

A Petition Demanding No New Fossil Fuel Infrastructure In Vermont

TO THE VERMONT LEGISLATURE'S JOINT CLIMATE SOLUTIONS CAUCUS

A Petition to Prohibit All New Fossil Fuel Infrastructure Development in Vermont

Climate change is the greatest environmental challenge confronting us today. We all know that disruption of our climate is being caused primarily by how we continue to produce and use energy.

There is no evidence that Vermont has made significant progress toward the goals it has set for meeting this climate challenge. To reach these goals in little more than the next 30 years, as we must in order to avoid climate disaster, requires a thorough-going change in how we use and generate energy. And yet there is no single agency or complex of agencies within Vermont government specifically charged with developing the energy transition we need to accomplish.

Instead, Vermont's 2016 Comprehensive Energy Plan "Encourages expansion of pipeline gas infrastructure to enhance system reliability, reduce costs, and increase fuel choice for Vermonters..." even though a growing body of evidence shows that methane leaks, which occur during the fracking, transport, storage and use of so-called "natural" gas, are worse for overall GHG emissions than oil or any other fuel that might replace it in Vermont. We now know that during the 10-20 year period methane persists in the atmosphere it is 86 times more potent as a greenhouse gas than CO₂. Fracked gas is not and cannot become "a bridge fuel."

The Vermont Department of Public Service (DPS) and the Vermont Public Utilities Commission (PUC) have consistently supported and permitted the building of new fossil fuel infrastructure –specifically the Vermont Gas Systems (VGS) pipeline, which carries gas fracked in Canada down through Chittenden and Addison counties to Middlebury. Despite ballooning costs, endless public hearings, Supreme Court cases, threats of eminent domain takings of people's homes, dozens of arrests of pipeline opponents and overwhelming economic, environmental, and public health and safety evidence to the contrary, the PUC continues to certify that this pipeline is "a public good." Ever fewer Vermonters accept this conclusion. And now, more than a year after the pipeline was first gassed up, the PUC has undertaken a thorough, full-scale investigation of VGS' haphazard, frantic and corner-cutting construction practices in violation of its permits and leading to real and present dangers to public health and safety.

If prohibition of all new fossil fuel infrastructure had been in place over the past five years, all this pain, expense, danger and lost time would have been avoided completely. Instead we would be five years further along in our transition away from our fossil fuel economy and energy system and toward a fossil fuel free Vermont.

Early this year, Chittenden County Representative Mary Sullivan introduced House Bill 746, a bill to permanently prohibit all new fossil fuel infrastructure in Vermont. The bill did not make it to the floor for a vote. But Representative Sullivan will reintroduce the bill next session, and a similar Senate bill will also come forward. Last March, 35 Vermont towns passed Town Meeting resolutions urging the legislature to enact exactly what H.746 is designed to do. Legislation of this kind is the most powerful and efficient first step Vermont can take to begin the transition to the State's energy, climate and economic stability goals.

A law of this kind will immediately and permanently prohibit infrastructure projects like the following three, all proposed recently but all now on temporary hold: 1) any further extension of the Vermont Gas Systems pipeline; 2) construction of any fossil fuel-fired electric station like the one suggested last year for Vernon, VT but abandoned when Kinder Morgan withdrew its application for a huge gas pipeline running from upstate New York and across northern Massachusetts; 3) flow reversal of the 76-year-old Portland to Montreal pipeline to allow corrosive Canadian tarsands dilbit to be carried down through the Northeast Kingdom from Newport to Guildhall and then on to Portland, Maine for export abroad.

Therefore, we the undersigned citizens of Vermont call on the members of the Vermont State Legislature's Joint Climate Solutions Caucus to support and sponsor, during the 2019 legislative session, a bill to permanently prohibit all new fossil fuel infrastructure projects in the State of Vermont.

Comments submitted by online-signers.

- Put our hard earned taxes into renewable sources of energy!
- Efficiency and renewables are the path to a clean vibrant future.
- What a great and timely idea! This is something we can do as a small state.
- I ask my two Representatives, Jim Masland and Tim Briglin, to give support and sign on as co-sponsors for the bill that Representative Sullivan intends to re-introduce next session. I ask my Senator, Mark MacDonald, to champion this bill in the senate.
- Please don't wait until it's too late.
- Knowing what we know now about fossil fuels as a dinosaur industry, it makes zero sense to invest in new fossil fuel infrastructure. What's needed is a comprehensive public conversation about energy usage in general, how to reduce demand, and how to supply what's truly needed in a way that's equitable and sustainable. Rushing headlong into biomass plants or massive wind/solar projects is not the answer either. We need small-scale local generation with minimal environmental impact and maximum efficiency. It's time to rethink our overall energy paradigm and step away from large-scale industrial generation. I hope the legislature has the courage and vision to step up to that challenge.
- Hard to do I know, walking back on so many years of gas and oil infrastructure but now necessary. On an individual level: my house, my car, my comfort; on a state level, and on a national level. New thinking, planning, designing, research and development are in order!
- Please consider this request. Look at the impact of current policies on our future.

