

Good evening L& G my name is Rich Carlson, I represent NWWVT

I am asking for \$250 k for the next ~~5~~ years to expand our "Heat Squad" statewide

I understand that everyone under the Gold dome are hot for our Heat Squad !

~~I am not going to seat here telling you the benefits of "Energy Efficiency"~~

Our programs:

---

Keep our friends and families warm during the winter and comfortable during the summer months

Save our clients on the average \$900 / yr on their fuel bill ~~and~~

reduce our dependency of fossil fuels and reduce Carbon emissions!

\* I want to talk about the "Healthy Homes" component of our energy audit.

We presently collaborate with the RRMC. Many of their repeat patients have chronic illnesses such as asthma, or emphysema.

We look for conditions in the home which my contribute to these medical conditions.

The furnace be malfunctioning causing poor air quality. Our program can help reduce visits to the ER.

\*\* Can you imagine all regional medical facilities throughout our state having access to our Healthy Homes program??

Questions?.....Thank you for your time!
