

VDH Budget Highlights FY '18

- Introduction
- □ Performance Management at Health
- Strategic Prevention Activities across Health
 - Chronic Disease
 - Alcohol and Drug Programs
 - Maternal and Child Health
 - Infectious Disease
 - Environmental Health
 - Preparedness and EMS
- Budget ups and downs

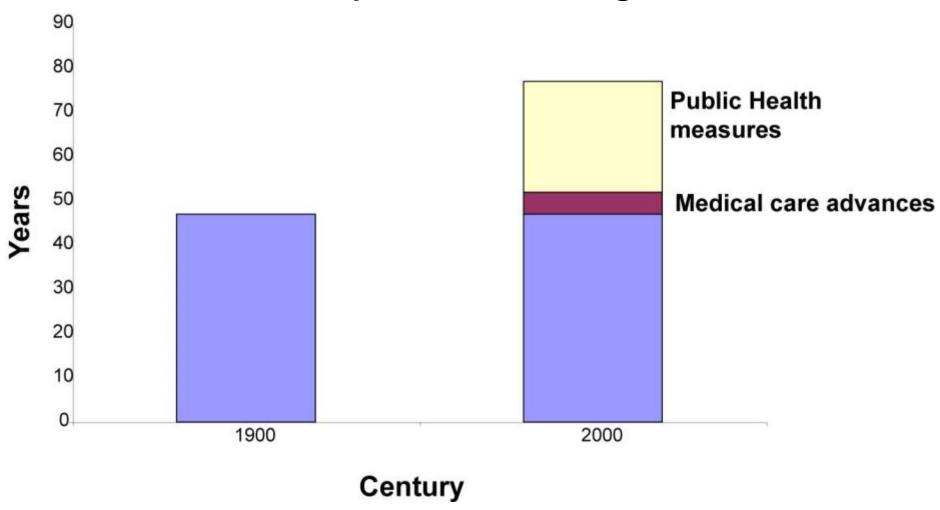

What is Public Health?

What we, as a society do to collectively assure the conditions in which people can be healthy

- Institute of Medicine, 1988

Public Health = Healthy Populations

Improvements in Longevity 100 years of Progress

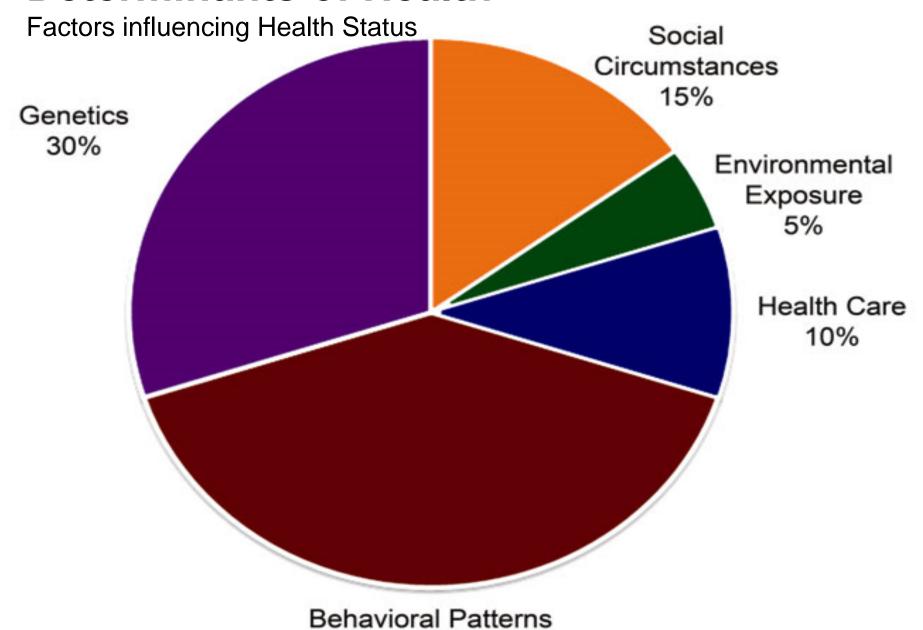

Public health keeps kids healthy and communities strong

Public health and prevention programs in your community:

Determinants of Health

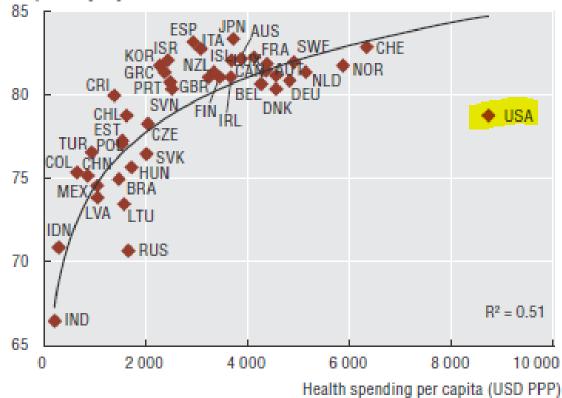

40%

U.S. High Health Spending ≠ Excellent Health Outcomes

Life expectancy at birth and health spending per capita, 2013 (or latest year)

Source: OECD Health Statistics 2015, http://dx.doi.org/10.1787/health-data-en.

StatLink http://dx.doi.org/10.1787/888933280727

Public Health Practice

- **Data Driven** What we know about the distribution of disease and disability
- □ **Evidence Based** What we know works to improve health and well-being
- Strategic Prevention Where we focus our action to address preventable disease and disability

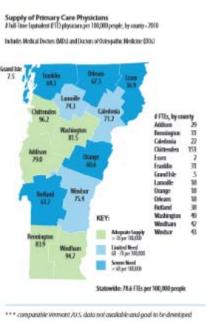

Data to Drive Decisions

Data to Drive Decisions

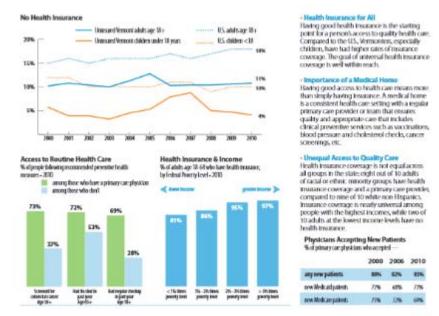

Measure characteristics of:

