic Records Coordinating Committee (TRCC) to ensure the Timeliness, Accuracy, and Completeness of this data, and to improve the linkage of data to other statewide data gathering systems.

Project Evaluation

All Law Enforcement agencies are using Web Crash, with 100% of the crashes being reported electronically. Currently, 30 municipal agencies and 9 State Police Regional Offices are using Web Crash. Now that we have 100% of the crash data being submitted electronically, we can more effectively measure the timeliness, accuracy, and completeness of this data.

There were no expenditures on this project as the contract was not executed in FFY17.

EMS Statewide Incident Reporting Network (SIREN)

GOAL: To increase by 70% the number of Vermont based agencies submitting NEMSIS version 3 compliant data electronically in to the state Emergency Medical Services (EMS) electronic patient care (ePCR) database for the period of April 1, 2016-March 31, 2017. Currently, for the period of April 1, 2015 – March 31, 2016, 0% of VT based agencies are reporting NEMSIS version 3 compliant data to the state.

Strategies

The Vermont Department of Health’s (VDH) EMS unit is another vital source of information and data for statewide use. The Vermont Statewide Incident Reporting Network (SIREN) is a comprehensive pre-hospital patient care data collection, analysis, and reporting system. It has been in use since 2010, and 100 percent of Vermont’s EMS agencies are reporting into the system. This will be done in coordination with the Traffic Records Coordinating Committee (TRCC) to ensure the Accuracy, Uniformity, and Completeness of this data, and to improve the linkage of data to other statewide data gathering systems.

Project Evaluation

In 2017, several Vermont EMS agencies began pilot testing a new version of the SIREN system called SIREN Elite with statewide implementation starting December 15, 2016. This system upgrade will improve data collection points in several areas, including “Cause of Injury,” “Use of Occupant Safety Equipment,” “Airbag Deployments,” “Ambulance Incident (Crash) tracking,” and “Use of ACN (Auto Crash Notification) systems.

Work continues with the data integration effort between SIREN and Emergency Department Data. Hospital staff can access the EMS incidents that are transported to their facility via the SIREN Hospital Hub.

The Traffic Records Coordinating Committee (TRCC) continues to work to improve the integration of Crash Data with SIREN, and to ensure the Accuracy, Uniformity, and Completeness of this data and to improve the linkage of data to other statewide data gathering systems. The effort continues to move forward, data will become more readily available as the VDH’s Hospital Injury, Trauma Center, and Medical Examiner databases continue to grow, and the data becomes more accessible. The GHSP will continue to support and work with the EMS staff on this important data acquisition project. To date, SIREN has 100% of Vermont EMS Services Reporting (92 Licensed Services) with 89,953 electronic Patient care reports being submitted in SIREN.

TRCC Consultant

GOAL: To maintain regular and accurate compliance with TRCC and TR project reporting requirements.

Strategies

- Coordinate and attend regular Traffic Records Coordinating Committee (TRCC) meetings. Provide TRCC meeting agenda. The meeting agenda shall be provided to TRCC members via email or posted to the SharePoint site.
- Coordinate sharing safety data between the state agencies, state and local police.
- Assist in monitoring the compliance of TRCC approved statewide data improvement program.
- Assist in project prioritization using expert understanding of Vermont Traffic Records.
- Develop annual Interim Progress Report and deliver to Vermont for review at least 45 days before Application submission.
- Develop annual Section 405 grant application and deliver to the federal agency one month before the deadline. This is contingent on Vermont providing all information required for the Section 405 grant application 30 days prior to the federal agency deadline listed previously.
- Provide support in applying for other Federal Grant Applications. This item is contingent on the contractor identifying applicable grants in consultation with the TRCC.
- Provide support for Quarterly Reports to National Highway Traffic Safety Administration (NHTSA).

Project Evaluation

LexisNexis Coplogical Solutions Inc. (formerly Apriss) facilitated five meetings in FFY 2017 and also filed project updates and progress reports on the SharePoint website. They also continued to provide information and guidance regarding compliance with the federal regulations. In October through December of 2016 Traffic Records Assessment was conducted by NHTSA. Recommendations were made in January 2017 to the TRCC. The TRCC is now following up on these recommendations.

The state will be seeking post-closeout approval from NHTSA for an invoice from Lexis Nexis and with that approval the budget will be fully expended.

DPS e-Citation Implementation

GOAL: To develop and implement a statewide implement an electronic citation system.

Strategies

The Department of Public Safety in collaboration with other highway safety partners will complete a pilot of the e-citation technical solution in FY2018 based on design and development work completed in

previous years. The solution was launched in August 2016 and is being measured and reported to TRCC on a quarterly basis. This will be done in coordination with the Traffic Records Coordinating Committee (TRCC) to ensure the timeliness, accuracy, and uniformity of this data, and to improve the linkage to other statewide information gathering systems.

Project Evaluation

During FFY17, DPS finalized design details and developed a solution with a core development team consisting of DPS, Judiciary, DMV and vendors. A solution was launched in two parts, one in August 2016 and the second in November 2017. To date, over 3100 eTickets have been issued across 17 different agencies; this represents a 17% increase over the number of agencies issuing eTickets in FY16 and a 10-fold increase in number of eTickets issued. DPS holds quarterly stakeholder meetings, and provides monthly status reports for key stakeholders. The 2017 Grant Management measurements are in place and baselines/actuals have been communicated.

Horizontal Curve Data Inventory on Local Roads

GOAL: Increase the Data inventory of horizontal curves on the local road system (VTrans’ road class 2, 3, and 4) in terms of location, degree of curve, length of curve, curve radii, and types of curve. This project will also provide a level of completeness of roadway data in our data system.

Strategies

Create an inventory of horizontal curve data using GIS extracting methods. Using the Data elements available in the crash data alone, conduct a simple crash risk factor analysis on the local roads system.

Project Evaluation

This project was completed as scheduled on September 30, 2017.

The focus of this project was in developing curve data on local rural roads to facilitate systemic safety planning. This project involved extensive manual quality control review and edits of the GIS Vermont centerline data, specifically on local rural roads. It also involved the calculation of the basic curve classification and radius information to provide a curve data inventory that includes Model Inventory of Roadway Elements (MIRE) number 107 through 114, (but excludes element 111 since it cannot be derived from GIS centerline data).

Calculation of horizontal curves was performed using an ArcGIS Desktop extension developed by Works Consulting called Curve and Grade Tools for ArcGIS.

Because curve classification information has been calculated from GIS centerline geometry, the validity of the curve data is, therefore, limited to the accuracy of digitized roadway centerlines. The completeness of data extracted is regarded as 100%.