- It is of urgent importance that we transition immediately to a post-fossil fuel culture. Please, lead the way and help create a sustainable VT.
- We have to make a great leap towards the future, not a step backwards. It's past time to look at energy in a new way--a renewable way.
- This is the only sensible path that will benefit both us and future generations!
- We need renewable energy, solar, wind, energy efficiency and conservation, NOT fracked gas from elsewhere.
- NO NO NO! This is an emergency! Protect the planet now! We all hate fossil fuels- STOP KILLING EVERYTHING! YOU ARE HUMAN??
- Every investment in new fossil fuel infrastructure delays the transition to renewable energy sources, urgently needed. How can individuals be asked to contribute to achieving the renewable energy goals and energy consumption reduction targets in Vermont's Comprehensive Energy Plan if the state doesn't lead? How can the bridge fuel myth persist?
- We have a climate emergency, and Vermont is causing the release of more greenhouse gases than ever. We must stop adding to the GHG burden. Fossil fuel infrastructure commits us to 30-40 years of unnecessary emissions.
- Keep it in the ground.
- Stop the expansion of the use and infrastructure of fossil fuels.
- Way overdue. Thank you!

- At this point we should only be investing in the expansion of renewable energy options.
- Did you see the most recent New York Times Magazine??? It makes it clear this sort of action should have happened 40 years ago. 40 YEARS AGO!! This is a no brainer. Let's all stop facilitating fossil fuel usage.
- No brainer.
- We need to save our planet for our grandchildren ! No more delay ! Absolute need for immediate action !
- Let's take our state into the lead on no fossil-fuel expansion!
- We need to get serious about the deadly serious problems relating to climate change. As always, let Vermont lead the way!
- This should be a "no brainer" by now for anyone who understands the severity of the climate chaos currently underway. Please let little old Vermont once again lead the nation in rational legislation on THE issue of our time. Thank you.
- We don't have very long to address the effects of climate change before it goes too far to stop!
- Long overdue -- and necessary if we are going to continue to call ourselves a forward-looking state!
- Let's make Vermont a leader in progress and climate sanity!
- Please, no more re-arranging the deck chairs on the Titanic! No more new Fossil Fuel infrastructure.

- We need to protect our land for the future by embracing alternative energy production!
- It is way past the time to halt fossil fuel infrastructure. The people of 35 Vermont towns have spoken and more will join in 2019. Do the necessary, speed up the process and keep fossil fuels in the ground!!
- 32. Climate chaos is already showing itself around the world and in our state in searing temperatures, floods, droughts, wildfires and more. The last thing we or our planet needs is more fossil fuel infrastructure. Instead we must dismantle what we have already if we want humans as well as most other life forms on the earth to survive.
- It is counterproductive to lock ourselves into fossil fuel infrastructure that may last for decades when we have a goal, and an urgent need, to move away from fossil fuels.
- We make change by changing our approach. Please spend the time to collaborate with citizens and craft policy that's in all of our long term best interest! No more fossil fuel infrastructure, and no regressive policy for sustainable infrastructure. We have the solutions...let's find the courage and will to implement them! Thank you!
- Mother Earth is not for sale. This is Native land. Climate change is real. Water is life.
- Change might be difficult, but NOT to change our way of doing things will lead to further damage to the planet. No new fossil fuel infrastructure, PLEASE!
- I live next door in New Hampshire and look to Vermont as a role model we should aspire to emulate. Go, Vermont!

- Future generations are relying on us to set them up with an energy infrastructure that is not highly extractive and with enormous 'hidden' costs that can never be paid back. It is our responsibility to make sure that Vermonters have clean energy, jobs that promote resilient communities, and healthy soil and water to sustain life. Any new infrastructure that does not support clean energy or resilient communities is an immense burden on future generations and a completely wasted investment that will end up costing taxpayers more and more.

- We can't go back! We must move forward to more responsible energy systems; however, they must also be appropriate to the environmental impacts they create.

- PLEASE commit to phasing out fossil fuels as fast as possible!!

- Building in-state energy efficiency capacity and renewable production will create a healthier economy for us now and for future generations.

- We should be eliminating using fossil fuels!

- Please help protect our fragile planet from further abuse, whether that be in the pursuit of wealth, or our own comfort. Each of us have to learn to respect the limits of our impact on that which gives us life.

- We need to focus on stopping all fossil fuel initiatives from this time onward.

- No new fossil fuel infrastructure in Vermont!

- Invest in efficiency, renewables, and mass transit, please.

- It's insane to keep supporting fossil fuels simply because people are addicted to over-use of this fuel source that is KILLING the Planet!! It's like getting a diagnosis of lung cancer and then continuing to smoke!! Turn the support for fossil fuels into support for the alternative energy sources that can replace fossil

fuel sources - turn our support to what will help cure the damage not to what will continue to damage us, our children, and every creature on this radiant gift of a planet IRREPARABLY!!

- Investments in fossil fuel infrastructure that take decades to pay off make no sense when we need to curb our production of fossil fuel use today. Please oppose any future fossil fuel infrastructure development, and support conservation, efficiency and renewables instead.
- Let's focus on our renewable goal - it is still key to a healthy VT! Thanks for your public service.
- We need better planning to address how Vermont will achieve a more sustainable, local, carbon friendly, and comprehensive green energy future. What we don't need is still more dirty energy infrastructure.
- Please spend the time and money on improving our energy sources that will contribute less to climate change.
- Let us do this work for future generations. Let us leave a legacy of common sense energy approaches.
- Let the planet renew itself.
- No new construction of fossil fuel infrastructure in Vermont! We need to begin immediately and purposefully to transition our beautiful, intelligent little state off fossil fuels. Climate change is real and with us. We need to join those leaders elsewhere who have shown greater vision and commitment than ours, unfortunately, to sponsor legislation to ban all new fossil fuel infrastructure and to focus on clean and sustainable energy sources. We don't have time to waste. This is the final chapter.
- Time to repair our Earth from the damages we have bestowed upon her!

