

State of Vermont Green Mountain Care Board 144 State Street Montpelier VT 05620

Report to the Legislature

REPORT ON THE GREEN MOUNTAIN CARE BOARD'S PROGRESS IN MEETING ALL-PAYER ACO MODEL IMPLEMENTATION BENCHMARKS for the period of June 15 to September 15, 2018

In accordance with Act 124 of 2018 (H.914)

Submitted to the

House Committees on Appropriations, on Human Services, and on Health Care, the Senate Committees on Appropriations and on Health and Welfare, the Health Reform Oversight Committee, the Medicaid and Exchange Advisory Committee, and the Office of the Health Care Advocate

> Submitted by the Green Mountain Care Board

> > September 15, 2018

Legislative Charge

The Green Mountain Care Board (the Board) is submitting this report pursuant to Act 124 of 2018, "An act relating to reporting requirements for the second year of the Vermont Medicaid Next Generation ACO Pilot Project." Section 2 of the Act provides:

On or before June 15, September 15, and December 15, 2018, the Green Mountain Care Board shall provide to the House Committees on Appropriations, on Human Services, and on Health Care, the Senate Committees on Appropriations and on Health and Welfare, the Health Reform Oversight Committee, the Medicaid and Exchange Advisory Committee, and the Office of the Health Care Advocate written updates on the Board's progress in meeting the benchmarks identified in the Board's Year 1 (2018) All-Payer ACO Model Timeline regarding implementation of the All-Payer Model and the Board's regulation of accountable care organizations.

2018 Acts and Resolves No. 124, § 2.

Introduction

In Act 48 of 2011, the Vermont Legislature established the Board and charged it with implementing health care payment and delivery system reforms. 18 V.S.A. § 9375(b)(1). In Act 113 of 2016, the Legislature established principles to guide the implementation of a value-based payment model that would allow participating health care providers to be paid by Medicaid, Medicare, and commercial insurance using a common methodology that may include population-based payments and increased financial predictability for providers. 18 V.S.A. § 9551.

The Vermont All-Payer Accountable Care Organization Model Agreement (All-Payer ACO Model Agreement or APM Agreement) was signed on October 26, 2016 by Vermont's Governor, Secretary of Human Services, Chair of the Board, and the Centers for Medicare and Medicaid Services (CMS). The APM Agreement aims to reduce health care cost growth by moving away from fee-for-service reimbursement to risk-based arrangements for ACOs; these arrangements are tied to quality and health outcomes. Act 113 complements the APM Agreement by giving the Board regulatory authority over ACOs. 18 V.S.A. § 9382. The Board is implementing Act 113 and the APM Agreement concurrently, as described in the Year 1 (2018) All-Payer ACO Model Timeline found in Table 1 below.

This report covers Act 113 and the APM Agreement implementation for the period of June 15 to September 15, 2018. Table 1 outlines the major activities the Board is undertaking in 2018 to support Act 113 and APM Agreement implementation. The subsequent narrative describes areas of significant work in the June-September 2018 period.

1. ACO Oversight and Monitoring

A. ACO Reporting and Budget Guidance

2018 ACO Reporting and Budget Guidance

On January 3, 2018, the Board approved OneCare Vermont's FY 2018 budget with 18 conditions.¹ The Board will continue to monitor OneCare's compliance with these conditions throughout 2018. Table 2, below, lists these conditions, their due dates, and whether or not they are complete. As a part of the budget order monitoring, OneCare has provided final payer contracts; attribution by payer; financial results for quarters one and two; analysis of their payer contracts and how they align on risk models, payment mechanisms, quality, and attribution methodology; and a report on their pilot capitation program for independent primary care providers. They also provided a proposal that the Board reviewed and approved to purchase aggregate total cost of care protection for their Medicare contract.

2019 ACO Reporting and Budget Guidance

The 2019 ACO Reporting and Budget Guidance was issued on July 24, 2018, following Board approval and input from OneCare, the Office of the Health Care Advocate, and members of the public. The final guidance is posted on Board's website.²

The 2019 guidance is similar in many respects to the 2018 guidance. However, there are important differences. Most notably, the 2019 guidance will require ACOs to report their spending on primary care, including services billed through insurance claims and other primary care spend. This will allow the Board to track, over time, the percent of health care dollars allocated to primary care within and outside of the ACO.

ACO budget submissions are due on October 1, 2018. The Board expects to complete its review of ACO budgets by December 2018.

In conjunction with its review of ACO budgets, the Board will establish benchmarks or financial targets for ACOs participating in the Vermont Medicare ACO Initiative in 2019. The APM Agreement sets limits on the Board's discretion in establishing these benchmarks and, to assist ACOs in developing their 2019 budgets; these limits are described in Part II of the Guidance document.

B. Certification and Ongoing Oversight

An ACO must be certified by the Board in order to receive payments from Medicaid or a commercial insurer through any payment reform program or initiative, including an all-payer model. 18 V.S.A. § 9382(a). The Board provisionally certified OneCare on January 4, 2018 and fully certified OneCare on March 21, 2018.

Under Rule 5.000, once an ACO is certified, the Board will review its continued eligibility for certification annually. The Board will review OneCare's continued eligibility for certification, including its compliance with recent amendments to the statutory certification criteria in 18 V.S.A. § 9382(a), contemporaneously with its review of OneCare's proposed 2019 budget. The Board has approved a form for OneCare to complete for this review. The form is due to the Board by October 1, 2018.