MIRE #	MIRE Element
107	Curve Identifiers and Linkage Elements
108	Curve Feature Type
109	Horizontal Curve Degree AND Radius
110	Horizontal Curve Length
111	Superelevation (Not deliverable from GIS centerline data)
112	Horizontal Transition/Spiral Curve Presence
113	Horizontal Curve Intersection/Deflection Angle
114	Horizontal Curve Direction

The final product for this project includes a database file containing three critical files:

The first of these is a simple polyline geospatial feature class representing all independent, compound, and reverse horizontal curves along the VTrans centerline. This feature class contains as attributes the Curve Identifier, Linkage Elements, Feature Type, Curve Degree and Radius, Curve Length, Horizontal Transition, and Curve Direction. The second file is a point geospatial feature class representing all Horizontal Angle Points. The third file is an Excel table containing all curve types together —Horizontal Angle Points, Independent Curves, Compound Curves, and Reverse Curves.

Traffic Records Program Coordinator

GOAL: To ensure quality and consistency with grants and contract deliverables which are designed to address the critical emphasis areas (CEAs) in the SHSP and the HSP.

Strategies

Regular document review, site visits and technical assistance with grantees and contractors: attend training for professional development, Traffic Records Coordinating Committee (TRCC) and other collaborative meetings with highway safety partners, as needed.

Project Evaluation

The Program Coordinator worked closely with our TRCC Contractor to prepare the 405C Application and Strategic Plan. Additionally, they prepared for and maintained notes for all TRCC meetings, posted documents to the TRCC SharePoint website, corresponded with member agencies, and performed general assistance for the TRA. The Coordinator managed the bid/contract process for the TRCC vendor selection for FFY18 and FFY19 implementation periods.

NH16402-300	Employee	45,000	34,525.94	\$402

Program Evaluation (Traffic Records Assessment)

GOAL: To obtain expert assessment of the strengths and challenges of one major program per year.

Strategies:

These evaluations are used not only to comply with NHTSA requirements, but to fine-tune programs and help plan resource commitments. The GHSP requested a Traffic Records Assessment for FY16. It is currently scheduled to take place during the period of October 2016 to January 2017.

Project Evaluation

A Traffic Records Assessment (TRA) was conducted from October - December 2016 to identify new measures for enhancing Vermont’s traffic records systems. This assessment measures timeliness, accuracy, completeness, accessibility, uniformity and integration of the traffic records systems six core data systems of crash, driver, vehicle, roadway, citation and adjudication, and injury surveillance. This assessment will aid in the Traffic Records Strategic Plan developed improving priorities for moving forward for the next several years.

The state will be seeking post-closeout approval from NHTSA for an invoice from Lexis Nexis and with that approval the budget will be fully expended.

Community Educational Programs

Local Law Enforcement Educational Programs

GOAL: To increase driver knowledge and awareness of occupant protection, impaired, distracted, drowsy and aggressive driving, and locally identified highway safety issues for bicyclists and pedestrians.

Strategies

To provide funding and resources to local law enforcement agencies to implement education programs focused on:

1. Traffic safety awareness to reduce speed, aggressive, distracted and impaired driving;
2. Increase seat belt use; and
3. Other traffic safety issues identified in their local communities.

Project Evaluation

In 2017 local law enforcement agencies, including the Orange County Sheriff’s, Essex County Sheriff’s, Milton Police Department, Shelburne Police Department, Randolph Police Department and the Northfield Police Department continued several successful, interactive community education activities with local driver education classes, youth bike safety rodeo, Local Safety Days, and Texting and Driver Safety awareness. Orange County Sheriff’s and the Northfield Police Department have continued to include other highway safety partners such as the Youth Safety Council of Vermont’s TOT program and the Vermont Department of Health’s child passenger safety program. Both departments continue to use social media tools such as Facebook and Twitter to publicize educational events. This has proven to be an excellent outreach tool for the local communities.

Local Motion Safe Streets Coalition

GOAL: To increase awareness of traffic safety laws and local ordinances regarding pedestrians, bicyclists and motorists and also to improve bicyclist, pedestrian and motorist behavior.

Strategies

To provide funding, resources and support that further enhance community education, outreach activities, public messaging and school and college campus educational events. Local Motion leads the Safe Streets Network, a broad-based campaign to reduce crashes, injuries, and deaths for people on foot and on bike.

Project Evaluation

For FFY 2017, Local Motion reached and exceeded the majority of their education and outreach goals in Vermont. This included two bike safety presentations designed for college students that had over 200 young adults in attendance, over 6,000 children trained in bike safety skills and over 1,000 helmets distributed to youth/teens/young adults. In addition, over 7,000 safety informational brochures were distributed state-wide. It has been recognized that parent education as a “habit building” tool for youth, and they continue to expand their distribution opportunities as community partnerships continue to grow and move forward. Local Motion recognized that parent/child education isn’t enough, and other audiences need to be targeted as well. Over 160 law enforcement officers were trained in strategies for using law enforcement to improve walk-bike safety, and more than 350 bike lights were distributed to high-risk groups, such as nighttime riders without lights and college students. A series of adult programming is in place, called Everyday Bicycling, which educates adults on how to ride bicycles safely while on our shared roadways.

This program has a community engagement platform, which has already accelerated the capacity of the organization to coordinate community groups statewide, identify potential safety ambassadors, and strengthen the network of safe streets partners. Local Motion has already leveraged this platform to create an engagement tool for Shelburne and Middlebury. This tool has also increased engagement in our safety outreach, and provided an excellent vector for distributing safety materials.

2017 Local Motion Safe Streets Coalition

Vermont State Police Educational Program

GOAL: To provide highway safety presentations statewide in the jurisdictions served by the Vermont State Police (VSP) to address the identified highway safety issues including, high incidence of DUI’s, lower than average seat belt usage rate, and bike and pedestrian hazards.

Strategies

To provide funding, resources and support to the Vermont State Police to aid in their educational effort focused on the critical and significant emphasis areas outlined in the Vermont SHSP. VSP will administer interactive presentations at schools (age and audience specific) and at community events to reach broader public audience. One focus in FFY17 is targeted teen driver education classes with emphasis on alcohol impairment, speeding, distracted driving, occupant protection and motorcycle safety. The interactive presentation is built by the respective agency, they include a PowerPoint, rollover demo, mock crashes, impaired vision goggles, and other highway safety presentations. Evaluation tools such as pre-and post-surveys are used. FFY2018 includes seven to nine agencies.

Project Evaluation

The Vermont State police participated in a number of public speaking traffic safety events during the year. Events were held for Car Seat Safety Schools, Drivers Ed classes, Lake Monsters Games and the Champlain Valley Fair. The grant was also used as part of the ‘Drug Impaired Training for Educational Professionals’ program. Events were evaluated by the participating troopers to assess the effectiveness of the project.

Grant funds supported the purchase of education messaging materials for these events, which included the message “Choices Matter”. Other items distributed were brochures, highway safety coloring books and handbooks. Additionally, three upright/expandable type boards were purchased with interchangeable highway safety messaging.