- People
- Places
- Over time

- Data to understand causal and noncausal relationships
- Data to plan and evaluate interventions for improvement
 - Prevention improvements
 - Access and systems improvements

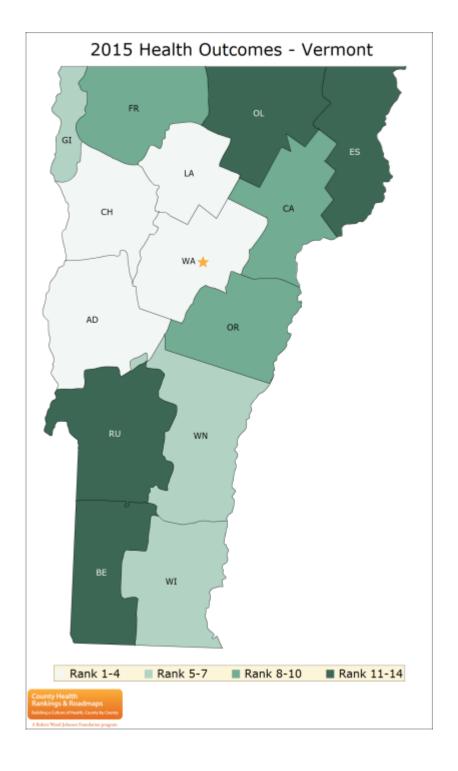

Vermonters are not equally healthy

The overall rankings in health outcomes represent how healthy counties are within the state. The healthiest county in the state is ranked #1.

The ranks are based on 2 types of measures:

- how long people live
- how healthy people feel while alive

EQUALITY VERSUS EQUITY

In the first image, it is assumed that everyone will benefit from the same supports. They are being treated equally.

In the second image, individuals are given different supports to make it possible for them to have equal access to the game. They are being treated equitably.

In the third image, all three can see the game without any supports or accommodations because the cause of the inequity was addressed. The systemic barrier has been removed.

State Health Improvement Plan • 2013-2017

State Health Improvement Plan (SHIP)

The Health Department's priorities:

GOAL 1: Reduce prevalence of smoking & obesity

GOAL 2: Reduce the prevalence of substance abuse and mental illness

GOAL 3: Improve childhood immunization rates

Factors that Affect Health

Smallest Impact

Counseling & Education

Clinical Interventions

Long-lasting
Protective Interventions

Changing the Context to make individuals' default decisions healthy

Largest Impact

Socioeconomic Factors

Examples

Condoms, eat healthy be physically active

Rx for high blood pressure, high cholesterol

Immunizations, brief intervention, cessation treatment, colonoscopy

Fluoridation, 0g trans fat, iodization, smokefree laws, tobacco tax

Poverty, education, housing, inequality

Determinants of Health and Equity

Affordable, Healthy, Local Food

Equitable Law and Justice System

Healthcare + Physical Health, Mental Health and Substance Use Prevention Services

Family Wage Jobs and Economic Prosperity

Recreation, Parks and Natural Resources

Clean and Sustainable Natural Environments

Safe and Efficient Transportation

Quality Education

Affordable, Safe, Quality Housing

Strong, Safe and Vibrant Communities

Early Childhood Development

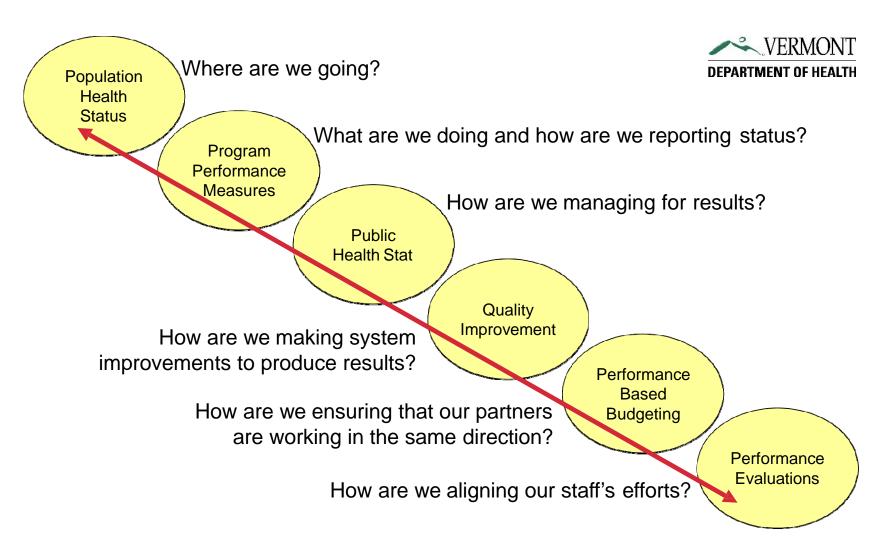

Civic Engagement and Community Connections

Core Values: Equity • Affordability • Access

Performance Management 18 | Vermont Department of Health

Performance Management Framework

Framework Language

DEFINITIONS

(Language Discipline)

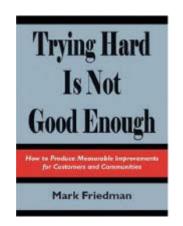

POPULATION ACCOUNTABILITY

RESULT/OUTCOME

A condition of well-being for children, adults, families or communities. Healthy children; Youth graduate on time; Families are economically stable.

INDICATOR

A measure which helps quantify the achievement of a result. Obesity rates; Graduation rates; Median family income.

STRATEGY

A coherent collection of actions often implemented as, programs, initiatives, systems, and services that have a reasonable chance of improving results.

Let's Move, Promise Neighborhoods, CHOICE Neighborhoods, Voluntary Income Tax Assistance

PERFORMANCE ACCOUNTABILITY

PERFORMANCE MEASURE

A measure of how well a program, agency, service system or strategy is working.

Three types: 1. How much did we do?