- I simply trust that when good solutions are put forth, and some silly verbiage gets in the way, Vermonters will be smart enough to move forward.
- I am a landowner in the Northeast Kingdom and already have a large power line running across my property. I do not want a gas pipeline as well!
- EXPAND ALL GREEN ALTERNATIVE ENERGY SOURCES PRONTO. NO FOSSIL FUELS, NO NUKES!
- Let's work on the renewable fuels and leave behind the fossils where they belong - in the ground! Please no new fossil fuel infrastructure in Vermont.
- Our overconsumption of fossil fuels has already polluted all surface water bodies, leaves hundreds of petrochemical residues in all our bodies, damages air, climate and soil. Enough! We must only allow new infrastructures to be sustainable in nature, promoting clean energy, clean water, healthy air and soils. Those who say "we can't" are only holding us back from what IS possible!
- For the future of our children, I beg you, please, no more investment in fossil fuel.
- It is very important for our long term well being to stop using fossil fuels. Action needs to be taken now.
- We moved from Upstate NY to escape the potential for fracking, pipelines and compressor stations that might have ruined our area. Please VT, do the right thing and KEEP BEING AHEAD OF THE REST OF THE COUNTRY!!! Thank you~
- We can do better than the rest of the country--look how often we do. And if we adopt the ideas of this petition, we will once again take a leading voice in a major national discussion. Thank you.
- Keep fossil fuel infrastructure out of our state.
- Fossil Fuel Infrastructure in Vermont runs contrary to the goals and objectives of the Comprehensive Energy Plan.

- Do we want to seriously work on climate change or not?
- Absolutely!!! Let's lead the nation again and show us as the greenest state!
- Fossil fuels are literally dinosaurs... move on folks!! Time to transition AWAY from fossil fuels to clean/green energy sources.
- New fossil fuel infrastructure locks Vermont into decades of continued increases in fossil fuel use and delays implementation of clean energy technology.
- Let's stop pollution and anything that threatens the environment.
- Let's move on from what we know is a dead end.
- More fossil fuel infrastructure leads to an economy that is dependent on using fossil fuels, which, based on the IPCC's report, is the exact wrong direction that we NEED to take. Please be proactive and do the right thing for the future of our children and their children. No short term benefit will ever outweigh the costs to our world and its people.
- This is really important! Please pass a bill to this effect. It is so frustrating to see how little we have done to address this issue. I count on my legislators and governor to make this a priority. Thank you.
- This is so very important--the people of Vermont are counting on you, our representatives, to fight against climate change by legislating against any new fossil fuel infrastructure!
- We can't keep on subsidizing and promoting the use of fossil fuels if we want a habitable future--is that clear?

- Let's focus instead on the plethora of regenerative solutions.
- Without clean water and air jobs and the economy don't mean shit.
- Absolutely crucial! No new fossil fuel infrastructure in Vermont.
- This should be an urgent call for action from every Vermonter.
- Action on this now is urgent.
- We are smarter than supporting the dirty fuel that is so dangerous to people & the environment.
- Use the money instead to weatherize homes and build mass transit.
- We have so many options for slowing climate change and the first comes by refusing to continue to develop fossil fuel infrastructure. I urge the VT Legislature to pass legislation to ban any new pipelines or other fossil fuel infrastructure NOW!
- We don't need more wars. We need to invest this money and whatever else it might take to convert to alternative energy or the outcome will be as devastating as an all out war. We are at "end game" and there is no time left to invest further in what is killing our planet. This is not hyperbole, it' science.
- It is so important not to build new 20+ year fossil fuel infrastructure. Invest instead in renewables.
- Please look into the capacity of healthy soils to sequester carbon.

- In order to prevent us from going over the climate cliff of a rise of 1.5 degrees Centigrade we must keep all fossils fuels that are still in the ground--in the ground. In addition, we must not build any future fossil fuel infrastructure--and must stop construction of any that is currently being built. This is not a drill; this is a crisis that threatens all life on this planet--including our own.
- Climate change is the most existential issue for our planet. It is the most important national security issue. Vermont has led the way and become a model of forward environmental thinking. It is a moral imperative that we lead the way.
- Recapitulating the past's familiar approaches negates and undermines the necessity to explore and invest in the new ones that desperately need nurturing so they may grow into effective systemic solutions!
- Plain common sense says to act now to avoid catastrophic consequences. Do we have this sense?
- PLEASE ban all new fossil fuel infrastructure. For the sake of our children and grandchildren and all the creatures of the earth with whom we share this planet.
- Vermont must meet our goals and be a beacon to others around renewable energy. Let's take a firm stand on No new fossil fuel infrastructure.
- Time to take this seriously, folks! Is there any reason to continue to promote fossil fuels and thus commit the slow murder of our society?
- Climate Change is real, look at California. Let's lead the way and take a stand!
- It is imperative that we stop risky, polluting fossil fuel infrastructure now. Invest in clean, appropriately sited renewable energy and regenerative agriculture, which can hold carbon in the soil.