Community Justice Network for Vermont (CJNVT) Safe Driving Program

GOAL: To increase knowledge and awareness of the lifelong impact of impaired driving fatalities and injuries.

Strategies

To provide funding to the CJNVT to implement a six-hour behavior-change curriculum (including live/video presentations by those harmed as a result of DUI crashes) provided to community supervised DUI offenders (required).

Project Evaluation

Two new sites were fully trained in 2017 and Rutland County began to deliver classes. This met our goal to have the Safe Driver program available in all counties in Vermont delivered at least four times a year. The St. Albans site has adjusted the program length and content to adhere to the recommendations from the April 2017 workshop and Bennington will have made the transition by the first course offering in January 2018. The Safe Driving Program is now offered as part of Community Justice Network of Vermont's statewide programming. The program manager, with the assistance of two coordinators has continued to support the program facilitators to deliver quality program by visiting, training and problem-solving with them. There have been site visits to all 14 programs to review Safe Driving data, the curriculum, and to help with transition from Probation and Parole. Some recommendations for potential group activities for the Safe Driving plan were identified and will be piloted by the Chittenden County Safe Driver facilitators.

CJNVT has phased in a standard fee for the program so the Safe Driver program is universally available in Vermont and so there is not a geographic disparity in fees charged. A memo was sent and shared by Probation and Parole to all field offices, so the information is shared to clients.

The annual Red Ribbon Ceremony was held at the Statehouse December of 2016 in commemoration of those impacted by DUI throughout the year. This event was well attended by multiple Law Enforcement as well as the GHSP staff.

NH17402-425	Community Justice Network of Vermont	20,000	14,544.54	\$402

Youth Safety Council of Vermont

GOAL: To educate teen drivers about the hazards of texting while driving.

Strategies

Provide funding, resources and support for the YSC to utilize the DMV golf-cart "Turn off Texting" curriculum/course and an educational project of interactive presentations at teen drivers' education classes at schools statewide.

Vermont Governor's Highway Safety Program

Project Evaluation

Priority activities for FFY2017 included the following:

- > During the FFY17 grant, the Turn Off Texting (TOT) course was scheduled at 54 sites across Vermont during the grant term. The program is increasingly well received, in demand and provides great media opportunities to help create awareness for the driving public.
- > The TOT program conducts regular surveys during its training. In FFY 2017, a total of 875 pre-and post-surveys completed and tabulated. Surveys are given before and just after the intervention to measure the effectiveness of the program in changing students' awareness and behavior. No statistical data was recorded from the pre and post surveys, in the next fiscal year this will be required as a measurement tool to assess the program.
- > During this period, the YSCVT piloted a mid-winter TOT presentation that were not weather dependent, using a mobile classroom that travels to high schools. This abbreviated program was received positively by driver educators and has been sought-after since.

2017 YSC of Vermont	
Number of TOT sites conducted	54
Total TOT student contacts	875

Workplace Traffic Safety Program

GOAL: To improve knowledge and awareness of safe driving through employer/workplace education.

Strategies

To fund, support and provide resources to the Associated General Contractors of Vermont (hereinafter "AGC"), to implement the Project RoadSafe program. AGC sponsors statewide and regional workforce safety forums and conferences and, conducts employer worksite requested presentations that provide education/training and materials on highway safety. They also offer the NSC certified Alive@25 course at Vermont's technical career centers.

Project Evaluation

AGC reported involving more than 3200 people of all ages in various RoadSafe activities. This extensive activity ranged from participation in trade shows and conferences (600+) to workplace safety trainings (600+) to classroom driver training safety presentations (1200+). RoadSafe was also involved in several other activities to, include; Regional Planning Commission forums, the Drivers Education Summit presented by the Vermont State Department of Motor Vehicles Division, as well as several at company safety day events.

Vermont Governor's Highway Safety Program

AGC continues their work with the National Safety Councils course, "Alive@25." This course was offered at a special Safety Summit at Mt. Abraham Union High School in Bristol, VT, as four, one-hour defensive driving classes for more than 60 students. In addition, AGC staff conducted the four-hour course, "DDC-4 defensive driving", with more than 60 employees from several different companies successfully completing this course.

AGC Staff participated in the annual rotation of statewide safety conferences for the public and private trade and business sectors providing driver safety materials and several driver safety mini-training sessions for hundreds of attendees. The Project RoadSafe eNewsletter continued its semi-monthly distribution while posting relevant driver safety information and a regularly updated training schedule and other information on the AGC website.

Project RoadSafe continues data review collaboration with Workers Compensation and Safety Division of the Vermont Dept. of Labor.

NH17402-419	Associated General Contractors of Vermont	116,185	114,782.17	\$402

Teen Driver Educator Summit

GOAL: To provide continuing education for Vermont's school based and driving school instructors.

Strategies

To provide funding, resources and support for presentations, workshops and demonstrations available to enhance teen driver education instruction statewide. Driver Educators will be given strategies as to how to present the importance of occupant restraint usage, not driving impaired, and reducing speed and aggressive behavior when behind the wheel of a motor vehicle.

Project Evaluation

The fifth annual Teen Driver Education Summer Summit, EDUCATION – ENFORCEMENT – ENGINEERING- EMS → ZERO DEATHS, was held on July 27th, 2017 at the Holiday Inn in Rutland. This summer conference was a collaboration between the GHSP and the Department of Motor Vehicles. It was designed to provide a full day of professional development credit in order to enhance the skills of all Vermont driver educators. Approximately 85 participants attended. The Director of the Department of Motor Vehicles Enforcement Unit gave a legislative update. The day included a motivational speaker with a positive message for educators to start out the new school year concerning perspective, purpose, and persistence. This positive message was followed by an outdoor activity given by LT Giolito from DMV enforcement demonstrating the procedures involved in a traffic stop as he pulled over, and processed, the driver training coordinator in her personal vehicle. Time was also given for a question and answer period for all educators. Roundtable presentations were given by driver educators at three different times throughout the day where various activities were shared with fellow driver educators concerning different units of instruction, and activities to be used in the classroom, behind the wheel, and during observation times. Projects that have been done with students were also shared during the roundtable presentations. All of these activities were

Vermont Governor's Highway Safety Program

provided to all participants in the form of a lesson plan booklet in order to take home and freshen up driver education programs with new ideas. A Rutland Regional Ambulance representative, Mike Tarbell, gave a presentation inside concerning Responding to Emergencies and the Move Over Law, and Vermont Electric's Dave Roberts, gave a presentation on the use of electric cars as well. Both of these presenters also provided their vehicles in an outside demonstration. Driver Educators were allowed to test drive four different electric vehicles that day.

Community Programs Coordinator

GOAL: To ensure quality and consistency with grant and contract deliverables which are designed to address the critical emphasis areas in the SHSP and HSP.