2. How well did we do it?

3. Is anyone better off?

= Customer Results

0	ОМСН	Mothers and young children are healthy ■	Time Period	Actual Value	Target Value	Current Trend

HOW HEALTHY ARE WE? PUBLIC HEALTH DATA EXPLORER

Vermont continues to be one of the healthiest states in the nation do but there are challenges ahead. To meet these, we track, measure, report on, and apply data in order to achieve our shared goals for improving public health. Our data explorer allows you to access this information, view

trends over time, and visualize the indicators on Vermont maps. The data explorer highlights data that is part of Healthy Vermonters 2020 and Environmental Public Health Tracking by bringing together environmental and health data in one place. This data should be used to assess and understand

health and well-being in Vermont. It can be used to guide decision making, apply for funding, engage community partners, and demonstrate achievements.

The public health data explorer starts with selecting from two different starting points:

HEALTHY VERMONTERS 2020

Healthy Vermonters 2020 is the State Health Assessment Plan that captures our priority outcomes and indicators for the decade. The HV2020 Quick Reference digives a quick look at the indicators and Vermont's progress toward our goals.

- · The data explorer visualizes 134 population indicators with trend lines showing progress to our 2020 goals, and maps comparing the data at the county, health district, and hospital service area levels. Explore the interactive maps and trends that help us quantify the achievement of priority outcomes.
- Scorecards are interactive "report cards" that show how well Vermont is doing relative to our desired outcomes in 2020. They display statewide population data and program performance measures that support a transparent and accountable health department. They also include additional information on why the indicators are important and the actions we are taking to achieve those goals.

Click here to explore by County, Health District, or **Hospital Area**

EXPLORE HEALTHY VERMONTERS 2020

ENVIRONMENTAL PUBLIC HEALTH TRACKING

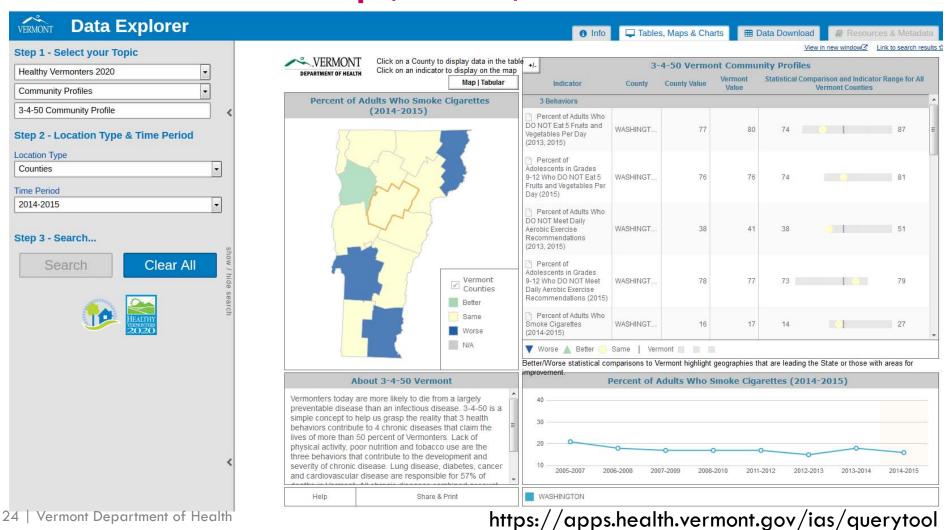

Environmental Health Public Health Tracking is an ongoing national effort to better understand how environmental hazards can contribute to certain illnesses. Vermont is one of 25 states and one city funded by the Centers for Disease Control and Prevention to develop a state and national tracking network of anticonmental and health data for the public policy makers, recorrehers and appeales. These data a

HOME / ABOUT US /

HOW ARE WE DOING? PERFORMANCE SCORECARDS

PERFORMANCE MANAGEMENT & **SCORECARDS**

The Health Department actively uses performance data to improve the health of Vermonters. We want to know how well we and our partners are performing, so we can adjust public health strategies accordingly.

This involves the strategic use of performance standards, measures, progress reports, and ongoing quality improvement efforts to ensure we are achieving desired results. The performance management framework guides our efforts.

> Performance Management Framework

The performance scorecards measure our efforts. These interactive report cards show how well Vermont is doing compared to our desired outcomes. Scorecards display statewide population data and program performance measures that support transparent and accountable government. They are built according to Results Based Accountability TM & and together provide decision-makers with a consistent way to use data to manage performance.

In contrast, the Public Health Data Explorer is the primary tool for accessing regional population data with maps, trends, and community profiles. At this time, the Data Explorer does not focus on performance but may be beneficial in your data-driven discussions.

Programmatic Performance Measures for Budgeting

Population Accountability

This Scorecard demonstrates the programs and performance measures from the Health Department that have been included in the Agency of Administration's Performance Budgeting Exercise. (Established FY2017) Target Current OA Vermonters are healthy (PPMB) 2014 7% ubstance Abuse Percent of persons age 12 and older who need and do not receive alcohol treatment → 1 Percent of persons age 12 and older who need and do not receive illicit drug use treatment 2014 3% 2014 18% % of adults who smoke cigarettes Current OA Vermont's children are ready for school (PPMB) **7** 3 2015 76% % of children age 19-35 months receiving recommended vaccines (4:3:1:4:3:1:4) **7** 2 2015 90% ct 186 % of kindergarteners fully immunized with all five vaccines required for school Current 🕟 Vermont's youth choose healthy behaviors (PPMB) 🗈 2015 22% 20% **>** 2 Percent of adolescents in grades 9-12 who used marijuana in the past 30 days ubstance Abuse % of adolescents in grades 9-12 binge drinking in the past 30 days 2015 16% 15% 2015 11% 10% **>** 3 % of adolescents in grades 9-12 who smoke cigarettes