C. Revisions to Rule 5.000

Board staff have identified several potential improvements to Rule 5.000. For example, the timeline for ACO budget review needs to be amended to better track an ACO's budget development process. Staff had planned on presenting the Board with a set of proposed amendments in August 2018 and pre-filing the amendments with the Interagency Committee on Administrative Rules shortly thereafter. However, this timeline has been delayed due to the need to address other, more pressing issues. We now expect to begin the rulemaking process in the first quarter of 2019, and meanwhile have incorporated ACO certification statutory additions into our 2019 ACO review. Rule amendments are still on track, even with a delayed filing.

2. Vermont All-Payer ACO Model Agreement

A. CMS Reporting Readiness

APM Analytics Contract

Following a standard RFP process in 2017, Mathematica Policy Research was selected from a field of ten bidders to be the Board's All-Payer ACO Model analytics vendor. A contract was executed in January 2018. In Q3 2018, work has focused on developing detailed technical specifications for calculating total cost of care according to the All-Payer ACO Model Agreement and running a test report; developing detailed technical specifications for calculating change management at the Board.

Specifying Total Cost of Care and ACO Scale Measures

As reported in the June 15 report, Board staff have collaborated with the Department of Vermont Health Access (DVHA), commercial insurers, OneCare, and Mathematica Policy Research to develop detailed technical specifications for the All-Payer Total Cost of Care measure, a critical reporting metric included in the APM Agreement. These specifications continue to be refined as the contractor develops test reports. A baseline report on Total Cost of Care (covering the 2017

calendar year) is expected in late September 2018, with the first formal Total Cost of Care report (covering health care provided in Q1 2018) expected in December 2018.

In addition, GMCB staff and contractors are working to finalize the technical specification for the ACO Scale measure, which determines the percentage of Vermonters who are participating in qualifying ACO initiatives as part of the All-Payer Model. A report on preliminary Performance Year 1 ACO Scale results, submitted to the Legislature on August 1, 2018, showed that approximately 20% of all Vermonters are participating in a qualifying ACO initiative, including 35% of Vermont Medicare beneficiaries. The report is posted on GMCB's website.³

B. Potential Agreement Changes and Preparation for Performance Years 2-5

Potential Changes in Performance Year 2 (2019): In 2019, the Medicare ACO program active in Vermont will shift to the Vermont Medicare ACO Initiative. The parameters and requirements of this initiative may differ from those of the standard Medicare Next Generation ACO program. Board staff have been working with stakeholders to consider changes that could be made to the standard Medicare Next Generation ACO program as part of the initiative, including:

- *Quality Measure Changes*: Board staff worked with stakeholders, including OneCare and the Office of the Health Care Advocate, to develop and recommend a consensus list of quality measures for the 2019 Vermont Medicare ACO Initiative. This measure list was approved by the Board its July 18, 2018 meeting. Following Board approval, the measure set was submitted to CMS, which approved it on August 28, 2018. Table 3 below lists the approved measures and how they align with the measures in the APM Agreement and with other payers' quality measures.
- *Percentage of Benchmark Tied to Quality*: Board staff worked with stakeholders to develop a recommendation for the percentage of an ACO's benchmark to be tied to quality under the 2019 Vermont Medicare ACO Initiative. Staff anticipate presenting this recommendation to the Board in September 2018 and submitting it to CMS following the Board's approval.
- *Operational changes:* OneCare has requested several operational changes, including a revised notice for Vermont Medicare beneficiaries attributed to the ACO and a change to the Medicare program's governance requirements to align with the governance requirements of Rule 5.000. The Board voted to transmit these requests to CMS on August 1, 2018.

The potential changes described above would be reflected in the participation agreement between CMS and OneCare; they would not require changes to the APM Agreement between CMS and the State.

³ Preliminary ACO Scale Target Performance Per the All-Payer ACO Model Agreement: Performance Year 1 (2018). Available at: <u>https://legislature.vermont.gov/assets/Legislative-Reports/GMCB-Report-on-All-Payer-Model-Scale-Act-124-of-2018-FINAL-8-1-2018.pdf</u>.

Table 3: 2019 ACO-CMS Quality Measures with Alignment Analysis

Measures for 2019 ACO-CMS Quality Framework	APM	BCBSVT	Medicaid
Tobacco use assessment and cessation intervention	Yes	No	Yes
Screening for clinical depression and follow-up plan	Yes	Yes	Yes
Diabetes: HbA1c poor control (part of APM composite)	Yes	Yes	Yes
Hypertension: controlling high blood pressure (part of APM composite)	Yes	Yes	Yes
All-cause unplanned admissions for patients with multiple chronic conditions (part of APM composite)	Yes	No	Yes
30-day follow-up after discharge from ED for mental health	Yes	Yes	Yes
30-day follow-up after discharge from ED for alcohol or other drug dependence	Yes	Yes	Yes
Initiation of alcohol and other drug dependence treatment	Yes	Yes	Yes
Engagement in alcohol and other drug dependence treatment	Yes	Yes	Yes
Influenza immunization	No	No	No
Colorectal cancer screening	No	No	No
Risk-standardized, all-condition readmission	No	No	No
Consumer Assessment of Healthcare Providers and Systems (CAHPS) patient experience surveys	Yes	Yes	Yes