Strategies

Regular document review, site visits and technical assistance with grantees and contractors; attend trainings for professional development and collaborative meetings with highway safety partners.

Project Evaluation

This full-time staff position is split between Community Education, Drug Recognition Expert (DRE) program and Contract Management. Community education responsibilities involve management and monitoring of the education grants, review grant reports and activities, and related contracts for education events and public education materials. Site visits were conducted as necessary. Grant application workshops were conducted for the 2017 grant cycle. Regular communication was maintained from start to finish with partners and contractors.

There has been a change in personnel, one of the coordinators has been in this position for less than a year and is still learning the program and her responsibilities. The program coordinators work well within the program and are valuable assets to highway safety community in Vermont.

NH17402-400	Community Programs Coordinator Employee	50,000	43,798.96	\$402

Vermont Governor’s Highway Safety Program
Law Enforcement & State and Local Partners Highway Safety Training Programs

GOAL: To provide financial resources to enable highway safety partners to attend in-state and out-of-state trainings which promote NHTSA’s traffic safety priorities.

Strategies

Traffic safety training is continually evolving and at times there’s not enough lead time to incorporate these trainings into the state’s Highway Safety Plan. This project earmarks funds for such trainings and allows opportunities to participate which is beneficial to the core mission of the state’s highway safety program.

Project Evaluation

In the 2017 Highway Safety Plan a second countywide SHARP program was created to include all law enforcement agencies in Rutland County. The Rutland County Director of this project is Lt. Kevin Geno of the Rutland County Sheriff’s Department. Lt. Geno was sent to a NHTSA grants management training program in Rhode Island in June. This training prepared Lt. Geno for the position as director of a countywide Safe Highway Accident Reduction Program (SHARP) implemented in Rutland County where the agencies are coordinated under a single grant. The program director provides the team with a cohesive approach and consistent oversight. The director tracks and assesses productivity and progress through monitoring of activity reports and ensures compliance of state and federal guidelines.

A limited number of funds were expended in FFY 2017 as this fund is subject to requests received from our partners.

Lifesavers Highway Heroes Awards

GOAL: To provide recognition to those individuals and organizations that provided support, guidance and leadership with the “four E’s” of highway safety.

Strategies

GHSP hosts an annual awards ceremony to officially recognize those individuals and organizations displaying extra effort and energy promoting the GHSP Highway Safety priorities during the past year. The gathering encourages networking and relationship-building between diverse highway safety advocates.

Vermont Governor's Highway Safety Program

Project Evaluation

In 2017 the "Lifesavers Highway Heroes Awards" were announced at the VHSA Annual Meeting. These award recipients were chosen utilizing a defined criterion; *Lifesavers Highway Heroes* event awards were given in the categories of Enforcement, Engineering, Education, and Emergency Services.

NH17402-421	Various Vendors	16,000	294.60	\$402

Attitude Survey

GOAL: To sample self-reported media message awareness, attitudes and behavior about traffic safety topics.

Strategies

To survey and analyze public attitudes and knowledge of highway safety.

Project Evaluation

The Center for Research & Public Policy (CRPP) conducted an online survey from July 26, 2017 – August 10, 2017 and presented the results in September 2017. The survey was conducted among licensed drivers throughout the State of Vermont. The 2017 survey replicated most of the questions held in surveys conducted between 2010 and 2016. The survey was designed to provide resident input on law enforcement, personal driving behavior and awareness of the Governor's Highway Safety Program messages.

The research study included a comprehensive online survey. For tracking purposes, The Vermont Agency of Transportation and CRPP utilized many of the same questions posed in the 20010-2016 survey. Questions on pedestrian activity/concerns were added in 2016 and continued into 2017. Several new bicycling / bicycling safety questions were added in 2017. The Attitude Survey link was added to the GHSP website.

Motorcycle Program

State Motorcycle Rider Education Program

GOAL 1: To maintain motorcyclist fatalities at or below a five-year average of 8.0 or lower (2010-2014 average is 7.8) by December 31, 2017.

GOAL 2: To maintain the number of un-helmeted motorcyclist fatalities below the five-year average of 1.2 in 2010 – 2014 by December 31, 2017

Strategies

Provide funding for Department of Motor Vehicles (DMV) rider education courses for first-time riders and advanced skills development; share the Road radio messages, social media rider safety messages and annual national RiderCoach train-the-trainer opportunities for the program administrator.

Project Evaluation

During the program's 2017 training season 954 students attended courses at the eight training sites (96 courses); 856 successfully completed. Many students wish to take the course early in the training season in order to have more riding time available.

Training includes exercises designed to teach the basics of motorcycle operation and work on enhancing skill levels. The program also includes discussions on wearing proper riding gear (DOT helmet, eye protection, full fingered gloves, motorcycle riding jacket and pants, and over the ankle footwear), the risks associated with using drugs or alcohol while riding, and how to be visible to other motorists. The program also offered experienced RiderCourses, which are designed for individuals that already have some experience riding a motorcycle and are looking to improve their riding skills. There are eight training sites around the state. A rider course instructor training was also offered. In addition, regular media messaging aired during the motorcycle riding season.

In 2017, the program purchased 32 new motorcycle helmets to replace the helmets at the program's two Colchester training locations. In the spring of 2017, the Vermont DMV Rider Education Program updated the curriculum used to train riders with some on-road experience to the Motorcycle Safety Foundation's revised Basic RiderCourse Level 2 (BRC2u) curriculum. Once training was completed three of the program's eight training locations were remarked for the BRC2u. The five-year average in 2017 was 9.8, a 4.25% increase. The state did not meet its goal of maintaining its goal an 8.0 motorcycle fatality rate. The GHSP will continue its efforts to maintain a low fatality rate by the following:

1. educating on Motorcycle awareness and Occupant Protection;
2. renewing our commitment to motorcycle safety programs;
3. dangers of motorcycling and speed;
4. educating the entire motoring public to be aware of motorcyclist on the road; and

Vermont Governor's Highway Safety Program

5. re-commitment to an aggressive motorcycle safety and awareness media campaign.

Year	Motorcyclist Fatalities	5-Year Average
2009	8	9.2
2010	6	7.6
2011	8	7.2
2012	11	8.0
2013	7	8.0
2014	7	7.8
2015	11	8.8
2016	11	9.4
2017	13	9.8
Projected 2018		10.5

Evaluation/Progress

The 2011–2015 five-year moving average is 1.2. 2016 is showing 1 un-helmeted motorcyclist fatality at this time. The state met its goal of having a five-year moving average of 1 and we attribute that success to aggressive media, educational outreach, and enforcement efforts. The GHSP will continue to educate on Motorcycle awareness and Occupant Protection, along with support for motorcycle safety programs, and increased funding for an aggressive media messaging campaign is in place for FFY18.

