MISSION: *The Department of Public Safety provides planning, prevention, and protection services through the work of its six Divisions, to ensure a safe and secure environment and enhanced quality of life for the Citizens of the State of Vermont.*

FY 2019 SUMMARY & HIGHLIGHTS

- 1.35% GF increase to cover GF and TF Pressures
- 2.97% overall increase in all funds budgeted
- Budget reflects funding needed to support current service level
- Radiological Emergency Response Program funding from Vermont Yankee will cease in FY19
- Budget Proposal includes language to make FY14 Emergency Management Recovery and Mitigation Program GF permanent (sunsets in FY18)
- Homeland Security Program moved from Emergency Management to the State Police Appropriation
- Forensic Laboratory has become a Division of Public Safety and is now a separate appropriation
- DPS SPA Matrix, Targeted Assistance Plan and Results-Based Accountability Program summaries

Public Safety Budget Request Overview:

1.35% GF increase to cover GF and TF Pressures

2.97% overall increase in all funds budgeted

CHANGE ANALYSIS FY18 TO FY19

Radiological Emergency Response Program (RERP) funding from Vermont Yankee will cease in FY19

- DPS received \$300,000 in funding from Vermont Yankee in FY18 for emergency planning and response
- Loss of this funding for FY19 increases pressure on VEM FEMA Federal Funds (Emergency Management Performance Grant or EMPG) the primary funding for emergency planning statewide.
- EMPG can no longer absorb annual program cost increases and still provide necessary emergency planning.
- FY19 budget proposal moves some of the costs formerly funded with RERP funding to federal funds
- Future budget years will require an infusion of General Funds to maintain VEM's ability to plan for and respond to emergencies

Budget Proposal includes language to make FY14 Emergency Management Recovery and Mitigation Program GF permanent (sunsets in FY18) (See also Attachment 1 on Page 22 for additional information)

- Enacted in the wake of Hurricane Irene, Act 50 of 2013 authorized three new limited service positions for the then new Vermont Emergency Management Division Recovery and Mitigation Unit. These limited service positions were created for an initial period of five years which will expire at the end of fiscal year 2018
- These positions are vital to managing the impacts of taking over the statewide Public Assistance program from AOT in 2013 and continuing the work of mitigating hazards and making Vermont more resilient in the future.
- Making these positions permanent classified position is critical to ensure continuity of the work of the Recovery and Mitigation Unit.
- The associated funding for these positions is included in the fiscal year 2019 budget for DPS.
- DPS proposes the following amendment to Sec. E.100.1 2013 Acts and Resolves No. 50, Sec. E.100(b)(2):

Sec. E.100.1 2013 Acts and Resolves No. 50, Sec. E.100(b)(2) is amended to read:

(b) The establishment of the following new limited service positions is authorized in fiscal year 2014 as follows:

(2) In the Department of Public Safety – two (2) classified positions and one (1) exempt position – for grant management and public assistance. The specific position titles are to be established by the Department with approval by the Commissioner of Human Resources. ~~These positions shall be for a term of five years.~~ Beginning July 1, 2018 and thereafter the two (2) classified positions will become permanent classified positions.

Homeland Security Program moved from Emergency Management to the State Police Appropriation

- In FY18, certain Homeland Security functions were transferred from the Vermont Emergency Management (VEM) Division to the VSP Field Force Division. This realignment focuses the competencies of the Divisions of Emergency Management and the VSP and leverages the strengths of each to enhance State of Vermont capabilities across the mission areas of prevention, protection, response, recovery, and mitigation. This reorganization moved all operational aspects of Homeland Security to the VSP, including Operation Stonegarden, the Preventative Radiological/ Nuclear Detection Program, the Vermont Intelligence Center/ Joint Terrorism Task Force coordination, the Port Security Program, and the State Homeland Security Program grant administration. VEM

continues in its' traditional role of training and exercise for emergency management and homeland security, critical infrastructure planning, and incident management. These divisions work jointly in the areas of threat and hazard identification and risk assessment, cyber planning and intelligence sharing, and the Governor's Emergency Preparedness Advisory Committee. In short, this adjustment better exploits the strengths of each division and ensures a more secure and resilient Vermont. It is also fully consistent with the statutory requirements for the emergency management division. See 20 V.S.A. §§ 3 and 3a.

- There is little to no impact on DPS's internal or external partners from this change. Their daily contacts and interactions with VEM and the newly aligned Homeland Security Unit remain largely unchanged. There has also been no budget impact from this reorganization. Two federally funded positions were moved from VEM to the VSP Homeland Security Unit as part of this reorganization.

Forensic Laboratory has become a Division of Public Safety and is now a separate appropriation

- In FY18, the Forensic Lab was elevated to a Division within DPS with the Director reporting directly to the Commissioner. Previously, the Forensic Lab was a component of the Criminal Justice Services Division. As the third largest component of DPS and the only forensic laboratory in the State of Vermont providing services to the entire criminal justice system, this reorganization better reflects the importance of the Forensic Lab to Public Safety, better reflects its size and role within DPS, and allows for more direct oversight of the Lab by the Commissioner. There has been no impact to DPS external partners from this reorganization. There has also been no budget impact from this reorganization

DPS SPA Matrix, Targeted Assistance Plan and Results-Based Accountability Program summaries:

See Attachments as follows:

Attachment #2: DPS SPA Matrix: Page 25

Attachment #3: DPS Targeted Action Plan (TAP) Summaries: Page 27

Attachment #4: RBA Program Update: Criminal History Record Check Program: Page 40

Attachment #5: RBA Program Update: Marijuana Registry Program: Page 41

Legislative Questionnaire:

1. (a) What is your budgeted vs actual spending for SFY17 final and SFY18 BAA by separate appropriation?

DPS Response: See Attachment 6, Page 42

(b) What is your SFY18 BAA by separate appropriation?

DPS Response: DPS did not submit a Budget Adjustment request for FY18 except for a request for a correction to an error in the State Police appropriation in the final draft of the FY18 Appropriations Bill. Correction requested is as follows:

Two State Police funds in the 2018 Big Bill did not roll up to the correct funding type.

FY 2018 Vantage correctly shows fund 22050 and 22055 amounts as Federal Funds and the FY 2018 Big Bill shows these amounts as rolling up to Special Funds.

A technical correction in the BAA will be needed to correctly identify the fund type.

	FY18 Vantage	FY 18 Big Bill	Difference
Special Fund	2,905,072	3,190,202	285,130
Federal Funds	2,619,131	2,334,001	(285,130)
Total	5,524,203	5,524,203	-
Fund	2018 Vantage		
22050	212,258		
22055	72,872		
Total	285,130		

2. Identify all carry forwards and reserves. How did they accumulate?

DPS Response: See Attachment 7, Page 43

3. Do you have any proposed initiatives?

- **Vermont State Police**

Automated Fingerprint Identification System (AFIS): The AFIS is a biometric identification methodology that uses digital imaging technology to obtain, store, and analyze fingerprint data. The Agency of Digital Services is recommending a three-year lease package for the upgrade of these AFIS devices within each DPS location. The lease would begin in FY19 and cost \$105,000 during that fiscal year. The costs would rise slightly in FY20 and FY21. This is the most cost-effective option to complete a necessary upgrade to solidify computer related security risks associated with our antiquated software system.

Taser replacement project: In FY19, the Vermont State Police will be replacing all of its Taser units. The current units are at the end of useful life and are failing. This is critical piece of safety equipment for police officers

Drug Disposal Receptacles: The Vermont State Police is partnering with the CVS Pharmacies and the Lamoille County Sheriff's Office to allow Vermonters to deposit used and leftover prescription medications at secure receptacles at the ten Vermont State Police Barracks

Barracks Recording System: The video and audio recording system located at the Vermont State Police barracks are failing and need to be replaced and upgraded. These recording systems are essential to barracks security and criminal investigations.

- **Division of Fire Safety**

Fire Academy: The fire academy is designing a pre-basic fire fighter class geared for the volunteer fire service. This class will be approximately 50 hours long and the academy will provide all training material and the program will be delivered by local training officers. This will allow new recruits to attend a basic level class rather than the 180-hour pro-board class. Firefighter taking this pre-basic class who wish to continue their training will be eligible for the fire fighter certification class.

In FY19, the Fire Academy plans to develop curriculum geared towards the volunteer officers and chiefs. The current certified fire officer program makes it very difficult for a volunteer to attend, in part because of time commitment and prerequisites. The new class will be set up to teach at the weekend regional fire schools and we will also sponsor/host the new class at the academy at no cost.

- **Vermont Emergency Management**

State Emergency Management Plan (SEMP) Promulgation: By the end of the second quarter of FY 19 the newly revised State Emergency Management Plan will be ready to be signed and promulgated by the Governor. This will culminate a process of plan reorganization and update to produce a more comprehensive all-hazards plan which defines the roles and responsibilities of all entities of the emergency management program across the local, state, and federal level. VEM will begin training and briefings on the updated plan in the summer of 2018 to ensure it is ready to be implemented once the Governor signs.

State Hazard Mitigation Plan: The State Emergency Management Plan will include a newly updated and federally-approved State Hazard Mitigation Plan which outlines the state's overall strategy to lessen the impact of disasters over the long term. This plan will be the result of extensive stakeholder and leadership input and will integrate actions to stem the impacts of disasters exacerbated by climate change.

Statewide Catastrophic Exercise: The new SEMP will be validated through a statewide catastrophic exercise for which the planning will begin in FY19. This exercise is expected to be preceded by a series of smaller exercises to prepare for the larger operations-based event. This will be the first exercise series in the State

Emergency Operations Center since the plan update and the implementation of the updated National Incident Management System.

Cyber Security: The Governor's Cybersecurity Advisory Team (CAT), with VEM and VSP representing DPS, expects to complete a State Cybersecurity Strategy, with its concomitant objectives, to include public, small business and educational outreach and education in addition to robust engagement with critical infrastructure partners such as energy providers, water providers and hospitals.

Local Emergency Operations Plans: The state Local Emergency Operations Plan template has been through a full breadth update and made to be more comprehensive in scope, detailed in execution, and easier to use. VEM expects to assist locals in LEOP integration during FY19.

4. Update on existing programs

- **Vermont State Police Camera Project:**

For over twenty (20) years, the Vermont State Police has utilized mobile video cameras in all its marked police vehicles. These so-called “dash cameras” have become an essential piece of equipment and resulted in greater transparency and police accountability. There are currently 221 police vehicles equipped with cameras. In FY18, the Vermont State Police began replacement of its mobile video camera system with a new WatchGuard camera system. This camera replacement project was necessitated due to the age of the existing cameras, the expiration of warranties and ongoing camera failures. In addition, the cameras were out of compliance with Criminal Justice Information Services (CJIS) standards.

