

Written testimony for public hearing regarding H.51
and H.175

I am writing regarding H.51 and H.175
I feel so strongly that these important
bills should pass. Climate Change is a
very real threat, we must take action
now to limit its impact.

Limiting new large scale fossil fuel
infrastructure in Vermont would be a step
in the right direction and demonstrate
what is possible. Alternatives are available.
Vermont can be a leader in this area. H.51
is a timely and necessary bill.

H.175 is also very important, banning the
use of eminent domain to take land for fossil
fuel projects. Eminent domain is supposed
to be for projects for the public good. It has
been demonstrated again and again that
pipelines carrying fossil fuels leak
endangering the public. These pipelines are not
for the public good and eminent domain should
not be used to build them.

Thank you

Sincerely,

Chandra Bossard