Year	Helmet Improperly/Not Used	5-Year Average
2009	2	1.8
2010	1	1.8
2011	1	1.2
2012	2	1.2
2013	2	1.6
2014	1	1.4
2015	0	1.2
2016	1	1.2
2017	1	1
Projected 2018		1

Paid Media

Alcohol and Impaired Driving

Sports Marketing Campaign

GOAL: To increase the public awareness of impaired driving with messaging at sporting events.

Strategies

Provide educational information regarding the hazards of alcohol impaired driving at sporting events held across the state.

Evaluation

The Sports Marketing Program used the highway safety message, Drive Sober or Get Pulled Over or Choices Matter in places where sport fans congregate so they are reached audibly through public address announcements, visually through venue billboard signs and website banners, and interactively by having an on-site presence at the venue to connect with fans in a personal manner, by signing a designating driver pledge.

Alliance Sports ran the campaign at the following venues at 2017: Vermont Lake Monsters Baseball in Burlington, University of Vermont Hockey in Burlington, University of Vermont Basketball in Burlington, Bear Ridge Speedway in Bradford, Devils Bow Speedway in Fair Haven, Thunder Road International Speedway in Barre and High schools, statewide.

Strike Out Drugged Driving Campaign

GOAL: Broadcast "drugged" impaired driving messaging to baseball fans throughout the state of Vermont with an estimated delivery of 2,500,000 impressions. Deliver over 1,500,000 guaranteed online impressions through video and display marketing to Vermont over the course of the program.

Strategies

Educate Vermont residents on the dangers and consequences of "drugged" impaired driving through a multi-platform outreach and awareness campaign.

Vermont Governor's Highway Safety Program

Project Evaluation

The campaign significantly over delivered by over 1,000,000 impressions as the program delivered a combined total of 2,582,282 impressions. Of those impressions 1,474,943 were display, 1,107,339 were video impressions.

The Strike Out Drugged Driving program focused on creating awareness and educating Vermont motorists on the dangers and repercussions of "drugged" impaired driving. Media platforms for connecting these messages with the intended audience are as follows:

:30 Radio Spots on all Vermont based Red Sox Radio Network stations.

- › WWOD 93.9 FM Woodstock
- › WSTJ 1340 AM St. Johnsbury
- › WIKE 1490 AM Newport
- › WDEV 550 AM Waterbury
- › WLVB 93.9 FM Morrisville
- › WCPV 101.3FM Burlington
- › WSYB 1380 AM Rutland
- › WCVR 1320 AM Randolph
- › WDEV 96.1 FM Waterbury

With the great public safety message that was offered through Vermont Highway Safety's creative. The Red Sox Radio Network delivered this message to all of its radio stations throughout New England at NO ADDITIONAL COST to Vermont Highway Safety. In addition to the 9 Vermont stations listed above the message was delivered across 13 Massachusetts stations, 13 Maine stations, 12 New Hampshire stations, 5 Connecticut stations, 2 New York stations, and 1 Rhode Island station. Reminding Red Sox fans throughout New England to be safe on the roadways and Vermont's commitment to safe driving.

: 15 second online video pre-roll messaging featuring Vermont law enforcement.

Developed an online video featuring GHSP representatives and/or Vermont Law enforcement discussing the dangers and consequences of "drugged" impaired driving.

These videos were delivered online specifically targeting those who have engaged with marijuana, drugged driving and other similar messaging.

DUI Labor Day

Goal: To communicate Vermont's impaired driving laws; increasing the public perception of the risks of detection, arrest, prosecution, and sentencing due to impaired driving.

Primary Target Audience: Adults 18-34 (skewed slightly toward men)

Campaign Parameters: August 14 - September 4, 2017 (in accordance with the NHTSA Communications Calendar)

Communication Channels: Television | Radio | Internet

Vermont Governor's Highway Safety Program

Media Strategy

Utilized three: 15 newly produced video assets for placement on television and across the most widely used digital channels. Expanded reach of the target audience was gained through the use of traditional and internet radio as well as Facebook.

Media Tactics

Medium	Programming
Television	Place television spots primarily in prime-time programming (44%) and sports (16%).
	 <p>:15 Mom's Night Out/Plan Ahead</p>
	 <p>:15 Game Night/Plan Ahead</p>
	 <p>:15 Dinner Party/Plan Ahead</p>
<i>Est. Added Value</i>	<i>Additional no charge spots were negotiated due to GHSP non-profit status equating to 583 spots or \$9,328 in added value</i>
Radio	Placed ads on stations where ratings indicate Adults 18-34 are most likely to be listening, like country and rock formatted stations. Spots were placed Monday – Friday 6a-7p and on the weekends 10a – 7p. One free spot was provided by most of the stations for every three spots purchased. Weather and/or news billboards were also negotiated as added value.
<i>Est. Added Value</i>	<i>An additional 868 spots were included for a total of \$8,816.20 in added value (an additional 42% more in spot placement value).</i>
Internet	<p>Purchased video ad placements on AdDaptive (ad network), YouTube and Xfinity (streaming and VOD) to expand reach.</p> <p>Audio ad placements were made on Pandora which included banner ad placements at no charge.</p> <p>Placements were made on FACEBOOK to run as newsfeed ads in profiles matching the target audience Some targeting included Facebook interests in concerts, parties, bars, nightclubs, drinking games, and alcoholic beverages.</p>
<i>Est. Added Value</i>	<i>Utilized client non-profit status to negotiate</i>

Impaired Driving Countermeasures

High Visibility Alcohol Enforcement and Support Equipment

GOAL: To reduce the number of impaired driving fatalities.

Strategies

Conduct high visibility impaired driving enforcement details, supported by effective equipment.

Project Evaluation

Driving under the influence of alcohol remains a major contributing factor in many of the state's fatal crashes. With many small law enforcement agencies (LEAs) in Vermont, there are limited resources to pay for costly law enforcement activity and the equipment necessary to assist officers engaged in impaired driving enforcement. Approximately 80% of the state's LEAs employ fewer than 24 full-time officers, and low staffing levels frequently impact an agency's ability to participate in High Visibility Enforcement (HVE) mobilizations and ongoing sustained enforcement. This project supports LEAs with the opportunity to increase enforcement on the roadways, and to upgrade equipment that is used in HVE campaigns and ongoing sustained enforcement.

Participating LEAs must agree to work cooperatively with nearby agencies to conduct a minimum of one joint sobriety checkpoint during national mobilizations such as the Drive Sober or Get Pulled Over campaign. These participating LEAs are also encouraged to team up with neighboring agencies to work multi-agency saturation patrols. In addition, LEAs use their grant funds for ongoing DUI enforcement and directed patrols within their respective areas of responsibility, utilizing their own crash and DUI arrest data to determine locations for increased enforcement. Finally, there are regional DUI Task Force teams, modeled after the Click It or Ticket task force, in which teams of specially selected officers work together to target geographic areas across the state. These officers are recruited from LEAs throughout the state and must demonstrate proficiency in all phases of DUI enforcement. These target areas are identified using crash and DUI arrest data provided by the State Highway Safety Office. This increased enforcement model is especially useful during holidays and other special days that historically have seen increased rates of drunk driving crashes, such as St Patrick's Day, Super Bowl Sunday, and other local high-profile community events.