- Vermont can be a model for other states if we have courage to make bold decisions. Let's invest in renewable energy and not in fossil fuels.
- Let's look to the future and build infrastructure our grandchildren will have to support them.
- It is appalling that VGS/Gaz Metro has been building a fracked gas pipeline through our state with such egregious and criminal mistakes, lies and disregard of the pipeline safety laws. We must stop them now.
- Our only hope to avert the worst predictions of climate scientists is if we rapidly transform our economy away from fossil fuels towards renewables. Investing in new fossil fuel infrastructure is directly antithetical to that goal and hastens the destruction of our beloved planet.
- If Vermont can't reduce the use of fossil fuel energy, no one can. And our planet requires our change!
- Major cities in Spain have closed miles of roads to cars in order to increase pedestrian traffic, lower city emissions. Other countries are working to detach economies and lifestyles from the very source of dangerous emissions. Vermont needs to take a stand, follow suit and find ways to keep our economy strong AND reduce greenhouse gas emissions and our dependency on fossil fuels. We can not stand by and just let global warming take us, or the next generation, because we were too afraid to challenge the status quo, or the federal government, which has decided the environment is not important to us all. Thanks for all you do to make us a sustainable state.
- Time for Vermont to lead the nation again. Please consider the future of our children... Fossil fuels are known to cause global warming and we, as "the adults in the room" must ACT. No more blah, blah, blah!! Our children and grandchildren deserve ACTION by us through you. Please think deeply about the kind of State we want for generations to come. You are working with a very short time frame, so please don't waste it. Thank you.

- There are countless examples of energy sources that are not being used and shut down when discovered. We need to look at every option out there. People have converted gravity into electricity. Look at Tesla's work from the not so distant past - why aren't we expanding on this? Options well past solar power (but that's great too) we have the ability to have unlimited clean energy and we need to develop and use it.
- VT should lead the way to creating more ecological balance. No more fossil fuel infrastructure!
- Please help keep Vermont as beautiful and livable as it is now for ourselves and our children and their children.
- Vermont is known to be a leader in many ways. Let's continue to do this before climate makes it impossible to do anything.
- It is becoming more and more critical to be making significant headway in addressing climate change. We are not yet on course to meeting our modest goal of 90% carbon reduction by 2050 and this has become very inadequate given recent findings. Spending millions and billions on building new fossil fuel infrastructure is moving entirely in the wrong direction. We must stop digging ourselves into a deeper hole.
- We can't keep kicking this can down the road, our children deserve a clean safe place to live. We must commit to a sustainable future NOW!
- We must reduce our dependence on fossil fuels to protect the VT climate, landscape , environment and water sources.
- To counter climate change we need to reduce our dependence on fossil fuels Not find new sources.
- It is imperative for the earth and for all the people, that we not only divert from fossil fuels, but engage with fuels that do not harm anyone or the earth in their making or using. Sadly, in VT, people like myself have little option as my home

cannot have access to any other types of fuel. But, we have done everything we can to make it as efficient as possible. I would encourage that every new building have fuel reduction components, efficient lighting, water use, and more opportunities for community living/work and more public/group transportation. Everything we do matters when we add it all up. (and that includes our tourism!!!) It really bugs me to have folks drive back and forth from PA to ski, leaving their "ski home" fully heated, and the resources it takes for tourism.... VT needs to find other earthly pursuits.

- Please, let's transition NOW!

- We need an increased sense of urgency in our legislation.

- It's time for Vermont to be a climate leader again and to make a rapid transition to clean energy, primarily wind and solar. Please support the efforts to ban all new fossil fuel infrastructure in Vermont, as part of the essential transition to much more clean energy and protection for Vermont's people, economy and environment.

- We cannot as a society continue to build fossil fuel infrastructure and at the same time fight the effects of climate change and we must work toward this changeover immediately and fast.

- Everything we do matters, more now than at any other time in the history of human life on Earth. We have to immediately stop accelerating the harms we know are fueling the descent into climate chaos. The time is now. It's up to all of us to use whatever power we have to do all that we can.

- It's all okay until it isn't, we don't want hope, we want change!

- Let's move onto more responsible energy sources such as water, wind, sun, plants, fungi, microbes, and trees while we reduce our energy needs.

- Prohibiting any new fossil fuel infrastructure in Vermont is a rational course for The Vermont Legislature to pursue. Surely the Legislature will decide to be

rational about taking this step toward averting climatic disaster. The people of Vermont require you to do so.

- We can not move away from fossil fuels if we continue to add infrastructure. Put the money into advancing renewables.
- We need to put our focus on a direction that is good for the Mother Earth and her inhabitants. We have the skills, the technology - we just need the leadership and the vision.
- Climate change requires urgent action to reduce the use of fossil fuels. New fossil fuel infrastructure has no place in Vermont. We need to be investing in conservation, energy efficiency and clean, local renewable energy.
- Vermont isn't doing well in staying to our goals. Please don't let it be said that Vermont took steps against our children's future.
- This is only a start!
- We need to ACT...Small sacrifices now for a possible future is much better than putting actions off and risking losing everything.
- Hurray for this important initiative!! It's about time! (And there's not much of that left.)
- Let's make new fossil fuel infrastructure unnecessary through use of renewables, new technology, electric cars, and more.
- Better late than never -- and it's very late!
- Climate change caused by fossil fuels will bring an end to organized human life on this planet. Our children, grandchildren and generations beyond will never

forgive our inability to act now and its consequences. Please, Vermont, take the lead in stopping new fossil fuel infrastructure!