In FY18, the VSP requested funding through the Equipment Revolving Fund to allow the VSP to purchase both vehicle cameras and body cameras. Under this proposal, the cost of these camera systems, to include software and media storage costs, were to be amortized over five years. This request was rejected in lieu of one-time funding in the amount of \$1,250,000. Utilized these state funds and existing federal funds, Phase I of this project has entailed the installation of new WatchGuard cameras in all VSP vehicles. These cameras are being installed by barracks and all ten barracks should be completed by June 2018. Video generated by these cameras will, for now, be stored locally at each barracks. Funding for this project breaks down as follows:

- 129 units purchased with federal funds -- \$572,814
- 92 units purchased or to be purchased with state funds -- \$517,040

Phase II of this project is two pronged. First, DPS is currently revising its policies and practices relating to retention and storage of electronically stored information, including digital data. The amount of information needed to be stored electronically is a key driver in determining the overall cost of storage. The second prong of Phase II will involve identifying, defining, evaluating, and determining costs for (1) body cameras, (2) needed technology infrastructure upgrades at the barracks, and (3) implementing cloud based storage for electronic media. The majority of these costs are currently unknown. In this regard, the VSP is working with ADS and BGS, and has retained BerryDunn to provide consulting services on these issues. The balance of the state funding of this project will be utilized as part of Phase II.

- **Forensic Laboratory Toxicology Program**

With the legalization of marijuana in Vermont, the number of drug impaired drivers will continue to grow. Without an easy system to evaluate blood samples in drug impaired driving cases and arrange for expert testimony, there will continue to be significant challenges to the criminal justice system in Vermont to hold drug impaired drivers accountable for their conduct. As a consequence, Vermont's roadways will be less safe.

The Vermont Forensic Laboratory (VFL) oversees the evidential blood and breath alcohol testing of impaired drivers for Vermont. However, it has not had the capability of testing for drug impairment in DUI cases (DIUD). This has resulted in inefficiencies and significant associated costs. In 2017, 203 blood samples were sent to a private out-of- state laboratory for testing in DUID prosecutions. While in most cases Federal funds cover the costs of the laboratory testing, the state often incurs significant costs to bring out-of- state experts to Vermont to provide required testimony in drug impaired driving prosecutions (approximately \$5,000-10,000/case). Predictably, these expert witness costs quickly overwhelm the limited financial resources of the State's Attorneys. These cases are therefore often settled for a reduced charge, not because of lack of the evidence, but because of financial considerations. As a consequence, justice suffers.

The VFL is in the process of expanding its capability to allow for in-state testing in drug impaired driving cases. In this regard, renovations to the laboratory were completed in 2017 (using approximately \$530,000

in capital funds) and state-of-the-art instrumentation and supplies were purchased using FY17 GHSP grant funds (approximately \$600,000). In addition, Federal funds are supporting two analyst positions as well as access to high quality training opportunities essential to allow the VFL to provide the highest level of technical support to DUI/D cases in Vermont. It is anticipated that the VFL will begin drug testing in early summer 2018.

- **Division of Fire Safety**

Fire Academy: In FY2018, the Vermont Fire Academy (VFA) was reorganized to better serve Vermont's firefighters and first responders. This top-to-bottom reorganization included the re-classification and re-positioning of full-time staff and temporary instructors. This has allowed the VFA to deliver more instruction and classes to first responders. In addition, DPS received approximately 1.5 million dollars in grants which allowed it to construct a new live burn training building and purchase/replace old training equipment. The response to these changes from the fire service entities and first responders in Vermont has been extremely positive.

Permitting: In the past year, the Division of Fire Safety has conducted a full review of its permitting processes and procedures. This review has resulted in a more streamlined process, faster processing times and greater customer satisfaction. Currently, the average turnaround time for permits involving project under \$200,000 is 12 days with the goal of issuing 95% of all permits within 30 days.

Fire Safety: Protecting Vermont's most vulnerable citizens is one of DPS primary responsibilities. Through the DFS's project Fire Safe 802, thousands of smoke and CO alarms are being installed in vulnerable single-family owner-occupied homes throughout Vermont free of charge. As a result of this project, many lives may be saved.

- **Vermont Emergency Management**

VT Alert: VEM successfully migrated from an outdated alert and notification system to a new cloud-based solution called Everbridge. The new system has modernized our alerts and includes an app for users. This system is still free to the public and other entities who wish to utilize it for emergency notifications.

Debris Management: VEM partnered with ANR and Buildings and General Services to procure contingency contracts for large scale Debris Management and Debris Monitoring. The review team selected CERES Environmental and TetraTech, respectively, for these contracts with well-respected large national companies that now stand ready to assist Vermont, at competitive prices, in the event that local and state resources are overwhelmed by a catastrophic or extremely complex debris event. Both selected companies have extensive experience and successful track records in maximizing FEMA reimbursement eligibility.

Local Emergency Management Director Course: VEM developed and executed a fully revised 8-hour Local EMD course to educate local officials on the role and the basics of disaster preparedness, response and recovery. The course was developed in partnership with several town EMDs and Regional Planning Commission representatives. The development of the course resolves a gap which has been communicated to VEM by local jurisdictions.

5. What challenges have you identified and what actions are you taking?

Vermont State Police: Staffing continues to be an ongoing challenge. The VSP recruiting unit, which has improved the VSP recruitment of candidates, will continue to explore new and innovative ways to bring qualified candidates to the Vermont State Police.

Vermont Emergency Management: Management of the federal Emergency Management Performance Grant (EMPG) is an ongoing challenge. EMPG funds the majority of VEM staff time and is not projected to increase. VEM has a General Fund appropriation established in Act 50 of SFY 13 to support staff time for Recovery and Mitigation personnel. VEM seeks to lift the restriction placed by Act 50 on this appropriation to utilize the GF budget as needed for response and preparedness functions within the Division.

Division of Fire Safety: Completing inspections on the purchase and sale of primarily condominium units is an ongoing challenge. Based on the Supreme Court's ruling in *Bianchi v. Lorenz*, 166 Vt. 555 (1997), real estate attorneys are demanding current inspections prior to purchase and sale ensuring there are no outstanding violations. Because demand for these inspections has steadily increased, DFS is reviewing its policies and practices with respect to these inspections.

6. What are implications of level funding, positive or negative

DPS Response: This budget allows DPS to manage at the current service level.

7. What work or initiatives or drawdown of federal dollars are not happening or getting done?

DPS Response: DPS carefully manages our federal programs and maximizes our draw of federal funds. We do have some concerns about some of our federal program's ability to continue to absorb annual cost increases for staff with stagnant grant award funding. We are experiencing this problem within our Emergency Management Performance Grant (EMPG) which is creating pressure on our General Funds in FY19.

8. Do existing programs best address the pressures and priorities of the agency/department or should other alternatives be considered? What data supports this?

DPS Response: Yes. DPS believes that existing programs do address the priorities of our department. The pressures we face are the scarcity of resources and uncertain funding which are ongoing problems for all State Agencies/Programs. But our program structures, we believe, are fundamentally sound and achieving desired outcomes.

9. (a) Identify existing problems. (b) What is the root cause of each? (c) What is your suggestion to address the problem in an efficient and effective way?

See above responses.

POST- IRENE RECOVERY AND MITIGATION SUMMARY

Accomplishments

The establishment and continuation of the Recovery and Mitigation Section within Vermont Emergency Management has yielded tangible outcomes which make Vermont more resilient and ready to recover from disasters than ever before. For example:

- Partnered with Agency of Natural Resources (ANR) to obtain **FEMA recognition of Vermont's General Stream Alteration Permit as "codes and standards"** for purposes of Public Assistance Program eligibility. This has resulted in more than a \$2 million of additional FEMA funding since Irene to cover 75% of the cost of larger, more resilient drainage structures to replace ones damaged by flooding.
- Partnered with ANR and Buildings and General Services to procure **contingency contracts for large scale Debris Management and Debris Monitoring**. The review team selected **CERES Environmental** and **TetraTech**, respectively, for these contracts with well-respected large national companies that now stand ready to assist Vermont, at competitive prices, if local and state resources are overwhelmed by a catastrophic or extremely complex debris event. Both selected companies have extensive experience and successful track records in maximizing FEMA reimbursement eligibility.
- Established a **Public Assistant Reservist** program, which currently includes three excellent retired state employees who are up-to-speed on current FEMA policies and procedures. Two of the reservists have been assisting communities recovering from the June-July flooding event. Personnel costs for the reservists are covered by FEMA Public Assistance management costs. This is a much more cost-effective method of scaling up our Recovery resources than hiring disaster recovery consultants (which was necessary after Tropical Storm Irene).
- Vermont filed more than 30 **appeals** of FEMA Public Assistance determinations on behalf of Vermont communities following Tropical Storm Irene (and prevailed or partially prevailed in more than half of them). Since then, The Recovery and Mitigation Section staff has maintained a strong Public Assistance partnership with FEMA Region 1, and has supported Vermont communities through nine federally-declared disasters (of which four are already closed out) without needing to file a single appeal.
- With DR4330 (the June 29-July 1, 2017 flooding), Vermont became the seventh state in the nation to use **FEMA's new Public Assistance Program Delivery Model**. We have already provided training to dozens of state personnel and local officials in how to use the on-line FEMA Grants Portal which is integral to the new delivery model.

Hazard Mitigation Program

Federal disaster declarations since approval of the 2013 Vermont State Hazard Mitigation Plan have made available nearly \$3 million in Hazard Mitigation Grant Program (HMGP) funds, which have been applied for in full and are being implemented statewide. In addition to those disaster-dependent HMGP funds, Vermont has applied for \$4+ million under the Pre-Disaster Mitigation (PDM) and Flood Mitigation Assistance (FMA) grant programs in 2016 and 2017. Between 2011 and 2013, Vermont received seven (7) disaster declarations, totaling nearly \$40 million in HMGP funds, most of which have been spent down for various mitigation projects across the State. A large portion of these mitigation funds have been used to purchase and demolish nearly 150 flood-vulnerable structures from Vermonters who suffered tremendous property destruction or loss. Vermont Emergency Management, together with partner Agencies ACCD, ANR, VTrans, has also identified and implemented several dozen infrastructure projects with these funds. We have used Hazard Mitigation funding to assist municipalities in developing Local Hazard Mitigation Plans (LHMPs), which not only make them eligible for mitigation project funding, but also allow them to receive a greater State cost-share for Public Assistance funding in the immediate aftermath of a declared disaster under the State's Emergency Relief and Assistance Fund.

In 2016, the Vermont Silver Jackets team was created to create a platform by which State and Federal partners can develop proposals for Army Corps of Engineers pilot funds, for example to support State-level flood data gaps. Since signing the Vermont Silver Jacket charter, this group has successfully received funding for two data acquisition projects in critical watersheds (the Winooski in Montpelier and Whetstone Brook in Brattleboro), whose results will inform local emergency response, mitigation projects and funding requests in the future.