LEAs which have demonstrated active participation in national and state-initiated impaired driving enforcement campaigns, are afforded the opportunity to obtain traffic safety equipment items that are directly related to improving the efficiency and effectiveness of their DUI enforcement activities. This equipment includes but is not

Vermont Governor's Highway Safety Program

limited to; portable breath testing equipment and related supplies, checkpoint lighting and sign packages, traffic cones/flares, reflective traffic vests, and high visibility rechargeable flashlights.

During FFY-2017 Vermont required its grantee LEAs to participate in two impaired driving (Drive Sober or Get Pulled Over) national mobilizations, the first occurring between December 14, 2016 and January 1st, 2017, and the second occurring between August 16 and September 4, 2017. LEAs that do not receive grant funding are also encouraged to participate in these mobilizations, however they are ineligible to receive grant-funded equipment support. During the December mobilization 70 LEAs participated in the campaign, of which 55 LEAs participated to a sufficient degree to qualify for equipment support. During the August mobilization 61 LEAs participated in the campaign, of which 45 LEAs participated to a sufficient degree to qualify for equipment support. These participating agencies included 42 of Vermont's 55 municipal police departments, all 14 county sheriffs' departments, all 11 of the Vermont State Police stations (including the Headquarters traffic safety unit), three town constables, the enforcement divisions of the Departments of Motor Vehicles and Liquor Control, and the University of Vermont Police Services.

When the DUI Task Force project began several years ago it was with four regional teams: South (Bennington and Windham Counties), Central (Rutland and Windsor Counties), Northwest (Chittenden, Addison, Franklin, Grand Isle, and Lamoille Counties), and Northeast (Washington, Orange, Caledonia, Orleans, and Essex Counties). During 2017 however the Southern and Northeast teams struggled with a lack of team leadership and LEA participation. This is partially attributable to the fact that 2016 and 2017 were transition years for Vermont's Law Enforcement Liaison staff who are responsible for promoting this project.

The Northwest DUI Task Force conducted eight enforcement details in 2017 while the Central Task Force conducted seven. Twenty-four agencies contributed officers to these task force details, including 14 municipal police departments, five county sheriffs' offices, four state police stations, and one town constable. Dates selected for these enforcement details included New Year's Eve, Super Bowl Sunday, Mardi Gras, St Patrick's Day, July 4th, Labor Day weekend, Halloween, and Thanksgiving, as well as several local fairs, field days, and festivals. The Northwest and Central DUI Task Forces work in conjunction with the Chittenden and Rutland County Safe Highway Accident Reduction Program (SHARP) teams respectively.

This three-pronged approach (LEAs utilizing grant funding to conduct sustained and ongoing DUI enforcement within their own area of responsibility, agencies working with neighboring jurisdictions to conduct joint checkpoints and saturation patrols, and the activities of the regional DUI Task Force teams) delivers a strong message throughout the state that Vermont has a zero-tolerance policy with regard to impaired driving. Vermont continues to use and promote the national campaign message of Drive Sober or Get Pulled Over.

Countywide Safe Highway Accident Reduction Program (SHARP)

GOAL: To identify and prioritize critical targeted areas countywide so that officers can be deployed, and resources directed to high risk areas with a cohesive strategy and consistent oversight.

Strategies

Address the ongoing highway traffic safety mission through implementation of a countywide project to consolidate law enforcement agencies into an umbrella sub-award (a unified SHARP team) as a single grant project with sub-awardees. The project will include a countywide Program Coordinator who will organize, supervise, and promote enforcement as well as plan and implement educational activities. In addition, the coordinator will facilitate and supervise OP and DUI enforcement activities and funding for combined countywide sub-awards.

Project Evaluation

This countywide approach to traffic enforcement in Vermont' two most populated counties has proven to be very effective. The model is described in the 2017 H/S Plan, but briefly, Vermont's Highway Safety Office has awarded both Occupant Protection and DUI enforcement funds to the Project Coordinators in both Chittenden and Rutland County. The Coordinators are full-time certified police officers in Vermont that have proven to be highway safety champions for years. They have organized all of the law enforcement agencies in their county to work together to combat the problems of Speeding, Distracted/Aggressive Driving, Impaired Driving and failure of drivers and passengers to wear safety restraints. These participating agencies have pledged to participate in every enforcement action scheduled by their local Coordinator. In addition, they have the approval of their Chief or Sheriff as well as that agency's town or city government to develop this project in their respective counties.

Besides having well-staffed, very visible and very well-organized patrols, the Coordinators are an active part of each patrol. Consequently, the result is close supervision of the patrol team with accurate and timely reporting of grant funds used and the productivity generated.

In addition, each participating agency has a smaller portion of the total countywide enforcement grants, (O/P and DUI) to use in their respective community for special events or local and/or emerging traffic problem areas.

Impaired Driving Project Manager

GOAL: To create a central point of access, control, management and correlation of all DUI related activities that occur within the state.

Strategies

To provide a statewide liaison to develop one central repository for all data and information relating to DUI enforcement, outreach, technology and training. The coordinator would ensure continued development, evolution and efficiency of Vermont's DUI programs.

Project Evaluation

The Impaired Driving Project Manager (IDPM) works closely with staff from the Governor's Highway Safety Program, National Highway Traffic Safety Administration Region 1 staff, the Traffic Safety Resource Prosecutor, the Drug Evaluation and Classification Program Manager, the Vermont Criminal Justice Training Council, law enforcement partners, driver educators, Department of Motor Vehicles staff, the American Automobile Association, the American Association of Retired Persons, the American Association of Motor Vehicle Administrators and numerous others, on increased awareness of impaired driving issues.

The IDPM was the chairperson of the Vermont Highway Safety Alliance (VHSA), a public/private partnership of nearly sixty organizations who want to make our highways safer and reduce major crashes. These partners include federal, state, county and local governmental entities, as well as members from the private sector. The IDPM authored the strategic plan titled "Blueprint for Driving While Impaired Enforcement, A Guide for What Vermont Can Do". The VHSA uses crash data to identify Critical Emphasis Areas in the State's Strategic Highway Safety Plan. One of the seven Critical Emphasis Areas of the Strategic Highway Safety Plan is to Reduce Incidents of Impaired Driving.