A Petition Demanding No New Fossil Fuel Infrastructure In Vermont

TO THE VERMONT LEGISLATURE'S JOINT CLIMATE SOLUTIONS CAUCUS

A Petition to Prohibit All New Fossil Fuel Infrastructure Development in Vermont

Climate change is the greatest environmental challenge confronting us today. We all know that disruption of our climate is being caused primarily by how we continue to produce and use energy.

There is no evidence that Vermont has made significant progress toward the goals it has set for meeting this climate challenge. To reach these goals in little more than the next 30 years, as we must in order to avoid climate disaster, requires a thorough-going change in how we use and generate energy. And yet there is no single agency or complex of agencies within Vermont government specifically charged with developing the energy transition we need to accomplish.

Instead, Vermont's 2016 Comprehensive Energy Plan "Encourages expansion of pipeline gas infrastructure to enhance system reliability, reduce costs, and increase fuel choice for Vermonters..." even though a growing body of evidence shows that methane leaks, which occur during the fracking, transport, storage and use of so-called "natural" gas, are worse for overall GHG emissions than oil or any other fuel that might replace it in Vermont. We now know that during the 10-20 year period methane persists in the atmosphere it is 86 times more potent as a greenhouse gas than CO₂. Fracked gas is not and cannot become "a bridge fuel."

The Vermont Department of Public Service (DPS) and the Vermont Public Utilities Commission (PUC) have consistently supported and permitted the building of new fossil fuel infrastructure –specifically the Vermont Gas Systems (VGS) pipeline, which carries gas fracked in Canada down through Chittenden and Addison counties to Middlebury. Despite ballooning costs, endless public hearings, Supreme Court cases, threats of eminent domain takings of people's homes, dozens of arrests of pipeline opponents and overwhelming economic, environmental, and public health and safety evidence to the contrary, the PUC continues to certify that this pipeline is "a public good." Ever fewer Vermonters accept this conclusion. And now, more than a year after the pipeline was first gassed up, the PUC has undertaken a thorough, full-scale investigation of VGS' haphazard, frantic and corner-cutting construction practices in violation of its permits and leading to real and present dangers to public health and safety.

If prohibition of all new fossil fuel infrastructure had been in place over the past five years, all this pain, expense, danger and lost time would have been avoided completely. Instead we would be five years further along in our transition away from our fossil fuel economy and energy system and toward a fossil fuel free Vermont.

Early this year, Chittenden County Representative Mary Sullivan introduced House Bill 746, a bill to permanently prohibit all new fossil fuel infrastructure in Vermont. The bill did not make it to the floor for a vote. But Representative Sullivan will reintroduce the bill next session, and a similar Senate bill will also come forward. Last March, 35 Vermont towns passed Town Meeting resolutions urging the legislature to enact exactly what H.746 is designed to do. Legislation of this kind is the most powerful and efficient first step Vermont can take to begin the transition to the State's energy, climate and economic stability goals.

A law of this kind will immediately and permanently prohibit infrastructure projects like the following three, all proposed recently but all now on temporary hold: 1) any further extension of the Vermont Gas Systems pipeline; 2) construction of any fossil fuel-fired electric station like the one suggested last year for Vernon, VT but abandoned when Kinder Morgan withdrew its application for a huge gas pipeline running from upstate New York and across northern Massachusetts; 3) flow reversal of the 76-year-old Portland to Montreal pipeline to allow corrosive Canadian tarsands dilbit to be carried down through the Northeast Kingdom from Newport to Guildhall and then on to Portland, Maine for export abroad.

Therefore, we the undersigned citizens of Vermont call on the members of the Vermont State Legislature's Joint Climate Solutions Caucus to support and sponsor, during the 2019 legislative session, a bill to permanently prohibit all new fossil fuel infrastructure projects in the State of Vermont.

- Put our hard earned taxes into renewable sources of energy!
- Efficiency and renewables are the path to a clean vibrant future.
- What a great and timely idea! This is something we can do as a small state.
- I ask my two Representatives, Jim Masland and Tim Briglin, to give support and sign on as co-sponsors for the bill that Representative Sullivan intends to re-introduce next session. I ask my Senator, Mark MacDonald, to champion this bill in the senate.
- Please don't wait until it's too late.
- Knowing what we know now about fossil fuels as a dinosaur industry, it makes zero sense to invest in new fossil fuel infrastructure. What's needed is a comprehensive public conversation about energy usage in general, how to reduce demand, and how to supply what's truly needed in a way that's equitable and sustainable. Rushing headlong into biomass plants or massive wind/solar projects is not the answer either. We need small-scale local generation with minimal environmental impact and maximum efficiency. It's time to rethink our overall energy paradigm and step away from large-scale industrial generation. I hope the legislature has the courage and vision to step up to that challenge.
- Hard to do I know, walking back on so many years of gas and oil infrastructure but now necessary. On an individual level: my house, my car, my comfort; on a state level, and on a national level. New thinking, planning, designing, research and development are in order!
- Please consider this request. Look at the impact of current policies on our future.