As DPS, via VEM, continues to support and promote Hazard Mitigation in Vermont, the Recovery & Mitigation Section will continue to actively seek funding for and prioritize and implement critical mitigation projects statewide, recognizing the strong return on investment of mitigation. A recent national study found that every \$1 spent on riverine hazard mitigation yields \$7 on average in avoided future damages.

State Hazard Mitigation Plan

The 2013 Vermont State Hazard Mitigation Plan was approved in November of 2013 – the product of a year-long process with key State stakeholders involved in mitigation and resilience work. The Secretary of the Agency of Administration at that time convened a gathering of the Governor's cabinet for the State Hazard Mitigation Planning & Policy to implement this plan. This committee met quarterly to prioritize projects, promote and support mitigation-related legislation and to act as a platform for shared ideas, initiatives and innovation. In April 2017, that

Committee selected representatives from their respective agencies to staff the State Hazard Mitigation Plan 2018 Steering Committee, which is guiding the process for the next State Hazard Mitigation Plan, which must be approved by FEMA by November 2018. The process for developing this new plan, which kicked off in late 2016, has expanded its reach beyond State Agencies to include resilience-focused non-profit organizations and individual municipalities interested in developing a useful plan that can effectively be implemented in the years ahead. A list of mitigation strategies is currently being developed and ranked. The State Plan lays the groundwork for developing and prioritizing hazard mitigation projects from Vermont for federal funding.

Public Assistance

ATTACHMENT 3

Agency/Department: Department of Public Safety

Project Name: Policies and Procedures

I. AGENCY/DEPARTMENT CONTRIBUTION TO GOV. SCOTT'S PRIORITIES

DPS supports economic development by ensuring a safe and secure climate for businesses and clients/customers. Business growth will lead to enhanced affordability. DPS units routinely respond to and address issues affecting Vermont's most vulnerable population.

II. HOW ARE WE DOING NOW?

Policies and procedures serve as a guiding framework for employees. When policies and procedures are in place, tasks are completed consistently and efficiently. These policies and procedures serve as reference guides for all employees and management to understand the what, who and how the Department accomplishes its mission. This empowers the employee to perform their job within that framework. Additionally, policies play a major role in decision making.

When ineffective or no policies and procedures are in effect, employees' actions can become confused and inconsistent. Management oversight becomes necessary to provide guidance and focus. Management oversight on everyday tasks prevents focus on DPS becoming a proactive department. Focus is forced onto what is currently happening instead of what we could become.

III. WHAT DOES DOING BETTER LOOK LIKE?

- Production of a centralized digital policy and procedure repository
 - Web based
 - Easy to use
 - Each department would be responsible for specific procedures relevant to their mission

- Continual review of policies and procedures for relevancy and effectiveness
 - Quarterly review by Department Head
 - Yearly review by Agency Policy Board
- Management buy-in 100%
- Increase employee understanding where to turn for information by 200%
- Acknowledgement of general policies thru onboarding 100%
- Demonstrated knowledge of applicable procedures thru respective departments 100%

IV. WHAT ARE YOUR CURRENT CHALLENGES?

- Outdated policies and procedures that are not centrally located and available
- Communication between departments

V. WHAT DO YOU PROPOSE TO DO?

- Identify stakeholders.
- Conduct Lean Event
- Create a policy development team to identify critically lacking policy areas.
- Develop policies, and add to easily accessed location.
- Use policies and procedures for training new and existing employees.

VI. WHAT IS THE SCOPE OF THIS PROJECT AND YOUR IMPLEMENTATION PLAN?

Policies and procedures apply across the Department, affecting decision making, style of management and employees’ careers.

Below: What will your agency/department have to do to implement the action, broadly? This plan will get more specific over time. For the purposes of this proposal, list the short-term actions you plan to take to get this project started.

WHAT HAS TO GET DONE?	BY WHEN?
Have project selected by PIVOT leadership.	15 July 2017
Present to Management Stakeholders.	15 July – 15 August 2017

Conduct Lean Event	15 August 2017
Execute specified actions.	15 August – 15 October 2017
Monitor progress.	Ongoing, post-implementation.

VII. HOW WILL YOU MONITOR PROGRESS?

Progress will be monitored by using metrics developed during the Lean process analysis.

Agency/Department: Department of Public Safety

Project Name: Purchasing/Contracting

I. AGENCY/DEPARTMENT CONTRIBUTION TO GOV. SCOTT'S PRIORITIES

The Department of Public Safety (DPS) is responsible for public safety for the citizens of and visitors to the State of Vermont and enforcement of the laws enacted. Strong public safety is necessary for the development of a growing economy as businesses, their employees, and patrons will want a safe and secure environment in which to operate. Such an environment will also be attractive to individuals considering a move to the State of Vermont. Lastly, the resources offered by the DPS are regularly accessed by vulnerable citizens residing in and visiting the State of Vermont.

Purchasing and contracting are the mechanisms through which the DPS acquires the equipment and services necessary to meet its enforcement and public safety duties.

II. HOW ARE WE DOING NOW?

The most important measurement of the purchasing/contracting process is the time elapsed from initiation to procurement of the item/service desired. The overly complicated process contributes to delays and can strain relationships with vendors. For example, DPS has equipment for which service is available through only a single vendor, yet the service contract is still put out to bid because it is easier than obtaining approval for sole sourcing. Likewise, within the Public Safety field, equipment is needed to perform very specific functions. Sometimes only a single vendor is available to provide said equipment, yet the current policies and practices place a strong emphasis on requiring a bid process. Such carte blanche policies and practices devalue unique topical knowledge certain employees possess in a specific field that may allow for more efficiency.

Also contributing to the time delays is ineffective communication. This is exacerbated by the number of entities involved in the process. It is common for the individual submitting the purchase request/contract to not be kept abreast of progress as the process moves forward. This complicates and delays the matter as preferred vendors may not be notified of open bidding in a timely fashion or there is repeated haggling over contract language. It was not difficult for the DPS team to come up with several examples of contracts that took 6+ months to finalize. The current system leads to employee frustration and potentially for deviation from policy.

III. WHAT DOES DOING BETTER LOOK LIKE?

Common-sense management demonstrating a more streamlined and transparent approach with a goal to have the fewest number of hands in the approval process as possible. Creation of a centralized system where requests can be submitted, tracked, and approved. Within this system, there would be defined deadlines, automatically triggered communication (e-mails), and accountability (substitute approvers as needed) when these deadlines are not met. Such a system would provide an easy measuring stick on time elapsed in the process and gauge where improvements in efficiency can be made.

Similar systems are already employed within state government. For instance, BGS has such a system for maintenance and work order submissions. Employees also utilize a similar system for submission of expenses, and IT issues are tallied using a Track-It system.

IV. WHAT ARE YOUR BARRIERS? WHAT WOULD WORK TO IMPROVE?

- Communication breakdown
- Conflicting policy between departments/agencies
- Disconnect between those in the approval process and the end user
- Operating a paper-based system in an electronic age (too many places where paperwork can be lost, misplaced, delayed, or forgotten)
- Sufficient staffing to conduct needed reviews
- Funding sources for certain agencies create potential conflicts
- Proper training

V. WHAT DO YOU PROPOSE TO DO?

- Seek approval of project for analysis
- Conduct a LEAN process to identify specific areas where improvement can be made
- Engage all affected parties/departments
- Implement specific action items for improvement
- Create centralized purchasing/contracting database
- Track actions and measure performance over time

VI. WHAT IS THE SCOPE OF THIS PROJECT AND YOUR IMPLEMENTATION PLAN?

Purchasing and contracting is a process that impacts the operations of all state government departments and agencies. Due to the fact that this process includes involvement of multiple groups across a variety of agencies, this proposal - to achieve the efficiency goals desired - cannot be adopted and implemented solely at the DPS level.

WHAT HAS TO GET DONE?	BY WHEN?
Project selection by PIVOT leaders	July 2017
Identify stakeholders and LEAN participants	Late July 2017
Conduct LEAN event	August 2017
Execute actions identified during LEAN event	September – October 2017
Monitor progress	Ongoing

VII. HOW WILL YOU MONITOR PROGRESS?

Progress will be monitored and measured by the average time elapsed in moving requests through the system developed. Additional considerations may be developed in the LEAN analysis.

Agency/Department: Department of Public Safety

Project Name: New Hire Onboarding

I. AGENCY/DEPARTMENT CONTRIBUTION TO GOV. SCOTT'S PRIORITIES

DPS supports economic development by ensuring a safe and secure climate for businesses and clients/customers. Business growth will lead to enhanced affordability. DPS units routinely respond to and address issues affecting Vermont's most vulnerable population.

II. HOW ARE WE DOING NOW?

The new employee onboarding program is a critical component to an employee's work experience because it sets the tone for perceptions of the workplace. If execution of onboarding is inefficient, time-consuming, and incomplete, it sends a very negative message about the organization. If executed well, however, it sets a very positive tone. The most telling metric re onboarding is "Time to Completion." Decreased time translates into increased efficiency, which could result in increased resource availability from the new hire as well as the personnel taking supporting actions within the process. To the best of our knowledge there are no formal metrics defined to measure the current process, nor is there a coherent process flow schema which shows how the process should work. Consequently most of the feedback received on system efficiency is anecdotal. For context, key elements of the DPS onboarding process include: fingerprinting, background investigation, HR policy review, IT hardware issuance, IT systems administration such as account-building and permission setting, and badging.

III. WHAT DOES DOING BETTER LOOK LIKE?

- Decrease time to onboarding completion by 50%
- Decrease hardcopy documents requiring action by 75%
- Increase anecdotal evidence of positive onboarding experience by 200%
- LMS integration of required policy "Read-In"
- Production of a single, predictable, measurable process flow scheme

- Production of single checklist with required actions and timelines
- Production of documents which are intuitive and customer-friendly

IV. WHAT ARE YOUR CURRENT CHALLENGES?

- Outdated, unexamined process
- Lack of measures of effectiveness
- Lack of training for supervisors on current processes
- Poor and unintuitive forms

V. WHAT DO YOU PROPOSE TO DO?

- Get project approved for analysis.
- Conduct a facilitated Lean process analysis which identifies specific action items, and involving all departmental stakeholders.
- Identify and track actions, and implement.
- Measure performance over time.

VI. WHAT IS THE SCOPE OF THIS PROJECT AND YOUR IMPLEMENTATION PLAN?

This effort begins from the time an offer is made and accepted by the new hire. It ends when the onboarding process is complete, and new employee begins work in earnest, absent any further onboarding requirements.

Below: What will your agency/department have to do to implement the action, broadly? This plan will get more specific over time. For the purposes of this proposal, list the short-term actions you plan to take to get this project started.