Strategies Under this CEA are:

1. Improve public awareness of what impaired driving is and its associated dangers
2. Regularly update and promote programs for consistent education for individuals and organizations charged with addressing impairment issues
3. Increase and enforce penalties for impaired driving with a streamlined approach to enforcement
4. Continue updating and implementing programs for impairment analysis and rehabilitation
5. Increase training for law enforcement officers to assist them in detecting incidents of Driving While Impaired by Drugs
6. Support a more efficient means of collecting evidentiary samples in Driving While Impaired by Drugs cases

Vermont Governor's Highway Safety Program

7. Support expansion of use of Ignition Interlock Devices by all DWI Alcohol offenders
8. Increase offender accountability and rehabilitation through DWI Courts and 24/7 Programs

The IDPM worked on planning for the 2017 annual conference for the VHSA that included a presentation on the South Dakota 24/7 Project. The 2016 annual conference had over 100 highway safety partners in attendance and addressed issues on impaired driving.

The IDPM works with media outreach on impaired driving issues including interviews on statewide television programs, local cable television and radio, to include a broadcast from Fenway Park on August 5 from New England based radio station WEEI.

Vermont Police Academy Impaired Driving Training Coordinator

GOAL: To hire a full-time Impaired Driving Training Coordinator in FFY 2017 to enhance the quality and the number of training opportunities offered for basic DUI enforcement courses, Advanced Roadside Impaired Driving Enforcement (ARIDE), Standardized Field Sobriety Testing (SFST) and to provide oversight of the State's Drug Recognition Expert (DRE) Program.

Strategies

The GHSP provided funding, job expectations, and assistance with the Request for Reclassification (RFR) to the Vermont Criminal Justice Training Council (VCJTC).

Project Evaluation

After an extensive search, in August of 2017, a new coordinator was hired, and the duties are transitioning from GHSP and VSP to the VCJTC.

NH17405D-013	Vermont Police Academy	75,000	9,376.96	\$405(d)

Impaired Driving Training Programs (DRE, ARIDE, SFST)

GOAL: The VCJTC will enhance the quality and the number of training opportunities offered for basic DUI enforcement courses, ARIDE, SFST and to provide oversight of the state's DRE Program.

Strategies

The GHSP provided resources to the VCJTC to fund the Impaired Driving Training Coordinator. The training coordinator will assist in the statewide coordination and oversight of initiatives and efforts within the impaired driving countermeasures and other assigned program areas within the GHSP Highway Safety Plan. Participates as an active member of the Vermont Highway Safety Alliance (VHSA) "Impaired Driving Task Force" and attends meeting with impaired driving task forces and other work groups. Provides coordination for impaired driving related training, equipment and other support activities to include Drug Recognition Experts (DRE), Standard Field Sobriety Tests (SFST), Advanced Roadside Impaired Driving Enforcement (ARIDE), courtroom testimony and report writing. Participates in the selection of DRE, ARIDE and SFST instructors. Reviews and interprets local, state and national Traffic Safety data and schedule, presents and directs information to relevant staff/partners. In coordination with the GHSP, works with the State DRE Coordinator, Traffic Safety Resource Prosecutor (TSRP), Judicial Outreach Liaison (JOL) and legislature to advance Impaired Driving legislation. Assists GHSP Law Enforcement Liaisons (LEL) in coordination of required resources for all impaired driving related field activities throughout the state.

Project Evaluation/Training Programs

Due to the extended state approval process the position wasn't filled until August of 2017. The training coordinator has been in the position for a limited period of time, becoming acclimated with the programs and the facilities, thus evaluation data is limited.

Project Evaluation/DRE Program

Due to the late calendar year hiring of the training coordinator, the GHSP and VSP managed the program.

Vermont's cadre of DREs is currently at 52. Vermont held an August 2017 class and trained fifteen (15) new DREs. In addition, five prosecutors and one forensic lab staff member also participated in the entire course curriculum, including the field certification training in Phoenix, AZ. Two DREs have achieved their instructor rating in 2017, making five DRE instructors available in Vermont.

ARIDE training is a very effective recruitment tool for the DRE program and is now mandatory for every new certified law enforcement officer in the state. Many potential candidates have been introduced to the DRE program via the two-day ARIDE training. The DRE program has also benefited from providing Drug Identification Training for Driver Educational Professionals (DITEP) to almost every school district in the state. The DRE program will continue to expand in response to the state's growing opioid

Vermont Governor’s Highway Safety Program

issues and that relationship to impaired driving. Six regional ARIDE classes were delivered throughout the state.

DREs continue to use issued tablets to perform evaluations electronically and collect additional data that has not been collected in the past. This will help improve the quality of data to determine more accurate locations of when and where evaluations are being conducted as well as crash type involvement.

Vermont has completed a yearlong oral fluid pilot program on the use of oral fluid (saliva) drug testing for both roadside and evidentiary samples. There is pending legislation to allow oral fluid samples to be collected at roadside and for evidentiary purposes.

DUI Court Windsor

GOAL: To enhance public safety by using the highly successful Drug Court model that uses accountability and long-term treatment to change offender behavior.

Strategies

To have regular court team meetings for continuous review, planning and implementation of all phases of the DUI Court process, evaluation and specialized training opportunities. The DUI Court is an accountability court dedicated to changing the behavior of high-risk DUI offenders.

Project Evaluation

The Windsor County DUI Treatment Docket (WCDDT) continued to increase alignment with best practice standards. Positive outcomes this year include: conducting DUI Court-specific screenings; implementing increased urinalysis (UA) testing; strong team communication and collaboration; and ongoing team training. Challenges this year included: impacts due to transitioning team members, including a new Judge, State's Attorney, and coordinator; unexpected and ongoing delays with the UA provider establishing best practice procedures; and delayed progress in development of a community partnership group.

In FFY2017, the program had fourteen (14) referrals, seven (7) of whom were discharged from the program, seven (7) who are currently active in the program, and one (1) currently in orientation. We anticipate nine (9) graduates for FY 18 as the program has a minimum seventeen-month duration. The average length of time from

Vermont Governor’s Highway Safety Program

citation, to appear in court, to referral into the WCDDT was 2.10 months. This represents a 5.83-month decrease over FY16.

GHSP has had meetings with the program to facilitate transition to a state funded activity.

DUI Court Implementation – Statewide - Vermont Law School

GOAL: To reduce recidivism by expansion of availability of DUI Courts statewide.

Strategies

Statewide education, outreach and training with states attorneys, courts personnel, policymakers and allied stakeholders.

Project Evaluation

FFY 2017 saw important progress toward expanding the DUI treatment court model. Most significantly, the Vermont House Judiciary Committee unanimously approved H.213, a bill that would create a statewide funding source for treatment courts and would establish Vermont’s first mobile treatment court to service multiple counties. Unfortunately, this bill stalled at the end of the legislative session and awaits further review starting in January 2018.

The Windsor County DUI Treatment Court continues to change lives and improve public health and safety. Its challenges for the upcoming year include the training of a new court coordinator, adjusting to judicial rotation and a new presiding judge, and finding secure sources of sustainable revenue.