- It is of urgent importance that we transition immediately to a post-fossil fuel culture. Please, lead the way and help create a sustainable VT.
- We have to make a great leap towards the future, not a step backwards. It's past time to look at energy in a new way--a renewable way.
- This is the only sensible path that will benefit both us and future generations!
- We need renewable energy, solar, wind, energy efficiency and conservation, NOT fracked gas from elsewhere.
- NO NO NO! This is an emergency! Protect the planet now! We all hate fossil fuels- STOP KILLING EVERYTHING! YOU ARE HUMAN??
- Every investment in new fossil fuel infrastructure delays the transition to renewable energy sources, urgently needed. How can individuals be asked to contribute to achieving the renewable energy goals and energy consumption reduction targets in Vermont's Comprehensive Energy Plan if the state doesn't lead? How can the bridge fuel myth persist?
- We have a climate emergency, and Vermont is causing the release of more greenhouse gases than ever. We must stop adding to the GHG burden. Fossil fuel infrastructure commits us to 30-40 years of unnecessary emissions.
- Keep it in the ground.
- Stop the expansion of the use and infrastructure of fossil fuels.
- Way overdue. Thank you!

- At this point we should only be investing in the expansion of renewable energy options.
- Did you see the most recent New York Times Magazine??? It makes it clear this sort of action should have happened 40 years ago. 40 YEARS AGO!! This is a no brainer. Let's all stop facilitating fossil fuel usage.
- No brainer.
- We need to save our planet for our grandchildren ! No more delay ! Absolute need for immediate action !
- Let's take our state into the lead on no fossil-fuel expansion!
- We need to get serious about the deadly serious problems relating to climate change. As always, let Vermont lead the way!
- This should be a "no brainer" by now for anyone who understands the severity of the climate chaos currently underway. Please let little old Vermont once again lead the nation in rational legislation on THE issue of our time. Thank you.
- We don't have very long to address the effects of climate change before it goes too far to stop!
- Long overdue -- and necessary if we are going to continue to call ourselves a forward-looking state!
- Let's make Vermont a leader in progress and climate sanity!
- Please, no more re-arranging the deck chairs on the Titanic! No more new Fossil Fuel infrastructure.

- We need to protect our land for the future by embracing alternative energy production!
- It is way past the time to halt fossil fuel infrastructure. The people of 35 Vermont towns have spoken and more will join in 2019. Do the necessary, speed up the process and keep fossil fuels in the ground!!
- 32. Climate chaos is already showing itself around the world and in our state in searing temperatures, floods, droughts, wildfires and more. The last thing we or our planet needs is more fossil fuel infrastructure. Instead we must dismantle what we have already if we want humans as well as most other life forms on the earth to survive.
- It is counterproductive to lock ourselves into fossil fuel infrastructure that may last for decades when we have a goal, and an urgent need, to move away from fossil fuels.
- We make change by changing our approach. Please spend the time to collaborate with citizens and craft policy that's in all of our long term best interest! No more fossil fuel infrastructure, and no regressive policy for sustainable infrastructure. We have the solutions...let's find the courage and will to implement them! Thank you!
- Mother Earth is not for sale. This is Native land. Climate change is real. Water is life.
- Change might be difficult, but NOT to change our way of doing things will lead to further damage to the planet. No new fossil fuel infrastructure, PLEASE!
- I live next door in New Hampshire and look to Vermont as a role model we should aspire to emulate. Go, Vermont!

- Future generations are relying on us to set them up with an energy infrastructure that is not highly extractive and with enormous 'hidden' costs that can never be paid back. It is our responsibility to make sure that Vermonters have clean energy, jobs that promote resilient communities, and healthy soil and water to sustain life. Any new infrastructure that does not support clean energy or resilient communities is an immense burden on future generations and a completely wasted investment that will end up costing taxpayers more and more.

- We can't go back! We must move forward to more responsible energy systems; however, they must also be appropriate to the environmental impacts they create.

- PLEASE commit to phasing out fossil fuels as fast as possible!!

- Building in-state energy efficiency capacity and renewable production will create a healthier economy for us now and for future generations.

- We should be eliminating using fossil fuels!

- Please help protect our fragile planet from further abuse, whether that be in the pursuit of wealth, or our own comfort. Each of us have to learn to respect the limits of our impact on that which gives us life.

- We need to focus on stopping all fossil fuel initiatives from this time onward.

- No new fossil fuel infrastructure in Vermont!

- Invest in efficiency, renewables, and mass transit, please.

- It's insane to keep supporting fossil fuels simply because people are addicted to over-use of this fuel source that is KILLING the Planet!! It's like getting a diagnosis of lung cancer and then continuing to smoke!! Turn the support for fossil fuels into support for the alternative energy sources that can replace fossil

fuel sources - turn our support to what will help cure the damage not to what will continue to damage us, our children, and every creature on this radiant gift of a planet IRREPARABLY!!