WHAT HAS TO GET DONE?	BY WHEN?
Have project selected by PIVOT leadership.	15 July 2017
Socialize project.	15 July – 15 August 2017
Conduct Lean Event	15 August 2017
Execute specified actions.	15 August – 15 October 2017

Monitor progress.	Ongoing, post-implementation.
-------------------	-------------------------------

VII. HOW WILL YOU MONITOR PROGRESS?

Progress will be monitored by using MOEs developed during the course of the Lean process analysis.

Agency/Department: Department of Public Safety

Project Name: Intergovernmental Data / Document Sharing

I. AGENCY/DEPARTMENT CONTRIBUTION TO GOV. SCOTT'S PRIORITIES

Protecting vulnerable Vermonters - While the Department of Public Safety does not have as specific a mandate as some other state entities might this priority area aligns most strongly with the overall Departmental mission. While the traditional definition of vulnerable individuals includes children, the elderly, and those with disabilities it could reasonably be expanded to those affected by disasters, the opioid epidemic, and victims of crime as well.

Areas of work that reflect the above include proactive policing activities, background check processing, disaster planning/relief activities, and various support activities necessary to deliver those services state-wide.

II. HOW ARE WE DOING NOW?

Many of the Department's programs have data intensive components, including crime records, building/inspection records, and emergency planning documents. The ability to leverage these data sets across the Department is largely a function of two issues, with the first being statutory limitations on the use of certain data (criminal history records for example). However, the second issue is directly addressable, which are data sets (including electronic document management systems) developed without interoperability in mind and the technical systems have not been developed to allow this data / document sharing and analysis to take place.

While this is an issue within the Department the same issue exists across state government as a singular entity. Data or documents may be held in one area that would be of significant benefit to the mission or another but the 'bridges' simply do not exist. One example of this is the requirement for certain electronic documents to be physically printed and then provided to the court, often involving driving long distances for the simple purpose of delivery. Processes such as this create financial, human resource, and environmental inefficiencies.

III. WHAT DOES DOING BETTER LOOK LIKE?

While no task of this scope is straightforward, two primary avenues are primed for exploration and improvement. The first would be a state-wide electronic document transmission system, allowing for targeted delivery of secure documents to an intended recipient. More than simply a large 'hard drive' where data could be dumped, a system such as this could allow staff in one area to electronically transmit documents to another authorized entity within state government in a secure manner. Technology such as this is already commercially available and would replace the problematic issue of individuals utilizing unsecure methods (such as email via Outlook) or simply not being able to share documents.

Furthermore, having a more internally focused data sharing system (as opposed to previous efforts which have often focused on making limited information available to the public) would allow government to leverage increasingly sophisticated data sets to complete required tasks. From such architecture, additional abilities to share data publicly may then be derived.

IV. WHAT ARE YOUR CURRENT CHALLENGES?

Current challenges come from several areas, including the lack of funding, the difficulty of working on statewide technology projects, lack of a clear executive mandate, and statutory limitations on the use of data. While the latter issue is outside the scope of this activity, the second and third could be addressed directly via PIVOT activities.

V. WHAT DO YOU PROPOSE TO DO?

The most straightforward path would be a two-pronged approach including the following:

- Implement a secure document transmission/sharing technology for use state wide
 - The goal would be more efficient dissemination of electronic documents where authority and process already exists
 - The Department could explore any number of document sharing/transmission technologies and require use for otherwise approved activities (i.e. using this system to transmit records to the court rather than physically driving hard copy)
- Convene a working group to continue the process of cataloging data sets across state government, including data formats, statutory limitations, and funding concerns

- The Department could model this initiative internally to develop best practices and system mapping language which could then be externally adopted/expanded

VI. WHAT IS THE SCOPE OF THIS PROJECT AND YOUR IMPLEMENTATION PLAN?

While certain aspects of the project scope would need to be determined through investigation, maintaining an intergovernmental (rather than public) focus will be critical. The primary goal would be to increase governmental efficiency and security and thus allowing for more effective protection of the vulnerable and population at large.

WHAT HAS TO GET DONE?	BY WHEN?
Have project selected by PIVOT process	Mid July – 2017
Allocate resources	Mid July – 2017
Determine scope and goals for each area	Mid August – 2017
Review options and complete data collection	Mid November – 2017
Initiate document sharing protocol and dataset gathering	Mid December – 2017

VII. HOW WILL YOU MONITOR PROGRESS?

Through regular meetings, progress on scope and goals will be measured and communicated to leadership. As new procedures or resources are identified procedures will be provided to staff.

Department of Public Safety Special Funds - Requested Information

Fund	Fund Description	FY17 Ending Balance (Revenue Carried Forward into FY18)	FY18 Rescission (Special Fund balances swept to GF)	Encumbrances carried forward from FY17 into FY18 (purchase orders or subgrant obligations)	Total Revenue Available After FY18 Rescission and Encumbrances	Reason for Revenue Balance
21025	Radiological Emerg Response	23,231	0	23,231	(0)	Revenue balance due to timing of payment of program expenditures
21097	Elevator Safety Fund	42,558		0	42,558	Revenue balance due to timing of payment of program expenditures
21120	Fire Service Training Council	69,526		574	68,951	Revenue balance due to timing of payment of program expenditures
21125	Haz Chem & Subst Emerg Resp	378,678	200,000	132,700	45,978	Revenue balance due to timing of payment of program expenditures
21130	Criminal History Records Check	207,381		200,000	7,381	Revenue balance due to timing of payment of program expenditures
21135	Vt Law Telecommunications	84,524		0	84,524	Revenue balance due to timing of payment of program expenditures
21140	DUI Enforcement Special Fund	3,370		0	3,370	Revenue balance due to timing of payment of program expenditures
21141	Drug Task Force	18,575		0	18,575	Revenue balance due to timing of payment of program expenditures
21505	Boating Safety	41,411		0	41,411	Revenue balance due to timing of payment of program expenditures
21584	Surplus Property	125,874		49,373	76,501	Revenue balance due to timing of payment of program expenditures
21651	PS-Sale of Photos	5,084		0	5,084	Revenue balance due to timing of payment of program expenditures
21851	PS-Law Enforcement Services	7,108		0	7,108	Revenue balance due to timing of payment of program expenditures
21856	PS-Fingerprint Fees	40,395	40,000	0	395	Revenue balance due to timing of payment of program expenditures
21857	PS-VIBRS	460,873		200,000	260,873	This balance accrued due to a delayed contract payment and one-time revenue received for a mountaintop maintenance project. This will be used to offset cost increases in FY18 and to pay the delayed contract payment in FY18.
21870	Misc Special Revenue	80,808		0	80,808	Revenue balance due to timing of payment of program expenditures
21901	Fire Safety Special Fund	932,426	81,830	1,043	849,554	Commercial construction is currently very active and building plan review revenue was higher than anticipated in FY17. This revenue balance will help to offset salary/benefit/operating cost increases in FY18 and offset revenue pressures in slower budget years without increasing fees.
21922	Blood and Breath Alcohol	1,040		0	1,040	Revenue balance due to timing of payment of program expenditures
21925	Restitution Special Fund	19,560		0	19,560	Revenue balance due to timing of payment of program expenditures
21970	Registration Fees Fund	485,884	300,000	1,938	183,946	Revenue accrued in this fund when Medical Marijuana dispensary program began and application fees were initially received. It took time for DPS to get new positions approved to manage increase in program scope to manage the dispensary program. This one-time revenue balance has been carrying forward for several years and has been targeted to fund a new data system to manage program needs. It has taken a great deal of time to move the IT project forward. The database project is anticipated to be completed in FY19 which will eliminate the revenue balance. Anticipated annual revenue is in-line with ongoing annual program expenditures.
		3,028,305	621,830	608,859	1,797,616	

**DEPARTMENT OF PUBLIC SAFETY
FISCAL YEAR 2019 BUDGET PRESENTATION
DEPARTMENT OVERVIEW**

MISSION STATEMENT

The Department of Public Safety provides planning, prevention, and protection services through the work of its six Divisions, to ensure a safe and secure environment and enhanced quality of life for the Citizens of the State of Vermont.

CREATION OF THE DEPARTMENT

The Department of Public Safety was created by No. 163 of the Acts of 1947 for the "purpose of consolidating certain existing police and investigative agencies, and to promote the detection and prevention of crime generally." No. 224 of the Acts of 1951 created the Division of Civil Defense (now Division of Emergency Management and Homeland Security) within the Department of Public Safety. In 1996, the Governor's Highway Safety Program, inclusive of funds and personnel, was transferred from the Agency of Transportation to the Department of Public Safety by Executive Order No. 01-96A (the Acts of 1996 page 1007). No. 141 of the Acts of 2004 created the Fire Safety Division in the Department of Public Safety consisting of the Fire Prevention Division from the Department of Labor and Industry and incorporation of the Fire Service Training Council within Public Safety.

DEPARTMENT OF PUBLIC SAFETY OVERVIEW

The Department of Public Safety was created by No. 163 of the Acts of 1947 for the "purpose of consolidating certain existing police and investigative agencies, and to promote the detection and prevention of crime generally." No. 224 of the Acts of 1951 created the Division of Civil Defense (now Division of Emergency Management and Homeland Security) within the Department of Public Safety. In 1996, the Governor's Highway Safety Program, inclusive of funds and personnel, was transferred from the Agency of Transportation to the Department of Public Safety by Executive Order No. 01-96A (the Acts of 1996 page 1007). No. 141 of the Acts of 2004 created the Fire Safety Division in the Department of Public Safety consisting of the Fire Prevention Division from the Department of Labor and Industry and incorporation of the Fire Service Training Council within Public Safety.

The Department of Public Safety is organized into six divisions: Vermont State Police (VSP), Criminal Justice Services (CJS), Vermont Emergency Management (VEM), the Vermont Forensic Laboratory (VFL), Fire Safety (FS), and Administration.

VERMONT STATE POLICE DIVISION

The Vermont State Police are the primary law enforcement agency in the state, providing 24-hour coverage to 212 of the state's 257 towns and villages or 46% of the state population on a full-time basis. In geographic terms, this accounts for 84% of the total land area in Vermont.

The State Police is led by the Director (Colonel) and has three divisions identified as the Field Force or Uniform Division, Criminal Investigation Division and the Support Services Division

Field Force Division:

The Field Force Division of the Vermont State Police consists of sworn members and civilian staff members. The division consists of over 200 Uniformed Troopers assigned to 10 field stations throughout the state. These troopers provide a wide array of services to Vermont's citizens and visitors ranging from responding to quality of life type calls to investigating domestic violence and fatal car crashes.

The Field Force Division's mission is to provide for the safety of the citizens of Vermont and its visitors through prevention and enforcement efforts. Troopers strive to perform their duties in an unbiased fashion reinforcing the public trust and inspiring public confidence. Our departmental resources provide services from conventional patrol and investigation to comprehensive responses to major incidents. Troopers utilize cooperative and data driven law enforcement strategies. Beyond conventional emergency calls, Troopers protect families against sexual predators, target domestic violence, combat substance abuse, and work with all communities for emergency preparedness.