Programmatic Performance Measures for Budgeting

Program Accountability

P AOA Alcohol & Drug Abuse Programs (PPMB) ■	Time Period	Actual Value	Target Value	Current Trend
Substance Abuse School Screenings: Are we referring students who may have a substance abuse problem to community resources? Measured as percent of students at funded schools who screen positive for possible substance abuse disorders who are referred for a substance abuse assessment.	Q1 2016	90%	90%	7 1
Substance Abuse Social Supports: Are youth and adults leaving treatment with more support than when they started? Measured as percent of treatment clients (excluding residential detoxification and detoxification treatment) who have more social supports on discharge than on admission.	Q2 2016	18%	25%	7 1
Substance Abuse Access to MAT: Are adults seeking help for opioid addiction receiving treatment? Measured as the number of people receiving Medication Assisted Treatment per 10,000 Vermonters age 18-64.	Q3 2016	134	135	7 14
P AOA Immunization Programs (PPMB) ■	Time Period	Actual Value	Target Value	Current Trend
Timmunization % of public & private providers enrolled in VFC who have received a VFC and/or AFIX visit that includes feedback on practice level IMR completeness and coverage rates	2015	93%	60%	7 ₁
Immunization % of Kindergarteners provisionally admitted to school	2015	4.6%	5.0%) 2
Immunization # of provider offices that receive IMR training	2015	59	15	7 1
P AOA Tobacco Control Program (PPMB) ■	Time Period	Actual Value	Target Value	Current Trend
Tobacco % of 802Quits registrants who complete 4 or more sessions	Q3 2016	32%	35%	7 1
Tobacco Anti-tobacco media campaign intensity for low-income adults, in Gross Rating Points (GRP) per quarter	Q3 2016	0	1,200) 1
Tobacco % of youth groups that educate local or state decisionmakers on smoke free policy and retailer tobacco advertising restrictions	2016	81%	100%	> 2

Act 186 – Population Level Outcomes/Priorities Governor's Strategic Plan

% Age 12+ who need and do not receive alcohol treatment

% Age 12+ who need and do not receive drug treatment

% Age 65+ drinking at level of risk

% Age 12+ misusing Rx Drug in the past year

% kids grades 9-12 using marijuana in the past 30 days

% grades 9-12 binge drinking in past 30 days

Affordable Health Care -

All Vermonters have access to affordable quality healthcare

Strong Families, Safe Communities:

Vermont's children live in stable and supported families and safe communities

High Quality and Affordable Education:

Learners of all ages have the opportunity for success in education

AHS 2016-2019 Strategic Plan

Healthy Vermonters 2020

Increase access to substance use disorder services

AHS staff are trained to provide screening for substance use disorders

AHS will increase access to medication assisted treatment

AHS will increase % of people leaving treatment with more supports than at admit

Support healthy people in very stage of life - reduce the percentage of people who engage in binge drinking of alcohol beverages

Decrease % of youth who binge drink - 2020

Decrease % of youth who used marijuana in the past 30 days -2020

% of persons age 12+ who need and do not receive alcohol treatment

ADAP Dashboard

Objective: Prevent and eliminate the problems caused by alcohol and drug misuse.

Indicators:

- % adolescents in grades 9-12 binge drinking in the past 30 days
- % of adolescents in grades 9-12 who used marijuana in the past 30
- % of persons age 12 and older who need and do not receive alcohol treatment
- % of persons age 12 and older who need and do not receive illicit drug use treatment
- % of adults age 18-24 binge drinking in the past 30 days
- % of adults age 65+ who drink at a level of risk

Performance Measures:

- 1) Are we appropriately referring students who may have a substance abuse problem?
- 2) Are youth and adults who need help starting treatment?*
- Are youth and adults who start treatment sticking with it?*
- Are youth and adults leaving treatment with more support than when they started?
- 5) Are adults seeking help for opioid addiction receiving treatment? (under development)
- *Also used by the Dept. of Vermont Health Access

VDH Programs

PROGRAM DEFINITION:

A program is defined as a group of interdependent or interrelated activities directed toward the achievement of a common goal or objective. Programs usually have at least one staff person assigned and represent a discrete area of department focus. Program structure must be maintained to provide consistency in program identification across years.

