S.301

Introduced by Senators Brock, Benning, Collamore, Cummings and McNeil

Referred to Committee on Finance

Date: January 16, 2020

Subject: Public service; siting; telecommunications facilities

Statement of purpose of bill as introduced: This bill proposes to repeal the sunset on the certificate of public good process for telecommunications facilities under 30 V.S.A. § 248a.

An act relating to miscellaneous telecommunications changes

It is hereby enacted by the General Assembly of the State of Vermont:

Sec. 1. FINDINGS

The General Assembly finds:

(1) The Public Utility Commission was granted jurisdiction over the siting of telecommunications facilities in 2007 with the enactment of 30 V.S.A. § 248a.

(2) 30 V.S.A. § 248a created the certificate of public good process that allows applicants for the siting of telecommunications facilities to apply for one permit, a certificate of public good, instead of multiple permits.

(3) 30 V.S.A. § 248a was enacted with a sunset date of July 1, 2010 and that date has been amended four times. Repealing the sunset date for the
ion would make the certificate of public good process permanent and provide certainty to applicants.

Sec. 2. 30 V.S.A. § 248a(i) is amended to read:

   (i) Sunset of Commission authority. Effective on July 1, 2020, no new applications for certificates of public good under this section may be considered by the Commission. [Repealed.]

Sec. 3. EFFECTIVE DATE

This act shall take effect on passage.

Sec. 1. 30 V.S.A. § 248a(i) is amended to read:

   (i) Sunset of Commission authority. Effective on July 1, 2020 2025, no new applications for certificates of public good under this section may be considered by the Commission.

Sec. 2. REPORT ON CRITERIA

On or before February 1, 2021, the Public Utility Commission shall review the criteria used in awarding a certificate of public good under 30 V.S.A. § 248a and report to the Senate Committee on Finance and the House Committee on Energy and Technology any changes that should be made in light of the recent developments in telecommunications technology.

Sec. 3. 2019 Acts and Resolves No. 79, Sec. 25 is amended to read:

   Sec. 25. OUTAGES AFFECTING E-911 SERVICE; REPORTING; RULE; E-911 BOARD

The E-911 Board shall adopt a rule establishing protocols for the E-911 Board to obtain or be apprised of, in a timely manner, system outages applicable to wireless service providers, providers of facilities-based, fixed voice service that is not line-powered and to electric companies for the purpose of enabling the E-911 Board to assess 911 service availability during such outages. An outage for purposes of this section includes any loss of E-911 calling capacity, whether caused by lack of function of the telecommunications subscriber’s backup power equipment, lack of function within a telecommunications provider’s system, network failure, or an outage in the electric power system. For purposes of this section, a network failure
includes the failure of backup power equipment that is owned and controlled solely by the telecommunications provider. The rule shall incorporate the threshold criteria established under 47 C.F.R. Part 4, § 4.9(e) as it pertains to outage reporting requirements applicable to wireless service providers. The E-911 Board shall file a final proposed rule with the Secretary of State and with the Legislative Committee on Administrative Rules pursuant to 3 V.S.A. § 841 on or before February 1, 2020 September 30, 2020.

Sec. 4. OUTAGE REPORTING; LEGISLATIVE INTENT; RECOMMENDATION

The General Assembly recognizes that, with respect to outage reporting requirements applicable to wireless service providers, the federal threshold criteria established under 47 C.F.R. Part 4, § 4.9(e) may not provide data at a sufficient level of granularity to adequately inform the E-911 Board of outages that raise significant public safety concerns for Vermonters. However, the General Assembly also recognizes that more particularized reporting requirements will impose additional burdens on Vermont wireless service providers. Accordingly, to the extent a wireless service provider has the capability of providing more granular outage data than is required under applicable FCC rules, such provider may voluntarily report that data to the E-911 Board. The E-911 Board shall review all outage data reported by wireless service providers and make a recommendation to the General Assembly on or before January 1, 2021 as to whether the threshold criteria should be adjusted in any manner to promote the public’s health, safety, and security.

Sec. 5. EFFECTIVE DATE

This act shall take effect on passage.