The Divisions is organized as follows:

- **Troop A:** Commanded by a Captain this Troop covers the northern half of Vermont with field stations in Williston, ST. Albans, Middlesex, Derby and ST. Johnsbury
- **Troop B:** Commanded by a Captain this Troop covers the southern half of Vermont with field stations in Westminster, Royalton, New Haven, Rutland and Shaftsbury.
- **Special Operations:** Commanded by a Captain this command oversees all special teams and safety programs to include:
 - **Emergency Services Unit (ESU):** Comprised of a Lieutenant and two Sergeants this unit is highly trained in multiple special team disciplines. They provide the core leadership to manage complex incidents as well as special events such as the Women's World Cup, Green Mountain stage race and Inaugural ceremony. Their services are provided to other state agencies and local entities.
 - **Safety Programs:** Commanded by a Lieutenant this unit oversees the Traffic safety and Recreational Enforcement units.

- **Traffic Safety program:** This unit coordinates traffic safety programs statewide, manages VSP traffic related grants, conducts outreach and training and ensures strong public messaging on traffic safety. The unit also oversees the Work Zone Enforcement and SEE (Sharp Eyes Everywhere) programs.
- **Recreational Enforcement Unit** – Staffed by a Sergeant and a Trooper as well as Auxiliary Troopers this unit administers Vermont’s Recreational Boating Safety program as well as conducting Safety Inspections and enforcement of recreational boat and snowmobile laws.
- **Special Teams:** The Vermont State Police have developed a variety of specialized teams and resources staffed by highly trained sworn and civilian members. These “Special Teams” include Canine, Critical Incident Dispatch Team, Clandestine Laboratory team, Search and Rescue, Tactical Services Unit, Crisis Negotiation Unit, Bomb Team, SCUBA Team, Members Assistance Program, and Crash Reconstruction Team. The Vermont State Police have two Mobile Command Posts that respond with total dispatch capabilities (Critical Incident Dispatch Team). We stand ready to assist all allied agencies in times of crisis both statewide and throughout New England. These teams regularly serve the needs of municipal and county agencies and in most cases, are the only asset of their type in Vermont.
- **Homeland Security Unit:** The Division Commander also serves as Governor Scott’s Homeland Security Advisor. This unit oversees the administration of approximately 3.7 million dollars in DHS grants, the vast majority of which is passed through to local entities. The unit supports many programs, current priorities include Preventative Rad/Nuc detection, Critical Infrastructure and Cyber Security.

Criminal Division:

The Criminal Division provides specific expertise in criminal investigations and is made up of the **Bureau of Criminal Investigation**, the **Major Crime Unit**, and **Special Investigations**. Detectives with specialized training, technical skills and expertise work collaboratively on a wide variety of crimes to include the most serious and complex criminal investigations. The Criminal Division is committed to providing assistance and resources whenever needed in support of all other local, county, state and federal law enforcement agencies in Vermont.

The **Bureau of Criminal Investigation (BCI)** is primarily responsible for the investigation of all untimely deaths to include natural, accidental and suicides and provide investigative support for all homicide investigations. Other primary investigations conducted by BCI detectives include, sex crimes, severe child abuse and neglect, robberies, assaults, fraud, arson, computer crimes and sex offender registry violations. BCI detectives also conduct special investigations upon request by other local and county law enforcement agencies. The **Arson Unit** is responsible for determining cause and origin of fires; and conducting investigations on those fires ruled arson or suspicious in nature. Arson detectives work closely with fire investigators with the Department of Fire Safety and all fire departments throughout the state. **Special Investigation Unit (SIU)** detectives investigate crimes of a sexual nature and extreme cases of child abuse and neglect. Troopers assigned to this unit work in conjunction and cooperation with local police agencies as well as the Department of Children and Families, state prosecutors and victim advocacy organizations statewide in a multi-disciplinary team approach to the investigation and prosecution of these crimes.

The **Major Crime Unit (MCU)** is primarily responsible for investigating the most serious crimes, specifically all homicides and officer involved shootings. MCU will investigate missing person cases that are suspicious in nature and / or when foul play is suspected; and other complex

investigations as needed to include unsolved homicides. The **Polygraph Unit** falls under MCU and conducts criminal polygraph examinations for all Vermont law enforcement agencies; and conducts examinations for Vermont State Police applicants. The **Crime Scene Search Team (CSST)** is a special team within MCU that is made up of Troopers from across the state that have specialized training in crime scene processing. The CSST responds to all homicides and officer involved shooting investigations and is available upon request for other crimes as needed to include assisting outside agencies. The **Technology Investigation Unit (TIU)** was created in 2017 as an expansion of the Computer Crime Unit specializing in the collection and analysis of digital evidence. As part of the **Internet Crimes Against Children Task Force (ICAC)**, the TIU serves as specialized support to state, local, county and federal law enforcement across the state. In 2017, a Trooper was assigned as a CYBER crime investigator to the FBI Cyber Task Force. The **Executive Protection Unit (EPU)** provides security for the Governor of Vermont and assists with security for visiting dignitaries; identifies and investigates threats against the Governor or other State Officials. EPU falls under the supervision of the TIU commander.

Special Investigations is made up of the **Narcotics Investigation Unit**, the **Vermont Intelligence Center** and the **Executive Protection Unit**.

The **Narcotics Investigation Unit (NIU)** is responsible for the oversight and operation of the **Vermont Drug Task Force (VDTF)**, a multi-jurisdictional task force made up of state troopers, local and county officers who are dedicated full time to enforcing state and federal drug laws. The primary focus of the Vermont Drug Task Force is to disrupt the flow of illegal drugs into Vermont by targeting mid to high level dealers who are trafficking for profit. Investigative efforts are primarily focused on heroin and opiates but include other illicit drugs to include cocaine, crack cocaine, methamphetamine and marijuana. Drug diversion detectives work closely with the VDTF to identify individuals involved in prescription drug fraud.

The mission of the **Vermont Intelligence Center (VIC)** is to collect, analyze, and disseminate information in an effort to identify, investigate, and prevent criminal activity and protect the citizens and critical infrastructures vital to our society. The VIC supports all local, county state and federal law enforcement. The VIC is also the central point for tracking all missing persons and coordinates information on these investigations. The VIC interacts with all law enforcement agencies in order to exchange intelligence throughout the state, the country, and internationally. It serves as Vermont's comprehensive criminal intelligence center to assist all law enforcement with criminal and counterterrorism investigations and operations. Through these collaborative efforts the VIC seeks to advance the efficient, timely and accurate exchange of information between all of its law enforcement and homeland security partners, at all levels of government, while safeguarding the rights and privacy of all citizens.

The **Joint Terrorism Task Force (JTTF)** is a collaborative effort between the Vermont State Police and the Federal Bureau of Investigation that is dedicated to investigating all terrorist activities within and around the state of Vermont. Currently we have one Trooper assigned to the Task Force.

Support Services Division:

The mission of the Support Services Division is to provide all civilian and sworn personnel of the Vermont State Police with the resources required to effectively perform their assigned duties and to enhance the capabilities of the Vermont State Police. Each section within the Support Services Division is an integral part of the planning and management of a broad range of services and programs provided to the organization.

The Support Services Division is responsible for operating two **Public Safety Answering Points (PSAPs)** staffed by professional civilian Emergency Communication Dispatchers (ECDs). Besides providing all primary radio communications for State Police, their duties include taking

approximately 70% of E911 calls for service, emergency and non-emergency calls for service ensuring that first responders are dispatched to critical incidents. Additionally, the two PSAPs currently dispatch for approximately 105 additional fire, EMS and law enforcement organizations, as well as for other state level law enforcement organizations.

Staff Operations:

The Office of Staff Operations is housed within the Support Services Division and is comprised of the Office of Professional Development & Training, the Director of Fair and Impartial Policing and Community Affairs, the Office of Technology Management, the Vermont State Police Quartermaster and the Public Information Officer.

The **Office of Professional Development/Training** supports the career and professional development of every sworn member, auxiliary trooper and emergency communications personnel and will work cooperatively with all stakeholders to:

- Establish outreach programs to recruit and hire individuals whose core values reflect those of the Vermont State Police.
- Promote individual development and advancement through continuing training and development programs designed to build and expand professional skills and knowledge.
- Endorse programs that foster the total health and well-being of our members.
- Retain capable individuals within the Vermont State Police.
- Engender a culture of mentorship and diversity throughout the department.
- Cultivate the next generation of public safety leaders.
- Engage members in the policy and procedure review and development process.

The **Fair and Impartial Policing and Community Affairs** Director develops and implements programming to ensure fair and impartial policing at every level within the Department. The Director works within all three divisions in the following focus areas:

- Recruitment and hiring
- Training
- Supervision and accountability
- Outreach to a diverse range of communities
- Traffic stop race data collection
- Assessment of institutional practices
- Policy development

The **Office of Technology Services** has been relocated to the division of Criminal Justice Services, but continues to support the technology needs of the Vermont State Police.

The Vermont State Police **Public Information Officer** oversees the VSP objective of keeping the public informed of policing activities while protecting individual privacy, ongoing criminal investigations, and the rights of the accused. To fulfill this function, the VSP utilizes a variety of methods to disseminate information to the public including press releases, social media, responses to public information requests, incident reporting,

and web based content. The outreach and distribution of information is an important component of the VSP mission and our service to the people of Vermont. The Vermont State Police Public Information Officer (PIO) leads these efforts. The PIO responds to media inquiries and public relations requests as quickly, completely and accurately as possible. The PIO is also responsible for all facets of our social media platforms and contributes to our recruitment efforts.

The role of the **Quartermaster** is to provide supplies and field services to members of the department and will:

- Manage efficient and cost-effective equipment inventory and distribution systems
- Maintain positive relationships with department supply vendors
- Prepare and submit equipment purchase orders
- Participate in sworn staff inspection functions
- Provide Honor Guard services for special events

The **Office of Internal Affairs** was established by the legislature in 1979. The purpose of the Office of Internal Affairs is to investigate, or cause to be investigated, all complaints regarding conduct by members of the Vermont State Police. The enacting legislation can be found at 20 V.S.A. §1923 <<http://www.leg.state.vt.us/statutes/fullsection.cfm?Title=20&Chapter=113&Section=01923>>.

Fleet Services is an integral part of the Support Services Division. Fleet Services responsibilities include:

- Vehicle purchase/issuance
- Maintenance and repairs
- Installation of emergency equipment
- Fuel
- Vehicle crashes
- Surplus vehicles disposal

Fleet Services performs many of the large repairs and all of the outfitting and striping of Vermont State Police vehicles. The Unit works closely with local repair facilities for overflow maintenance, routine preventative maintenance and parts procurement. In addition, Fleet Services operates an intra-department wrecker service and is responsible for capturing vehicle usage data for trend analysis and the replacement cycle. Unit personnel also work closely with Driving Instructors to support the Emergency Vehicle Operation Course training cycle by ensuring vehicles are available and ready for training.