VDH has approximately 100 programs

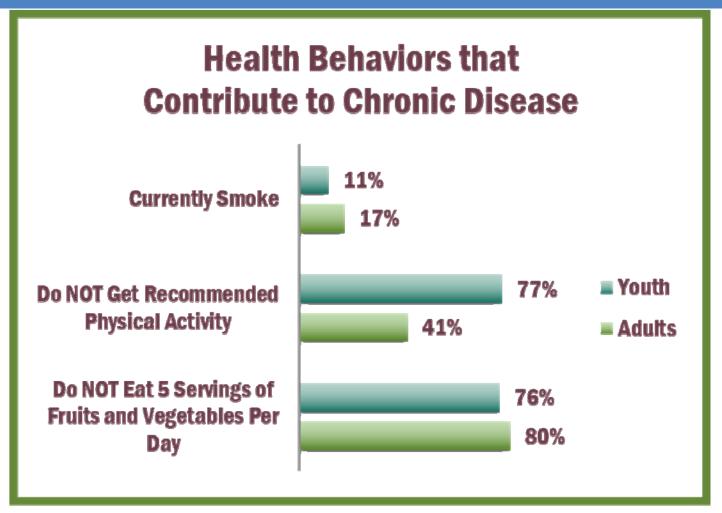

Chronic Disease Highlights

- □ 3-4-50
- □ Oral Health
- □ Tobacco

Health Promotion and Disease Prevention

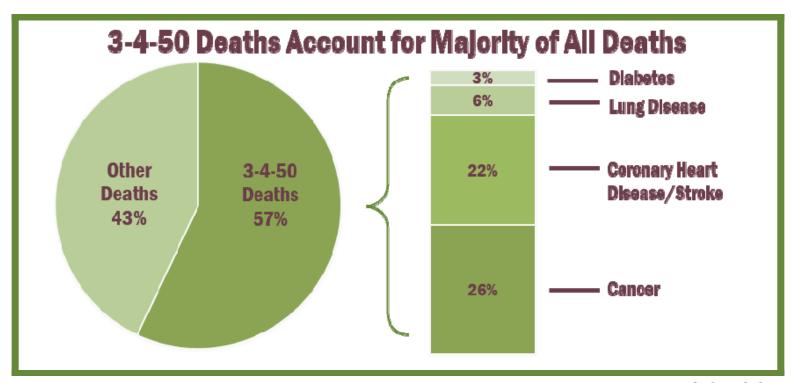

Chronic Disease Prevention: 3-4-50

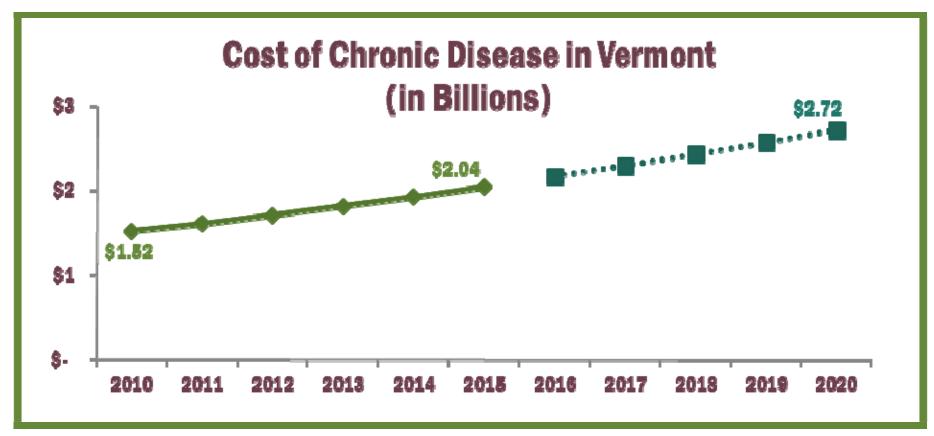

Data Source: 2015 BRFSS and YRBS

Chronic Disease Prevention: 3-4-50

Data Source: 2014 Vermont Vital Statistics

Chronic Disease Prevention: 3-4-50

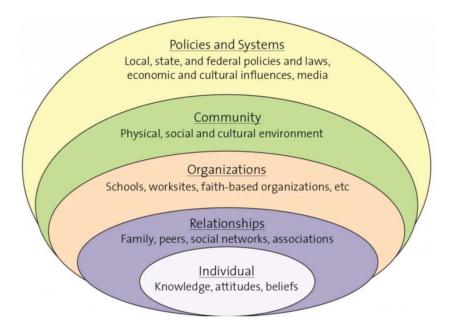

Data Source: Center for Disease Control and Prevention Chronic Disease Cost Calculator

3-4-50 Helps Vermont Meet Our Goals

Multi-sector promotion of healthy behaviors benefits entire communities:

- Students who participate in the USDA School Breakfast Program have better grades and test scores and less absenteeism.
- Physical activity has been linked to better grades, cognitive performance and classroom behavior.
- On average, employers with worksite health promotion programs see 27% reduction in sick leave absenteeism, 26% reduction in health costs and 32% decrease in workers' compensation and disability claims.
- Studies show a 35% increase in physical activity among people who live in communities that have inviting, safe environments for walking, exercise and play.

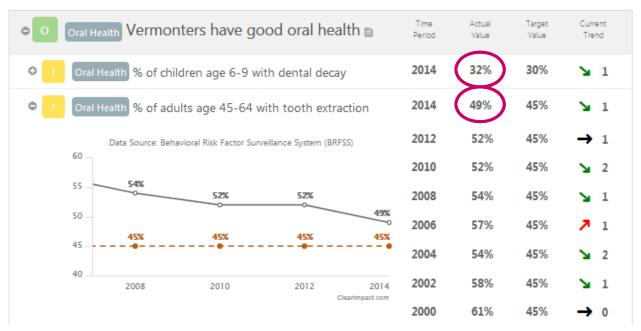

3-4-50 Scorecard

P 3-4-50 Community Community Community ■	Time Period	Actual Value	Target Value	Current Trend
Tobacco # of local secondhand smoke ordinances introduced	Q4 2016	4	-	7 1
Obesity # of municipal strategies completed to increase access to physical activity.	HY1 2016	79	100	7 2
Obesity # of municipal strategies completed to increase access to healthy food.	HY1 2016	48	60	7 2
Diabetes % of Health Service Areas that offer Diabetes Prevention Program workshops	Q3 2016	29	93	1
● P 3-4-50 Organizations ■	Time Period	Actual Value	Target Value	Current Trend
Obesity # of small businesses with written strategies incorporating one or more of the seven VDH priority strategies for worksite wellness.	HY1 2016	94	140	→ 1
Obesity % of schools implementing Farm to School	2015	83%	90%	1
Respiratory # of health care organizations (HCOs) influenced by the State Asthma Program to implement an asthma quality improvement process	2015	2	-	→ 1
School Age % of VT Public Schools indicating they use their EHR to identify, track, and maintain current individual health plans for students with asthma, diabetes, life threatening allergies, seizures	2016	33%	-	7 1

Program Accountability

Good oral health is essential to overall health

- Poor oral health has been linked to other chronic conditions, including diabetes and heart disease -- and wellbeing including access to employment
- Tooth decay is the most common chronic condition in children
- Vermont Medicaid Spends:
 - \$2.5 million a year to treat tooth decay in Vermont children under age 6
 - \$1 million in FY15 for general assistance vouchers for emergency dental care (mostly extracting rotten teeth)

A Vermont child being treated for Tooth Decay

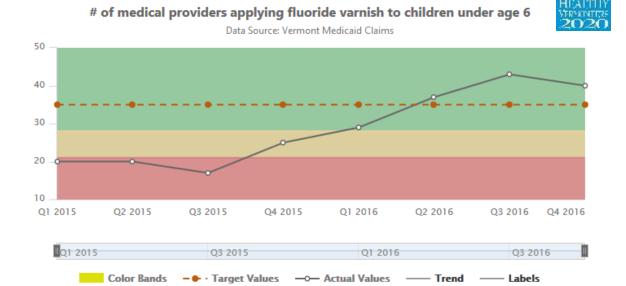

Population Accountability

Office of Oral Health – Prevention Works

 Medical providers beginning to integrate dental health as part of prenatal/pediatric health care

Vermonters lined up to receive free dental care Photo Credit: Bennington Banner

- Community Water Fluoridation (CWF) is safe, effective and saves money
- Silver Diamine Fluoride (SDF) a potential game changer
 - Simple topical treatment that stops tooth decay (different than fluoride varnish)
 - Can also be used by non-traditional health care providers (nursing home staff, drug treatment centers, cancer treatment centers)