- Investments in fossil fuel infrastructure that take decades to pay off make no sense when we need to curb our production of fossil fuel use today. Please oppose any future fossil fuel infrastructure development, and support conservation, efficiency and renewables instead.
- Let's focus on our renewable goal - it is still key to a healthy VT! Thanks for your public service.
- We need better planning to address how Vermont will achieve a more sustainable, local, carbon friendly, and comprehensive green energy future. What we don't need is still more dirty energy infrastructure.
- Please spend the time and money on improving our energy sources that will contribute less to climate change.
- Let us do this work for future generations. Let us leave a legacy of common sense energy approaches.
- Let the planet renew itself.
- No new construction of fossil fuel infrastructure in Vermont! We need to begin immediately and purposefully to transition our beautiful, intelligent little state off fossil fuels. Climate change is real and with us. We need to join those leaders elsewhere who have shown greater vision and commitment than ours, unfortunately, to sponsor legislation to ban all new fossil fuel infrastructure and to focus on clean and sustainable energy sources. We don't have time to waste. This is the final chapter.
- Time to repair our Earth from the damages we have bestowed upon her!

- I simply trust that when good solutions are put forth, and some silly verbiage gets in the way, Vermonters will be smart enough to move forward.
- I am a landowner in the Northeast Kingdom and already have a large power line running across my property. I do not want a gas pipeline as well!
- EXPAND ALL GREEN ALTERNATIVE ENERGY SOURCES PRONTO. NO FOSSIL FUELS, NO NUKES!
- Let's work on the renewable fuels and leave behind the fossils where they belong - in the ground! Please no new fossil fuel infrastructure in Vermont.
- Our overconsumption of fossil fuels has already polluted all surface water bodies, leaves hundreds of petrochemical residues in all our bodies, damages air, climate and soil. Enough! We must only allow new infrastructures to be sustainable in nature, promoting clean energy, clean water, healthy air and soils. Those who say "we can't" are only holding us back from what IS possible!
- For the future of our children, I beg you, please, no more investment in fossil fuel.
- It is very important for our long term well being to stop using fossil fuels. Action needs to be taken now.
- We moved from Upstate NY to escape the potential for fracking, pipelines and compressor stations that might have ruined our area. Please VT, do the right thing and KEEP BEING AHEAD OF THE REST OF THE COUNTRY!!! Thank you~
- We can do better than the rest of the country--look how often we do. And if we adopt the ideas of this petition, we will once again take a leading voice in a major national discussion. Thank you.
- Keep fossil fuel infrastructure out of our state.
- Fossil Fuel Infrastructure in Vermont runs contrary to the goals and objectives of the Comprehensive Energy Plan.

- Do we want to seriously work on climate change or not?
- Absolutely!!! Let's lead the nation again and show us as the greenest state!
- Fossil fuels are literally dinosaurs... move on folks!! Time to transition AWAY from fossil fuels to clean/green energy sources.
- New fossil fuel infrastructure locks Vermont into decades of continued increases in fossil fuel use and delays implementation of clean energy technology.
- Let's stop pollution and anything that threatens the environment.
- Let's move on from what we know is a dead end.
- More fossil fuel infrastructure leads to an economy that is dependent on using fossil fuels, which, based on the IPCC's report, is the exact wrong direction that we NEED to take. Please be proactive and do the right thing for the future of our children and their children. No short term benefit will ever outweigh the costs to our world and its people.
- This is really important! Please pass a bill to this effect. It is so frustrating to see how little we have done to address this issue. I count on my legislators and governor to make this a priority. Thank you.
- This is so very important--the people of Vermont are counting on you, our representatives, to fight against climate change by legislating against any new fossil fuel infrastructure!
- We can't keep on subsidizing and promoting the use of fossil fuels if we want a habitable future--is that clear?

- Let's focus instead on the plethora of regenerative solutions.
- Without clean water and air jobs and the economy don't mean shit.
- Absolutely crucial! No new fossil fuel infrastructure in Vermont.
- This should be an urgent call for action from every Vermonter.
- Action on this now is urgent.
- We are smarter than supporting the dirty fuel that is so dangerous to people & the environment.
- Use the money instead to weatherize homes and build mass transit.
- We have so many options for slowing climate change and the first comes by refusing to continue to develop fossil fuel infrastructure. I urge the VT Legislature to pass legislation to ban any new pipelines or other fossil fuel infrastructure NOW!
- We don't need more wars. We need to invest this money and whatever else it might take to convert to alternative energy or the outcome will be as devastating as an all out war. We are at "end game" and there is no time left to invest further in what is killing our planet. This is not hyperbole, it' science.
- It is so important not to build new 20+ year fossil fuel infrastructure. Invest instead in renewables.
- Please look into the capacity of healthy soils to sequester carbon.