CRIMINAL JUSTICE SERVICES DIVISION

The Division has three sections with the objective of providing information and technology solutions to the ongoing operations of the criminal justice system within the State. The division also sees itself as a business partner in the implementation of new technology and the development of information to all divisions within the department. The ability to provide the necessary and relevant information for decision makers to make programmatic decisions is an important aspect of the Division of Criminal Justice Services.

The Division of Criminal Justice Services exists to *support* the Departmental mission by providing its criminal justice, emergency service, governmental, public and private customers with *systems and services* through the Radio Technology Services and the Vermont Crime Information Center units.

Agency of Digital Services Transition: The management and staff of the CJS Division Office of Technology Management that were formerly part of the Criminal Justice Services Division have now transferred to the newly created Agency of Digital Services (ADS). ADS staff will be providing support services to Public Safety under a chargeback model in FY19 and thereafter.

Radio Technology Services is an enterprise program, which provides the following services:

As a true end-to-end service provider, Radio Technology Services provides 7/24/365 support for all mission critical programs.

Wireless Land Mobile Radio Systems (LMR) - We engineer, procure, construct and maintain mission critical wireless voice solutions for various State of Vermont Agencies, Departments and First Responder organizations. These systems provide Push-to-Talk (PTT) voice connectivity between a dispersed group of people to stay in touch with central dispatch and each other. This is accomplished through the use of radio towers, microwave and fiber optic networks specifically engineered to be fault tolerant and constructed by the department for this application. This PTT functionally is the primary reason LMR systems exist, and this functionally is not available commercially. Major users of LMR technology outside the Department of Public Safety include the Agency of Transportation, Department of Corrections and the Department of Fish & Wildlife.

Vermont Microwave Network – The network provides broadband connectivity for public safety. This system, in many cases, is the only network available to connect the various land mobile radio systems to the dispatch centers. This microwave system is used for radio transmitter control functions, voice and data transmission, and emergency communication systems for DPS and other agencies, including all Vermont Communications (VCOMM) users. VCOMM is a statewide interoperable radio system developed to provide cross discipline communications between Police, Fire and EMS practitioners.

Vermont Law Enforcement Telecommunications System (VLETS) – VLETS is a law enforcement message switching system that is standardized to communicate with like systems in all other states, federal law enforcement and criminal justice agencies and counterpart agencies in Canada. This program provides in-state and inter-state data communications services to all law enforcement and many criminal justice agencies in the state. VLETS processes approximately 4 million transactions per month from and to law enforcement and criminal justice practitioners in Vermont. Integrated with the VLETS system to take advantage of common server hardware, software and security requirements, is the Vermont criminal history database managed by the Vermont Crime Information Center.

Telephony - The Department of Public Safety operates an independent Voice-over-Internet-Protocol (VoIP) and digital telephone network. These telephone systems and Vermont's 911 system collectively allow the flow of emergency calls from the public to be transferred to the first responders dispatch center. It is essential that these systems remain operational to ensure the safety of the public and the first responder. The Radio Technology Services program is the single point of contact for departmental members experiencing issues with the department's telephone services. We receive,

dispatch and coordinate all emergency calls, call outs and other requests for preventive and corrective actions. We diagnose and analyze problems/malfunctions and find solutions for execution of nonstandard requests and scenarios.

FirstNet - The Middle-Class Tax Relief and Job Creation Act of 2012 created the First Responder Network Authority (FirstNet). The law gives FirstNet the mission to build, operate and maintain the first high-speed, nationwide wireless broadband network dedicated to public safety. FirstNet will provide a single interoperable platform for emergency and daily public safety communications. As Vermont's designated Single Point of Contact (SPOC), we represent all of Vermont first responders by promoting their communication needs to the national authority.

The Vermont Crime Information Center (VCIC) serves as the state repository for a wide variety of criminal history record information. Complete criminal histories are kept for individuals that interact with the criminal justice system including arrest, arraignment, and conviction. The center is responsible for disseminating centralized criminal history information for authorized criminal justice and non-criminal justice purposes to a variety of agencies. During 2016 the VCIC processed more than 17,000 fingerprint supported record checks for employment and volunteer positions, an increase of 32% over 2015. Volume for 2017 continues to show similar high levels of usage.

Program management is also provided by the VCIC for the statewide Sex Offender Registry (SOR) and Marijuana Registry programs. The SOR currently tracks over 1,300 registered offenders within Vermont while the Marijuana Registry serves over 4,400 registered patients and caregivers (as of June 2017).

Additional criminal justice information programs supported by the VCIC include:

- The National Incident Based Reporting System (NIBRS), providing state and national criminal incident statistics;
- The National Instant Criminal Background Check System (NICS) which processes firearm purchase and transfer applications;
- The National Data Exchange (N-DEx), a clearinghouse of criminal history information used for investigatory purposes; and
- The National Crime Information Center (NCIC) which allows Vermont access to national wanted, missing person, stolen items, and other related files.

EMERGENCY MANAGEMENT DIVISION

The mission of Vermont Emergency Management is to ensure the state's resilience to disasters. VEM provides assistance to the people and communities of Vermont to prevent, protect, mitigate, respond to, and recover from natural and man-made threats and hazards in order to ensure the safety, quality of life, and economic vitality of the state and its citizens. With authority derived from Title 20, VSA, VEM leads the coordination of federal, state, local, private sector and military resources in disaster response and recovery. The State Emergency Operations Center (SEOC) serves as the Governor's central coordination point for the State response to emergencies, disasters, and large scale events. The SEOC is staffed and

managed by VEM personnel with assistance from other state agencies. VEM manages programs that include state, local government, and private sector emergency planning, outreach, training and exercises.

VEM's success lies in the forging of partnerships with a wide range of federal, state, regional, local, military and private sector entities that augment the core mission of the division. VEM maintains a Watch Officer Program that coordinates response to daily incidents occurring in the state 24/7/365. The VEM Watch Officer is the single point of contact to access resources critical to disasters statewide. VEM administers sub-grants to the Local Emergency Planning Committees, Community Emergency Response Teams, Regional Planning Commissions, State Agencies and municipalities for preparedness, planning, protection, prevention, response, recovery, and mitigation activities.

Recently, VEM underwent a reorganization which allocated the Homeland Security Section in the Vermont State Police. Management of the Homeland Security Grant Program as well as other law enforcement specific programs were transferred with two section personnel. Core emergency management elements (such as training and exercise) remain with VEM in a newly-created Engagement Section. This reorganization allows VEM to refocus efforts on preparedness initiatives through reallocating resources to support the primary mission of the division while also strengthening law enforcement partnerships and local, state, and federal levels.

Recovery and Mitigation

The Recovery and Mitigation Section is responsible for managing and implementing the State Public Assistance and Hazard Mitigation Grant programs in coordination with FEMA, including pre-incident technical assistance and training to local jurisdictions, Regional Planning Commissions and other potentially eligible applicants. The Section has oversight of the Public Assistance project funding provided to municipalities and state agencies after federally declared disasters. Other duties include:

- Facilitating the coordination of the State Hazard Mitigation Committee;
- Updating the State Hazard Mitigation Plan;
- Development and implementation of policies, procedures and guidelines for the Flood Mitigation Assistance Program and Pre-Disaster Mitigation Program; and
- Pro-active technical assistance and training to local and regional personnel between disasters.

Operations and Logistics

The Operations and Logistics Section ensures that the State Emergency Operation Center (SEOC) is ready to be activated at a moment's notice and to ensure the alternate EOC at Camp Johnson is readily available. In addition, the Operations and Logistics Section provides resource coordination and technical assistance to local municipalities. The Section coordinates the Emergency Management Assistance Compact (EMAC), which statutory mechanism whereby other States' resources are requested by Vermont or Vermont resources are deployed to other states upon request during emergencies. The same holds true with regard to the International Emergency Management Assistance Compact (IEMAC), an international mutual aid agreement among the northeastern U.S. states and the Canadian provinces of Quebec, New Brunswick, Nova Scotia, Prince Edward Island and Newfoundland/Labrador. Other duties include the management of all operational and logistical aspects of the staff and SEOC to include: communications, internal fleet management, contract management, Mobile Support Unit management (examples include coordinating with swift

water rescue assets statewide), outreach to public and private partners, VT Alert (All hazards notification system), DisasterLAN (the state disaster management software) support and training and management of the Watch Officer program. VEM Operations Section also manages a mobile communications trailer which is capable of supporting mobile incident command posts or local jurisdictions with supporting or establishing critical communications linkage.

Planning

The Planning Section is comprised of personnel who develop all-hazards planning, preparedness and training activities. This section is primarily responsible for the coordination, revision, and maintenance of several state level plans and procedures including the State Emergency Operations Plan which has many annexes focusing on response, response support and recovery activities. The Planning Section works closely with the Homeland Security Section to develop the annual Threat Hazard Inventory and Risk Assessment (THIRA). These initiatives drive multiple federal funding priorities and provide an overall capability assessment of preparedness in the State. Planners work closely with assigned state agencies and departments to ensure the enterprise is prepared to respond and recovery effectively and consistent with the State Emergency Operations Plan.

Engagement Section

The newly formed Engagement Section replaced the previous Homeland Security Section. The Section is responsible for the management of the statewide Training and Exercise programs and works directly with state and local jurisdictions to provide training both directly and through the acquisition of nationally-acclaimed instructors. By developing the annual Training and Exercise Plan, VEM delivers relevant and needed training to emergency responders and managers as well as municipal and state officials with key roles in disaster response. The Section also ensures direct support to local jurisdictions throughout the planning, training, and exercise cycle with field-based Regional Coordinators. Regional Coordinators work directly with local jurisdictions to guide them through the planning process as well as respond to hardest-hit areas during disasters to provide technical assistance.

FIRE SAFETY DIVISION

The Fire Safety Division ensures the safety of the public through code enforcement, public fire safety education, hazardous materials response, urban search and rescue, firefighter training, licensing and certification of professional trade people. The Division has 4 regional offices (Berlin, Williston, Springfield and Rutland) responsible for protecting Vermonters and visitors from fire, electrocution hazards, carbon monoxide poisoning, hazardous material releases, building collapse, explosions, and barrier-free access for persons with disabilities for Vermont's 80,000 public buildings. The primary day to day operational activities include; building construction inspections, purchase and sale inspections, complaint inspections, plan review and permitting of new construction for compliance with the building code, electrical and plumbing inspections, heating system inspection, and inspection of bulk propane dispensing operations. The Division works collaboratively with many groups including but not limited to; Historic Preservation, Economic Development, Public Service, ANR, Career Fire Chiefs, Vermont State Fire Fighters Association, Professional Firefighters, Vermont Fire Chiefs, Access Board, Elevator Safety Board, Electrical Licensing Board, Housing Counsel, Downtown Board, Plumbing Board, Apprenticeship Counsel and Department of Aging and Independent Living, BGS, Corrections, and many local government bodies. Recognizing the Division does not have adequate resources to inspect all public buildings we have entered into cooperative inspection agreements with municipalities

around the state. Inspection agreements allow cities and towns to enforce the same codes and standards on behalf of the State increasing the total number of inspections conducted in Vermont.

