

Proposed Amendment to H.912
Senate Health and Welfare Committee
Dr. Joshua Green, President, VANP
April 13, 2018

On behalf of the Vermont Association of Naturopathic Physicians, I am requesting that you include naturopathic physicians as possible board members to the composition of the Green Mountain Care Board, by including chapter 81 in the list of professions to be considered for the position.

We fully support having a physician on the GMCB who has extensive experience with health care administration. One of the potential candidates should be a naturopathic physician. We think this is important for the care of Vermonters in that naturopathic physicians are the only practitioner trained in how to use conventional and alternative medicine and this enables us to have a broad understanding of how the many different fields of medicine that are offered in Vermont fit together.
