Subject: Primary care for all Vermonters

I would like to add my voice to those advocating for primary care for all Vermonters. I heard a presentation last spring and this makes so much sense on so many levels. As an elderly Vermonter, I want to have ready access to primary care without a lot of middle people involved. I have been lucky to be healthy for most of my 75 years, but know that could change at any moment.

Having access to primary care would put my mind at ease and I know that it would be the answer for most Vermonters.

Please do what you can to make this a reality in VT.

Thank you,
Patricia Folsom