Over 90% of the Division's funding comes from the Fire Prevention special fund. Special fund fees come from plan review permit fees, with the construction plan review permit fee generating between \$2.5 and \$3.5 million a year. The remaining special funds are from electrical and plumbing work notices, licensing fees and third-party inspection fees. The Division's remaining funds are general funds and transfers from other departments.

The Vermont Fire Academy was established through the Vermont Fire Service Training Council which was created on May 3, 1988, when Governor Madeleine Kunin signed into law Senate Bill - S-83. The 11 member VFSTC was formed to establish curriculum and deliver fire fighter training to all Vermont firefighters, a program which continues in its present configuration within the Fire Safety Division of the Department of Public Safety. The Training Council continues to develop training and certification programs for all Vermont firefighters.

Vermont Fire Academy Operations: The Chief Training Officer oversees the operations of the Vermont Fire Academy located at the Emergency Services Training Facility in Pittsford, VT. The Vermont Fire Academy has a full-time staff of 7 and is responsible for administering, developing, delivering, and documenting all fire fighter training for both career and volunteer participants. Each year the academy delivers critical and valuable training directly to fire departments throughout Vermont by delivering training props to local communities at no cost. Firefighter training programs are available to the 6,500 Vermont firefighters / 243 fire departments. These include Firefighter 1 & 2, Fire Instructor I, Fire Officer 1&2, Hazardous Materials, Incident Command Management and Terrorism-related courses to name a few. The Fire Academy recently developed a pro-board fire inspector certification class which will save the division and municipalities money as the class is instructed free of charge by subject experts from Vermont. The class is designed to meet the specific needs of Vermont and provides inspectors a solid foundation focused on the national fire problem. The Chief Training Officer is appointed and reports to the Director of the Fire Safety Division.

Hazardous Material Response Team: The State HAZMAT Team was created in 1994 to assist all fire departments in Vermont when managing hazardous materials incidents. The team's authorizing legislation as well as the creation of the HAZMAT Team Chief can be found in [Vermont Statutes, 20 V.S.A. § 33](#). The purpose for the Team's creation was and remains to work with local fire chiefs before, during and after hazardous materials events in their municipalities. HAZMAT Technicians are geographically located across the State with three HAZMAT response vehicles strategically located and equipped with useful state of art sophisticated equipment ready to support Incident Commanders on the ground in making critical life safety decisions that may have a profound impact on a community. In addition, the Team can call upon any of the twenty HAZMAT trailers loaded with emergency response equipment strategically positioned in local fire departments throughout the State. These trailers contain equipment which may be used for operations level HAZMAT response as well as to perform "gross" and "technical" decontamination. The Vermont HAZMAT Response Team (VHMRT) endeavors to have highly trained and equipped personnel on scene quickly when requested by the Incident Commander. The Team trains monthly with local fire departments and other State Agencies including the Civil Support Team ensuring an effective and efficient use of resources. The Team has been a role model for other States.

Urban Search and Rescue: The State Urban Search and Rescue Team (USAR) was created in 2002 to assist all communities in Vermont when deployed by the Division of Emergency Management and Homeland Security (DEMHS). The State Urban Search and Rescue Team is authorized under Vermont Statutes, 20 V.S.A Sec 7. The Team is trained in All Hazard incidents ranging from technical rope rescue to building collapse and swiftwater/flood response. The team's primary equipment Cache is located in Chittenden County with numerous other strike team trailers are positioned geographically with local fire and emergency response agencies within the State.

The USAR team responds at the request of the local incident commander when advanced technical assistance is required or when local assets are exhausted. USAR is pre-deployed through the DEMHS when serious incidents develop or severe flooding is predicted. The team is trained and equipped with specialized advanced technical rescue equipment and is capable of rescuing persons entombed in building collapses, flood waters or areas otherwise inaccessible by local rescuers. The USAR Team can operate self-sufficient for up to 72 hours without support.

VERMONT FORENSIC LABORATORY DIVISION

Vermont Forensic Laboratory: provides examination of physical evidence collected from crime scenes and other sources. The Laboratory is comprised of four organizational units: Toxicology, Biology (Serology/DNA), Drug Chemistry/Fire Debris, and Physical Comparison (Latent Prints/Firearms/Toolmarks/Imaging). It is staffed and equipped to conduct examinations and scientific analysis of evidentiary items, with interpretations and reports of data/findings for use in criminal investigations and civil cases (examples: DUI and marijuana). The laboratory also provides training to law enforcement.

ADMINISTRATION DIVISION

The Administration Division is comprised of two sections and a total of 26 full-time staff. **Commissioner's Office/Legal:** The first section includes five exempt positions in the Commissioner's Office, including the Commissioner, Deputy Commissioner, the Commissioner's Executive Assistant, the Headquarters Receptionist, and two exempt positions providing legal services including the DPS General Counsel and Staff Attorney.

Administration/Finance: The second section, led by a classified Director, provides a full range of financial services, payroll administration, grants management, auditing, purchasing, and contract administration for all Public Safety divisions. Budget preparation and monitoring, accounts payable and receivable, purchasing administration, payroll, grant management, and external and internal compliance auditing activities are all managed through a central office operation consisting of 20 classified positions at the department headquarters in Waterbury.

DPS Administration/Finance Units:

Financial Office: Responsible for Federal and State budgeting, monitoring, and reporting and for working with all DPS Division Directors and program coordinators to administer all State and Federal funded grant programs

Policy, Audit, and Compliance Unit: Responsible for working with both DPS staff and its' sub-grantees to ensure compliance with all federal and state regulations and guidelines for financial management. Ensures that risk is controlled proactively with appropriate internal accounting, process controls, and coordination of DPS-wide policy development where required.

Accounts Payable and Receivable Operations Unit: Responsible for the daily accounting operations activities including invoice payments and accounts receivable processing. Oversees contract development and approval, purchasing of general supplies, asset management, and the DPS Purchasing Card program. Provides budget development, tracking, and monitoring services.

Payroll and Expense Operations: Provides support to all DPS staff for payroll and expense reimbursement processing.

Procurement Office: Provides general procurement and contract development support services to all DPS Divisions. Provides guidance to DPS Divisions on compliance with all State and Federal procurement rules and regulations

**DEPARTMENT OF PUBLIC SAFETY
FISCAL YEAR 2019 BUDGET PRESENTATION
Key Budget Issues**

Vermont State Police Key Budget Issues:

- **Recruit, retain and develop both VSP Troopers and VSP dispatch professionals:** The current national climate has had a significant impact on the number of applicants for police positions throughout the nation and that has also impacted agencies within Vermont to include the VSP. The VSP are right in the middle of one of the most critically important hiring periods in the history of the organization as the VSP stands to lose more than 30 percent of the organization to retirement and normal attrition over the next several years. The VSP needs to make every attempt to stay at the authorized strength of 327 (332 when we finalize a new grant focusing on heroin enforcement). If they are unable to stay at the authorized strength during each six-month hiring cycle it will be impossible to keep pace or catch up based on a number of factors, to include the overall number of applicants and a limited number of seats in the Vermont Police Academy.

- **Replace the VSP out of warranty cruiser cameras:** The VSP has deployed cruiser cameras in every marked state police cruiser for well over a decade with the most recent version being deployed approximately 5 years ago. The warranty on the current units is about to expire and the company has refused to extend the warranty based on the condition of the units. These cameras record everything that occurs within view of the cruiser at any time that the vehicle is running. The VSP cruiser cameras currently record onto DVD and store the data consistent with VSP policy. The VSP is in the process of determining the costs to replace these units as well as identify the costs associated with storing the data within a cloud based storage solution. The VSP anticipates that these costs will be closely associated with a body camera solution and that the combined costs will be approximately two million dollars with an additional annual storage cost that has yet to be determined.

- **Identify funding to purchase and equip our members with body worn cameras:** To fully take advantage of what appears to be an integrated technology combining cruiser cameras and body cameras into one storage platform the VSP are attempting to identify funding. The integrated solution will afford members the ability to record interactions with the public from the perspective of the cruiser as well as from the perspective of a body worn camera.

- **Identify funding to update our current Tasers:** Members of the VSP Field Force Division who wear the uniform and most often interact with members of the public are assigned Tasers. There are most versatile, updated versions which include an internal mechanism to measure whether the device is functioning within manufacturing standards. The newer devices meet the criteria as outlined by the legislature last year for Taser requirements.

- **Identify funding to replace our aging fleet:** Historically, the VSP Fleet rotation occurs when marked vehicles reach approximately 100,000 miles. Funding levels dictate the age of our fleet and our ability to replace vehicles at safe and appropriate intervals. In order to keep pace with the needs of the VSP fleet the annual fleet replacement budget requirement is approximately 2.2 million annually.

Criminal Justice Services Division Key Budget Issues:

- **Marijuana Program:** Significant patient growth continues to challenge staffing levels and operating systems (16% between February 2017 and June 2017) while meeting mandated deadlines. Additionally, increasing administrative overhead is expected due to expansion of the dispensary program (the number of dispensing locations is expected to increase from 4 to 10 in 2018).
- **Sex-Offender Registry:** A focus will continue to be increasing data integrity while improving program efficiency. Increased demand for information continues to pressure information systems and justice information sharing will continue to be explored.
- **National Incident Based Reporting System:** Support for law enforcement agencies will continue with a focus on providing hands-on training to officers in the field. Concurrently a focus on data reporting completeness and accuracy will challenge available resources to address recent under-reporting by agencies across Vermont.
- **Record Check Processing:** Fingerprint-supported criminal history requirements continue to expand across both the governmental and private sector with no additional resources to process increased volume (37% increase since 2010). Similarly, program complexities continue to be introduced at the federal (National Sex Offender Registry checks) and state (all employees with access to tac information) continue to add processing complexity. This increasing program complexity intersects with higher processing volume creating additional workload and resource challenges.
- **Radio Technology Update Funding:** RTS supports numerous land mobile radio networks and systems statewide, as well as, telephone systems outside the public telephone network that support the public safety and law enforcement mission of the Department. Some of the equipment is aging out of its useful life expectancy as technology evolves and as legacy systems wear out. For example, RTS is operating some telephone systems for which the manufacturer of the hardware and software has gone out of business. As these are mission critical functions, funds are needed to update this equipment before a failure creates a public safety emergency.
- **Unfunded and Under-Resourced Workloads:** Because RTS has a program support function for other divisions in DPS, important projects in those other divisions assume RTS can rise to the occasion and deliver the services and technology without funding or additional personnel. While a “best effort” is made to meet expectations, unanticipated new workloads create turmoil within the RTS workforce and adverse impact on day-to-day operational capabilities. A similar situation exists with regard to recoupment of costs associated with providing systems and services to non-DPS entities. As with OTM, our charge-back program for cost-recovery is in need of revision to more accurately recover the actual costs of services provided.