 Program
 - Would reduce number of children in hospital for tooth decay

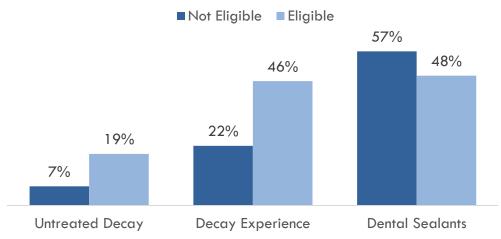

Accountability

Office of Oral Health – Early Intervention

Dental Sealants

- 100% effective at protecting molars from tooth decay
- Less than half (48%) of VT 3rd grade children eligible for school lunch program have dental sealants

3rd Graders eligible for Free/Reduced Lunch more likely to have decay and less likely to have sealants

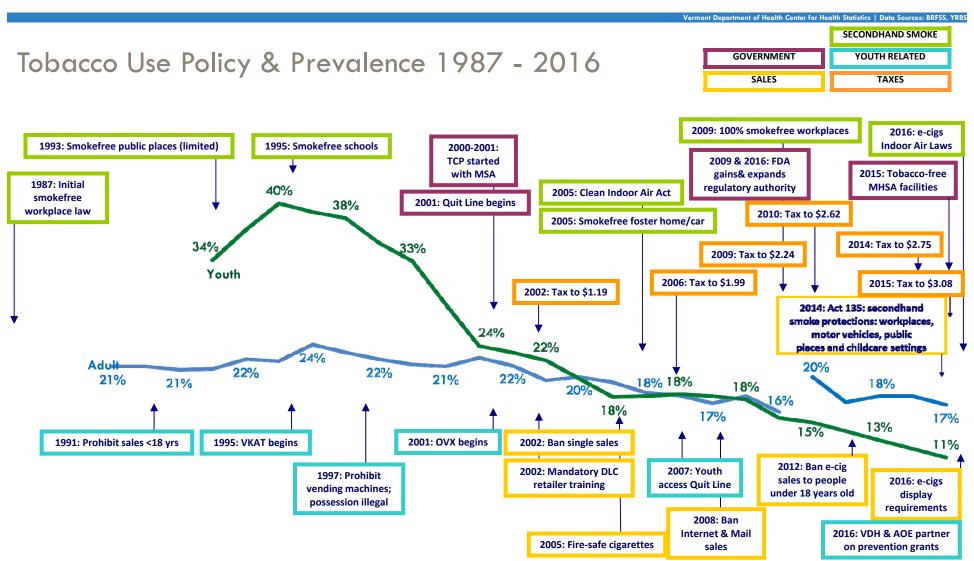

Source: 2013-2014 Keep Smiling Vermont Oral Health Survey of VT Children

Public Health Dental Hygienists (PHDH)

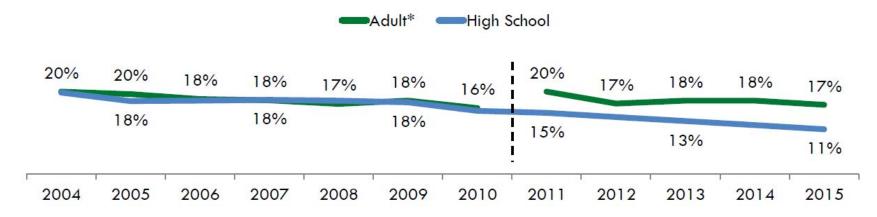

- Work with families enrolled in WIC
- Support early preventive dental health care and VDH oral health programs
- Five out of 12 Offices of Local Health have a PHDH

987 1988 1989 1990 1991 1992 1993 1994 1995 1996 1997 1998 1999 2000 2001 2002 2003 2004 2005 2006 2007 2008 2009 2010 2011 2012 2013 2014 2015

Tobacco Control Program

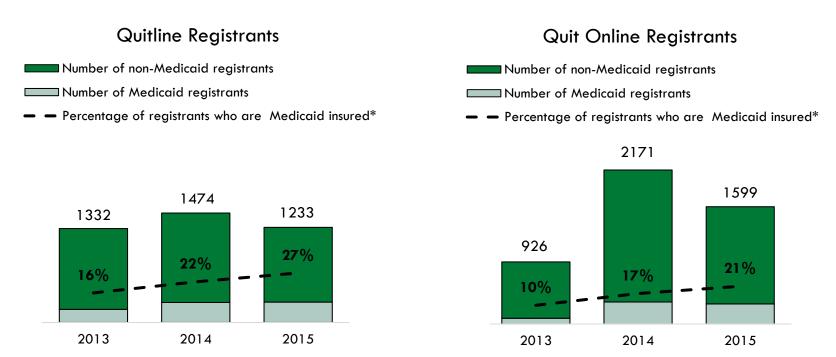

- Youth and adult smoking rates have decreased significantly
- Areas of Concern:
 - 25% of youth report using some form of tobacco in past 30 days (YRBS 2015)
 - Smoking rate is higher among adults with lower income, less education, poor mental health, and substance use

Population Accountability

Medicaid-Insured: VT Quitline & Quit Online

- Although the total number of registrants to Quitline and Quit Online decreased since 2014, the number of Medicaid-insured remained stable
- This is why the proportion of Medicaid-insured registrants significantly increased

Source: National Jewish Health, Vermont Quitline and Quit Online Intake Data, 2013-2015 * The number of Medicaid insured excludes registrants that are insured by both Medicaid and Medicare