NH17410-025	Vermont Law School	68,411	66,172.05	\$405(d)

Traffic Safety Resource Prosecutor (TSRP)

GOAL: Maintenance of progress to date in improving and enhancing enforcement of impaired driving laws in Vermont. Adaptation of existing enforcement tools and capabilities to meet the changing landscape of DUI enforcement.

Strategies

Utilize the TSRPs for the support of the state’s impaired driving programs.

Project Evaluation

The longtime person in this position left state employment in March of 2017. A replacement started in the position late in the calendar year. The 2017 Federal Fiscal Year saw the TSRP challenged by the increase in Drugged Driving cases and the litigation and laboratory services they require. Demand for TSRP services among prosecutors continues to be high. In addition to litigating multiple cases throughout the state, the TSRP represented the state in multiple appellate cases before the Vermont Supreme Court. The TSRP continues to field multiple daily requests for advice and counsel from fellow prosecutors and law enforcement officers. These requests are in addition to providing several hours of annual instruction to cadets enrolled in the Academy. The TSRP is aiming to implement additional refresher training DUI training for LEOs who have been on the road for two plus years. Additionally, the TSRP is aiming to create a training for prosecutors regarding litigation of DUI alcohol and DUI drug cases. The TSRP also provides instruction to DREs and continues to be a member of the DRE oversight committee, as well as a liaison to policymakers who require assistance in identifying and defining legal issues they encounter in their work. It is expected that the upcoming legislative session will focus on several laws of critical importance to highway safety and DUI that will require TSRP input and analysis.

The 2017 Department of States Attorney Annual Meeting was held May 31 – June 2. A variety of highway safety training topics were covered to educate attendees on a prorated basis.

Forensic Laboratory Support Program

GOAL: To strengthen Vermont’s drugged driving blood sample testing capacity and expertise and reduce the costs of out-of-state laboratory services.

Strategies

Provide the Vermont Forensic Laboratory necessary resources to operate the blood and breath alcohol testing program and expand the scope of testing to other impairing drugs according to International Standards Organization (ISO) 17025 accreditation standards.

Project Evaluation

GHSP provided funding to enable the purchase of instrumentation and equipment for blood-drug analysis, new printers for the DataMasters (DMTs) as well as other DMT parts/accessories, materials and testing supplies for blood alcohol analysis.

In addition to the major equipment listed above, the Laboratory purchased miscellaneous parts for repair of DMTs, blood collection kits and laboratory supplies. Staff members attended the International Association of Chemical Testing annual meeting, the annual Intoximeters User Group meeting and other courses to include Forensic Pharmacology, Forensic Toxicology Instrumentation Techniques & Applications and Cannabis Science and Medicine, these offered up to date skills and knowledge from the field. The Toxicology laboratory underwent renovations using capital funds to prepare the area for blood-drug testing and two new Forensic Chemists were hired to work in this section and to help bring blood-drug testing in house.

Judicial Outreach Liaison

GOAL: Continued improvement in communication and understanding between the state's traffic safety community and Vermont's judicial community.

Strategies

Engage a retired or active judge to perform liaison functions with current members of the judicial community.

Project Evaluation

The JOL position remained vacant in FFY2017. The request for proposal was rewritten and will be posted in FFY2018.

NH17405D-017	Contractor	100,000	0	\$405(d)

Impaired Driving Summit

GOAL: To provide support to our highway safety partners in reducing the number of major crashes related to impairment by 10% in accord with the 2012-2016 VT Strategic Highway Safety Plan (SHSP).

Strategies

Communications and outreach focusing on informing the public of the dangers of impaired driving and establish positive social norms that make driving while impaired unacceptable.

Evaluation

A daylong summit was held in December 2016. AAA of Northern New England was a co-sponsor of the event.

The GHSP hosted the 2016 Vermont Impaired Driving Summit at the Doubletree Hotel and Conference Center in South Burlington. Over 150 people attended the Summit to discuss a coordinated approach to tackling the issues of impaired driving in Vermont. Attendees included legislators, judges, prosecutors, defense attorneys, law enforcement officers, driver educators, engineers, chemists, healthcare providers and other traffic safety professionals who discussed collaborative solutions to combat impaired driving.

Distinguished speakers shared their expertise on topics of impaired driving, that included: Chris Halsor, a former Colorado prosecutor made a presentation on "Colorado What We Have Learned," Dr. Barry Logan of NMS Labs discussed "Oral Fluid Testing," Dr. Jack Richman spoke on "Cannabis and Public Safety," and Jake Nelson, of the American Automobile Association, discussed "Traffic Safety Research on Cannabis Impaired Driving."

Vermont Governor's Highway Safety Program

The GHSP plans on hosting another summit in FFY19 to update our partners on issues involving impaired driving.

Statewide 24/7 Program

GOAL: To encourage sobriety of DUI offenders 24 hours per day and 7 days per week.

Strategies

The program seeks to reduce recidivism through intensive testing and monitoring of alcohol consumption.

Project Evaluation

DUI offenders are placed in the 24/7 Sobriety Project as a condition of bail, sentencing, probation, parole, or child custody or visitation orders. The program monitors abstinence from alcohol and drug use through a variety of tests, including: 1) twice-a-day breathalyzer tests, 2) alcohol monitoring ankle bracelets, 3) Ignition Interlock, and 4) drug patch and urine testing. Breathalyzer tests are administered every 12-hours (once in the morning and once in the evening). The electronic ankle bracelets (Secure Continuous Alcohol Remote Monitor or SCRAM bracelets) allow for continuous monitoring of alcohol consumption by law enforcement with daily remote electronic reporting. Participants may also be required to wear drug patches to monitor drug use (patches are worn for 7–10 days and then mailed in) or provide random urine samples twice a week. Program participants may be placed on one or more types of tests at the same time. In addition, participants are required to cover the costs of their tests. If program participants test positive for substance use, they are immediately subject to a short jail term (usually 1 or 2 days). Failure to show for a scheduled test may result in an arrest warrant for the participant. Further, offenders' bond, parole, or probation may be revoked if they fail or skip tests. Potential Outcomes: The following outcomes are based on an evaluation of the South Dakota 24/7 Sobriety Project. Vermont compares with South Dakota in its rural nature and small population and may experience similar results.

Art Mabry, who administers the South Dakota 24/7 Program, will be making a presentation on the program on November 8, 2017 at the Vermont Highway Safety Alliance Annual Conference. Members of the Senate and House Committees on Transportation and Judiciary have been invited to the conference and given information on the agenda, including the 24/7 Program. Attendance at the conference by legislators, prosecutors, law enforcement officers and corrections staff may prompt interest in having legislation for a Vermont 24/7 Program.

Vermont Governor's Highway Safety Program

The state is in the beginning stages of evaluating the 24/7 program and how it works. To date the GHSP has not found a home for the project or secured state funds toward the project.