- **Technician and Program Staffing:** RTS relies on a technically skilled staff of communications technicians to operate and maintain statewide land mobile radio systems, the high-capacity and redundant digital microwave carrier system, secure intra-state and inter-state data communications system and DPS internal telephone systems. In recent years our statewide distribution of technicians has been reduced, while our deployment of new, more complex technologies has increased. We need to re-establish two technician positions lost through attrition and department-wide budget cuts. RTS needs to add a technician position to serve the southeastern portion of the state and a technician to serve the southwestern portion of the state. We need to re-establish a headquarters-based technical position to provide a minimal second-layer of technical staffing to support and provide back-up to the telephone and VLETS functions within RTS. Both the telephone and VLETS areas are staffed by a single person which creates hardships for our customer base and backlogs of work when either individual is absent. Additionally, there is very limited administrative support for RTS so that all clerical type duties have to be performed by program staff.

Vermont Emergency Management Key Budget Issues:

- VEM will lose the remainder of Radiological Emergency Response funding at the close of FY 18. Down from approximately \$2.3 million when Vermont Yankee was operating, the fund now holds \$300,000 this fiscal year to support preparedness work in the former Emergency Planning Zone. Consistent with the plant's regulatory obligations off-site emergency preparedness work for radiological emergencies is no longer required and therefore funding will cease. The State of Vermont has historically benefitted from the strict preparedness requirements that ensured planning, training and exercise at the State Emergency Operations Center and local level occurred steadily which resulted in enhanced competencies to respond to all-hazards. With the lack of funding, VEM must rely on federal funding to continue to support those competencies.
- In the FY 14 Big Bill, the legislature supported funding for recovery and mitigation positions at VEM for a period of 5 years. In the time since that funding was approved the staff of the Recovery and Mitigation Section have effectively lead recovery efforts from Tropical Storm Irene and several other federally declared disasters. They have implemented hazard mitigation strategies that have proven to lessen the impact of disasters by stopping repetitive losses. They play a critical role in ensuring Vermonters land on their feet by pursuing every federal dollar available and sourcing them to get the best results. VEM seeks to continue receiving general funds with a lift on the current restriction to only use the money for recovery staff salaries. Lifting this restriction will allow VEM to fully support the operational needs of the section and to integrate their efforts with the rest of the Division more cohesively.
- VEM's primary funding source is the FEMA Emergency Management Performance Grant. It supports most of the salaries of the Division as well as all of the operational costs. It also supports emergency planners at the Regional Planning Commissions to accomplish preparedness tasks consistent with the requirements of the grant. Without county-level emergency managers (which exist in most other states), Vermont relies on a strong partnership with the RPC's to support local preparedness. The loss of the Vermont Yankee funding coupled with the stagnant growth of federal preparedness dollars has created a pivotal point for VEM in which we will no longer be able to accomplish baseline emergency preparedness, response, and recovery tasks without additional investment from the State of Vermont. Staffing costs have increased over the last several years and the federal funding has not. Therefore, VEM will be forced to cut critical planning support at the local level and will not be able to support contracts for emergency warning and response systems such as VT Alert and river flood gauges.

With additional funding, VEM will split the funding of several employees currently fully supported through EMPG to free up federal dollars for operational costs without impacting local planning support. Without the additional requested funding outlined in our budget, Vermont's capability to prepare for, respond to, and recover from the next disaster will be severely diminished.

Fire Safety Key Budget Issues:

- **Financial (Fire Academy and USAR):** The limited general fund revenue we receive pays for 3 full time staff at the fire academy in Pittsford and they are expected to administer/manage the delivery of fire service training to thousands of first responders. The academy lost two positions 4 years ago and we have lost another critical position to the early retirement incentive program. The academy needs of a full-time curriculum developer to meet the demands of the fire service. The volunteer fire service is very fragile and its critical we develop incentives to increase volunteerism and retention within the fire service. The Fire Academy is operating with only 7 full time staff and we are struggling to meet the training needs for first responders our primary mission. We need more staffing at the academy. We have requested \$350,000 in general funds to support the day to day operation of the USAR Team for sustainability and operational readiness.
- **Permitting:** The sheer volume of new construction projects across the State in the past several years has challenged the Division of Fire Safety to provide business owners, developers, contractors, architects, engineers, and municipalities a timely review of plans and issuance of building permits. Fire fatalities and injuries occur most often in residential occupancies where people sleep. The division was allocated 4 inspector positions back in 2006-2007 by the legislators to inspect existing residential occupancies to address the fire fatality problem in Vermont. Conducting existing residential inspections improves the housing market by requiring minimum safety standards increasing property value and contributing to a healthier and safer living environment. These resources have been diverted to inspect new construction and review plans to reduce delays in the issuance of building permits allowing businesses in Vermont to build without delays. Delays in the issuance of permits is costly to developers and owners and cast a negative shadow on our operation. We are currently engaged in a few permit improvement initiatives resulting in faster turnaround time issuing permits. Additionally, one full time Assistant Fire Marshal position in our Williston Regional Office is now allocated to conduct purchase and sale inspections which is a non- statutory requirement. The requests for these inspections has now extended to our 3 remaining regional offices resulting in more demand on our services. The significant increase in request for inspections comes at a time when we are trying to focus on improving permits to support economic activity and reduce the cost of doing business in Vermont. If we do not conduct purchase and sale inspections, real-estate transactions (closings) would come to a halt therefore, we conduct these inspections to support the real-estate market and Vermont's economy. We are struggling immensely trying to keep up with these inspection requests. The division would also be remiss if we did not suggest we be granted flexibility in managing our special fund carry forward revenue when it exist, allowing us to serve the State more effectively and efficiently.
- **Information Technology:** The division receives approximately 30,000 third party hard copy inspection reports which are manually entered on our custom data base. This process is extremely cumbersome and inefficient. We also receive thousands of checks, several thousand permit applications, thousands of work notices and many other paper documents. We need to purchase new software to take advantage of informational technology to reduce the risks involved in handling large amounts of money, to expedite our business processes, provide a document management system reducing filing and paper storage, and consolidate IT between division departments and most importantly to improve efficiency of services.

- **USAR:** The USAR Team is very fragile meaning the team's operation and funding mechanism has very little flexibility without negatively impacting the ability of the team to respond to support local incident commanders and local municipalities. Funding for the team is solely dependent on Homeland Security. All available assets (equipment) is owned by municipalities making it extremely challenging to acquire logistically in time of need. Many incidents involving the USAR Team stem around swift water rescue requiring precise and pre-calculated responses because of the life or death situation. The Team is currently managed by a temp employee and we are in the process of converting this to a full time limited service position. Additionally, we have requested \$350,000 in general fund revenue allowing the team to operate much more efficiently by being able to purchase sustainability items currently not authorized by Federal Funds. We are also in the process of requesting permission to acquire USAR assets from the City of Colchester which would allow the team to have access to needed equipment 24/7.

Vermont Forensic Laboratory Key Budget Issues:

- **Statutory change needed for destruction of firearms:** Title 20 § 2305, Disposition of unlawful firearms, calls for certain firearms to ultimately be turned over to the State Treasurer's Office for public sale. The Treasurer's Office is unable and unwilling to physically receive these firearms. At this point in time, approximately 200 firearms are being held at the Forensic Laboratory pending a determination of their fate. Another ~1000 are stored in the field as the VFL is no longer able to accept firearms for disposition due to space constraints.
- **Backlog of controlled substance cases:** Due to the ever-growing drug epidemic, more cases are being submitted to the laboratory for drug analysis. Unfortunately, the increase in submissions has not been matched with additional staff so the lab is straining to prevent the backlog from rising significantly.
- **Lack of Latent Print Examiners:** Until recent years, the Forensic Laboratory possessed two positions which were allocated as Latent Print Examiners. One of these was swept by the Administration and the other reclassified to assist another section with backlogs. Without any qualified examiners on staff, the laboratory is contracting this service with an outside vendor in order to meet the needs of the field (i.e. Court deadlines, rush requests, etc.). The current backlog of Latent Print cases is ~500 and the Laboratory is spending approximately \$5-10,000/month on the contracted services. While meeting the immediate needs of the criminal justice partners, this is not a sustainable business model.

Administration Division Key Budget Issues:

- **Agency of Digital Services (ADS) Transition:** The new ADS staffing and chargeback model will need to be closely monitored at DPS to fully understand its' impacts of the DPS budget in FY19 and thereafter. The accuracy and predictability of the ADS chargeback model is critical to DPS as unanticipated costs will be very difficult for DPS to absorb and service level issues will be very problematic. We will be watching this very closely in FY19.

- **Administration Division and DPS-wide Policy Development and Compliance Auditing:** Continuing to work to ensure that DPS-wide policies are in place for all key administrative processes. Many new policies and procedures have been developed to ensure risk areas are identified and controlled, and this effort will continue into FY19. Administration's Audit Unit has also performed internal audits of key processes in FY18 and these will continue and expand in scope in FY19.
- **General Procurement Staffing Issues:** DPS is very understaffed in the procurement area. We have only two positions handling purchasing, contracts, and asset management, so we must utilize our procurement staff as coordinators rather than as a true procurement function. Program staff within the Divisions must be more heavily involved than they should be or have time or training to be in procuring goods and services. This takes program staff away from their key responsibilities and because these processes are complex there are often errors that lead to delays and rework.
- **Asset Management Challenges:** A specific area of concern is asset management. Our reliance on program staff to record, monitor, and inventory assets across all our locations has resulted over the years in discrepancies in our asset inventory and subsequently has led to Single Audit findings. We have now implemented new policies and procedures to manage DPS inventory and tracking of assets. This involves identifying "Asset Custodians" for each of our locations throughout the State, training them in their responsibilities and the new procedures, and providing new barcoding equipment and software to support this effort.
- **Improve Technology Utilization:** Utilize technology more effectively to streamline key administrative processes in the face of ongoing staffing issues. Proper technology will not only create efficiency within the Admin/Finance division, but also across all DPS Divisions who must depend upon our Division to accomplish their missions.
- **Staff Workload/Turnover Concerns:** As staffing resources have been stretched, positions eliminated, and workloads increased, the stress on our staff has led to a concerning increase in staff turnover in FY16 after many years of stability. In an area where minute attention to detail is critical, the loss of experience and organizational memory is of much concern. We have identified technology improvements that would help to create efficiencies and risk control thus decreasing frustration and stress, but it has also been extremely difficult to get technology projects approved to move forward. It is a key focus in FY18 and 19 to find ways to provide some relief for staff and improved outcomes through technology improvements and maximized staff utilization.
