**Subject:** Appropriation for Study of Carbon Pricing

Dear Theresa Utton-Jerman,

Please accept my comments in support of conducting the study on how to implement a program to price carbon.

Carbon, as a known pollutant (in association with many others) is threatening the wellbeing of Vermont, future generations, and indeed the functional integrity of life on our planet.

Please budget for, and fund, this study to help guide Vermont policies, and our world, toward a sustainable path that correctly prices the use of fossil fuels and mitigates its impacts on the poor, the future, and all of us.

Thank you,

Ned Swanberg  
Montpelier, VT