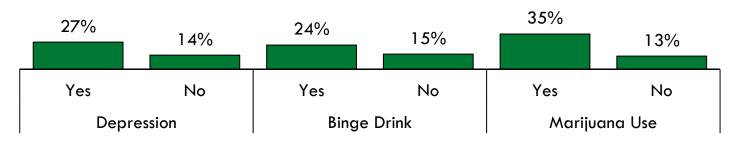

Program Accountability

Wendell at the Superbowl

Smoking, Mental Health & Substance Use

Smoking Prevalence Among Adult Mental Health and Substance **Abuse Populations**

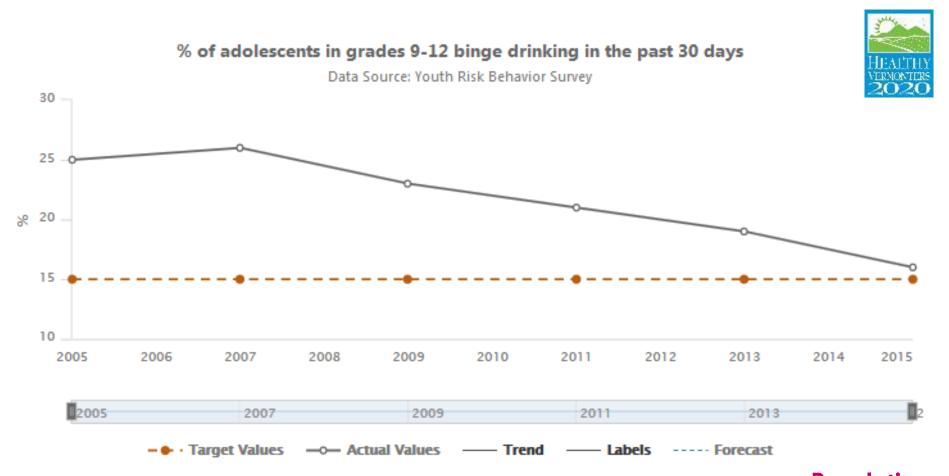

Source: VT BRFSS 2015

- Smoking rate significantly higher in adults with mental health and substance abuse conditions
- Tobacco Control Program provides trainings, technical assistance and quit resources to mental health and substance abuse treatment facilities
- Partnership with Department of Mental Health Culture of Wellness Initiative

Alcohol and Drug Highlights

- □ Binge Drinking
- □ Access to Medication Assisted Treatment

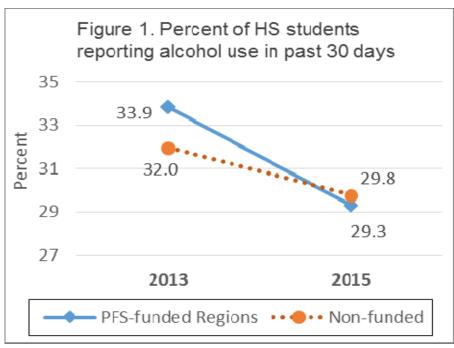

8-year downward trend in binge drinking students

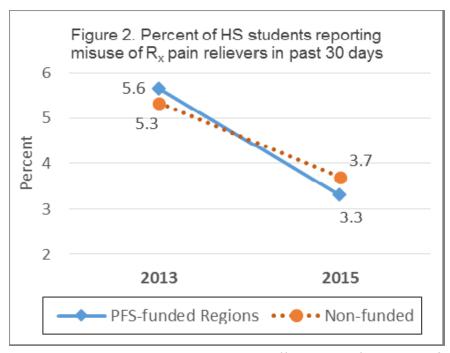

Population Accountability

Partnership for Success Strategy - Evaluation

Partnership for Success (PFS) regions saw less alcohol and prescription drug misuse after the PFS interventions than non-PFS regions.

PFS effect was significant at p<.05

PFS effect was significant at p<.10

Binge Drinking Prevention

- Regional Prevention Partnerships
 - Educate communities on policies that reduce youth access to alcohol
 - Family education and support
 - Coordinate partners schools, community agencies, law enforcement
- School-based grants in selected SU's support educational programs and screening
- ParentUpVT.org social media and website
 - Prevention tools and resources
 - "Tips from Parents Like You: How to Ask"
 - more than 104,550 views since May 2016

Working together to eliminate substance abuse in Vermont

ParentUpVT

Parent hears social media message on Pandora and links to ParentUp tips on how to talk with their kids about substance abuse.

School-based **Substance Abuse Services**

Infectious Disease Highlights

□ Immunization

Immunization – in the right direction!

Vermonters are protected against vaccine- preventable diseases.	Time Period	Actual Value	Target Value	Current Trend
of children age 19-35 months receiving recommended vaccines (4:3:1:4:3:1:4)	2015	76%	80%	≯ 3
o Immunization % of kindergarteners with 2 or more MMR doses	2015	94%	95%	≯ 2
o Immunization % of adolescents age 13-15 who have completed the HPV vaccination series	2015	33%	80%	7 2
o Immunization % of adolescents age 13-17 with at least 1 Tdap booster	2015	96%	90%	7 2
Rate of varicella (chicken pox) per 100,000 Vermonters age 17 or younger	2015	19.1	46.4	5 1
o Immunization % of adults age 65 and older who ever had pneumococcal vaccine	2015	76%	90%	7 1
o Immunization % of adults age 65 and older who receive annual flu shot	2015	61%	90% P	≥ 2 opulation

Infectious Disease Highlights

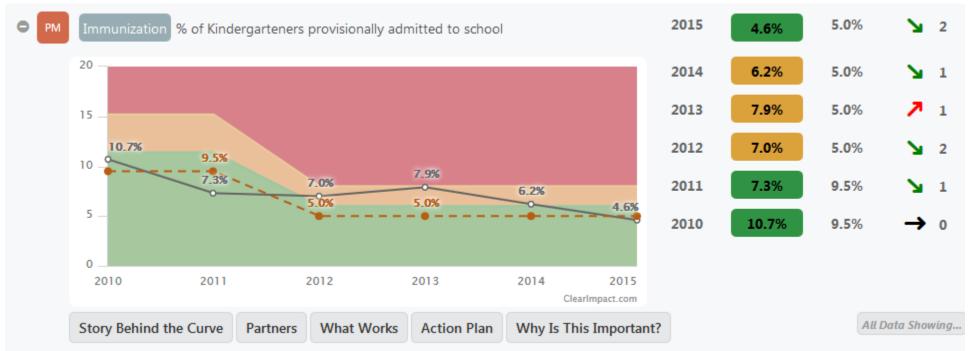

- □ Improved school vaccination rates (% of students who received all required vaccines):
 - entering K=90%
 - \square K-12=93%
- Vaccines for Children providers:
 - 90% received training and compliance visits
 - 56% received quality improvement visits
- □ CDC Awards:
 - Outstanding progress toward HV 2020 pediatric vaccine goals

Outstanding progress toward HV 2020 teen vaccine targets

Immunization & Schools

Maternal and Child Health Highlights

- □ Nurse Family Partnership
- □ Help Me Grow

Nurse Family Partnership in Vermont

- Evidence-based, nurse led, home visiting program for low income 1st time pregnant moms through the child's 2nd birthday
- Program goals are to improve: pregnancy outcomes, child health and development, and economic self-sufficiency
- Screening, referrals, and follow up for: smoking, alcohol and drug use, intimate partner violence, maternal depression and childhood developmental delay
- Positive screens for enrolled Vermont families:

Depression	56%
Intimate partner violence	35%
Tobacco use	46%

Drug use	8%
Alcohol use	3%
Developmental delay	11%

Nurse Family Partnership in Vermont

Nurse Family Partnership in Vermont

Evidence of improved outcomes: Smoking cessation

- 100% of NFP clients are screened for tobacco, alcohol and drug use
- 42% reported smoking cigarettes at intake
- 100% of clients who use tobacco are referred to 802Quits
- 41% of NFP moms who smoked at intake quit during pregnancy
- 29% still refrained from smoking at 12 months postpartum

By comparison: % of clients quit smoking during pregnancy

30%	Nurse Family Partnership clients
24%	All Vermont women
20%	Vermont women with births paid by Medicaid

Statewide system for improving access to existing resources and services for young children and their families.

Proactively addresses family's concerns about their child's behavior and development by making connections to existing community-based services and high quality parent education resources.

Facilitates collaboration between health professionals, early care and education professionals, human services providers, and families in order to better identify and address of the needs of children in Vermont.

Family & Community Outreach

to promote Help Me Grow Vermont and bolster healthy child development through families

Child Health and Education Provider Outreach

to support developmental promotion, early detection, and intervention

Tables, Maps & Charts

What is Environmental Public Health Tracking?

Tracking is an ongoing national effort to better understand how environmental hazards can contribute to certain illnesses. Tracking has identified situations where known environmental hazards have resulted in the occurrence of chronic diseases. One example is the onset of asthma attacks in children who live close to highways.

III Data Download

Resources & Metadata

The Vermont Tracking program is being implemented jointly by the state's Departments of Health and Environmental Conservation. The goal is to build a nationwide network that allows the public, policy makers, and public health officials to use environmental and health data more effectively. To learn more about tracking nationally, visit the CDC National tracking portal.

How do I get started?

The Vermont Tracking portal includes two main components:

- · Data about environmental and health topics
- · Basic information about the same environmental and health topics

Starting at the Tracking homepage, you can choose a topic area to learn about, or you can go directly to the

VDH Food & Lodging Program

- □ Approximately 6,000 licenses issued annually
- □ Estimated 5,000 inspections conducted annually
- □ 2017: 9.5 FTE Public Health Inspectors
- Licensing and inspection of establishments
- Regulatory compliance & enforcement
- Complaint investigation
- Environmental investigations
- □ Technical assistance and education

Climate & Health Program

- Climate change is increasing health risks for Vermonters:
 - Heat illnesses

- Water quality
- Extreme weather events
- Cyanobacteria
- Tick & mosquito diseases
- Allergens & air pollution
- ANNUAL PRECIPITATION In Vermont has increased by almost 7 inches, bave increased

 Average

 Alar TEMPERATURES
 have increased

 ANNUAL PRECIPITATION In Vermont has increased by almost 7 inches, by almost 7 inc
- □ The Climate & Health Program is responding by:
 - Developing a Hot Weather Emergency Response Plan
 - Supporting an Energy-Saving Trees pilot project
 - Integrating health into the Comprehensive Energy Plan
 - Supporting Energy Efficiency & Healthy Homes partners
 - Raising awareness about risks and response actions

Healthy Homes & Lead Poisoning Prevention Program

In 2015 there were 505 children (5% of children tested) under age 6 that had elevated blood lead levels (≥5 µg/dL).

PFOA Blood Testing Goals

- Make sure no additional actions were needed to prevent continued exposure
- Better understand how people in the Bennington community were exposed to PFOA
- Provide community members with their PFOA blood level and how it compares to background levels in the U.S. population

PFOA Laboratory Response

- Lab staff set up temporary operations in Bennington to support clinics
- Processed 478 blood specimens from residents
- Followed strict CDC guidelines for handling
 - Specimens were processed within one hour of collection

Preparedness and EMS

Preparedness Public Health Emergency Response	Time Period	Actual Value	Target Value	Current Trend
Preparedness % of the Burlington/South Burlington Metropolitan Statistical Area population serviced by closed PODs (medicine Points of Distribution)	Q2 2016	17%	20%	7 1
Preparedness Training, Education and Exercising	Time Period	Actual Value	Target Value	Current Trend
PM Preparedness # of total hours of free Continuing Education (CE) completed by Vermont EMS Providers via the web-based LearnEMS platform.	Q2 2016	4,834	1,007	\ 1
* of Vermont Medical Reserve Corps (MRC) volunteers meeting minimum training requirements	Q3 2016	15%	45%	> 3
Preparedness % of Health Department staff trained in their emergency response roles	Q2 2016	33%	75%	7 1
Preparedness Coordination & Coalition Development and Support	Time Period	Actual Value	Target Value	Current Trend
● PM EMS # of Vermont licensed EMS personnel	Q2 2016	2,539	3,300) 1
● MRC # of Medical Reserve Corps (MRC) volunteers	Q3 2016	324	1,000	7 7

Program Accountability

Public Health Volunteer Recruitment and Retention

- Medical Reserve Corps (MRC) target is 1000 members to help support VDH in times of public health emergency
 - Needed over 5x Increase
- Over 75% of Emergency Medical Services (EMS) rely on volunteers to serve their communities
 - Services report recruitment and retention as number one priority for ongoing sustainability
- □ Created Recruitment and Retention MRC and EMS toolkits
 - All 8 MRC units received
 - 83 EMS agencies received

On Call for Vermont

- Campaign to Recruit Volunteers for MRCs and EMS
 - TV Ads
 - Radio Ads
 - Newspaper Ads
 - Website
- Launched January 2015
 - 166 MRC members
- January 2016
 - 254 MRC Members
 - 53% Increase
- January 2017
 - 331 MRC Members
 - 99% Increase

Vermont's 3,000 certified EMS providers-most of them volunteers-provide critical pre-hospital care to people throughout our state. You can too. Connect with your local squad or sign up for training today.

You can help even if you're not a trained medical professional. Vermonters from all walks of life can join Medical Reserve Corps (MRCs) to lend a hand when a disaster or emergency strikes in your community. Join-or form-a local MRC
