### Project Description

The Vermont Fire and Police Training Academy East Cottage is a wing of the Old Sanitarium used back in the turn of the century as a hospital rooms to treat people with Tuberculous.

The East Cottage has been used for office space for the Vermont Fire Academy before the Fire Academy Administration Building was build in 2009.

We are now looking to create a modern dorm space in the East Cottage. This renovations will include electrical, Insulation, HVAC, a new interior stairway, and shower rooms.

The design for the East Cottage would include 14 dorm style rooms that could house 26 students and one advisor.