- In order to prevent us from going over the climate cliff of a rise of 1.5 degrees Centigrade we must keep all fossils fuels that are still in the ground--in the ground. In addition, we must not build any future fossil fuel infrastructure--and must stop construction of any that is currently being built. This is not a drill; this is a crisis that threatens all life on this planet--including our own.
- Climate change is the most existential issue for our planet. It is the most important national security issue. Vermont has led the way and become a model of forward environmental thinking. It is a moral imperative that we lead the way.
- Recapitulating the past's familiar approaches negates and undermines the necessity to explore and invest in the new ones that desperately need nurturing so they may grow into effective systemic solutions!
- Plain common sense says to act now to avoid catastrophic consequences. Do we have this sense?
- PLEASE ban all new fossil fuel infrastructure. For the sake of our children and grandchildren and all the creatures of the earth with whom we share this planet.
- Vermont must meet our goals and be a beacon to others around renewable energy. Let's take a firm stand on No new fossil fuel infrastructure.
- Time to take this seriously, folks! Is there any reason to continue to promote fossil fuels and thus commit the slow murder of our society?
- Climate Change is real, look at California. Let's lead the way and take a stand!
- It is imperative that we stop risky, polluting fossil fuel infrastructure now. Invest in clean, appropriately sited renewable energy and regenerative agriculture, which can hold carbon in the soil.

- Vermont can be a model for other states if we have courage to make bold decisions. Let's invest in renewable energy and not in fossil fuels.
- Let's look to the future and build infrastructure our grandchildren will have to support them.
- It is appalling that VGS/Gaz Metro has been building a fracked gas pipeline through our state with such egregious and criminal mistakes, lies and disregard of the pipeline safety laws. We must stop them now.
- Our only hope to avert the worst predictions of climate scientists is if we rapidly transform our economy away from fossil fuels towards renewables. Investing in new fossil fuel infrastructure is directly antithetical to that goal and hastens the destruction of our beloved planet.
- If Vermont can't reduce the use of fossil fuel energy, no one can. And our planet requires our change!
- Major cities in Spain have closed miles of roads to cars in order to increase pedestrian traffic, lower city emissions. Other countries are working to detach economies and lifestyles from the very source of dangerous emissions. Vermont needs to take a stand, follow suit and find ways to keep our economy strong AND reduce greenhouse gas emissions and our dependency on fossil fuels. We can not stand by and just let global warming take us, or the next generation, because we were too afraid to challenge the status quo, or the federal government, which has decided the environment is not important to us all. Thanks for all you do to make us a sustainable state.
- Time for Vermont to lead the nation again. Please consider the future of our children... Fossil fuels are known to cause global warming and we, as "the adults in the room" must ACT. No more blah, blah, blah!! Our children and grandchildren deserve ACTION by us through you. Please think deeply about the kind of State we want for generations to come. You are working with a very short time frame, so please don't waste it. Thank you.

- There are countless examples of energy sources that are not being used and shut down when discovered. We need to look at every option out there. People have converted gravity into electricity. Look at Tesla's work from the not so distant past - why aren't we expanding on this? Options well past solar power (but that's great too) we have the ability to have unlimited clean energy and we need to develop and use it.
- VT should lead the way to creating more ecological balance. No more fossil fuel infrastructure!
- Please help keep Vermont as beautiful and livable as it is now for ourselves and our children and their children.
- Vermont is known to be a leader in many ways. Let's continue to do this before climate makes it impossible to do anything.
- It is becoming more and more critical to be making significant headway in addressing climate change. We are not yet on course to meeting our modest goal of 90% carbon reduction by 2050 and this has become very inadequate given recent findings. Spending millions and billions on building new fossil fuel infrastructure is moving entirely in the wrong direction. We must stop digging ourselves into a deeper hole.
- We can't keep kicking this can down the road, our children deserve a clean safe place to live. We must commit to a sustainable future NOW!
- We must reduce our dependence on fossil fuels to protect the VT climate, landscape , environment and water sources.
- To counter climate change we need to reduce our dependence on fossil fuels Not
○ find new sources.
- It is imperative for the earth and for all the people, that we not only divert from fossil fuels, but engage with fuels that do not harm anyone or the earth in their making or using. Sadly, in VT, people like myself have little option as my home

cannot have access to any other types of fuel. But, we have done everything we can to make it as efficient as possible. I would encourage that every new building have fuel reduction components, efficient lighting, water use, and more opportunities for community living/work and more public/group transportation. Everything we do matters when we add it all up. (and that includes our tourism!!!) It really bugs me to have folks drive back and forth from PA to ski, leaving their "ski home" fully heated, and the resources it takes for tourism.... VT needs to find other earthly pursuits.

- Please, let's transition NOW!

- We need an increased sense of urgency in our legislation.

- It's time for Vermont to be a climate leader again and to make a rapid transition to clean energy, primarily wind and solar. Please support the efforts to ban all new fossil fuel infrastructure in Vermont, as part of the essential transition to much more clean energy and protection for Vermont's people, economy and environment.

- We cannot as a society continue to build fossil fuel infrastructure and at the same time fight the effects of climate change and we must work toward this changeover immediately and fast.

- Everything we do matters, more now than at any other time in the history of human life on Earth. We have to immediately stop accelerating the harms we know are fueling the descent into climate chaos. The time is now. It's up to all of us to use whatever power we have to do all that we can.

- It's all okay until it isn't, we don't want hope, we want change!

- Let's move onto more responsible energy sources such as water, wind, sun, plants, fungi, microbes, and trees while we reduce our energy needs.

- Prohibiting any new fossil fuel infrastructure in Vermont is a rational course for The Vermont Legislature to pursue. Surely the Legislature will decide to be

rational about taking this step toward averting climatic disaster. The people of Vermont require you to do so.

- We can not move away from fossil fuels if we continue to add infrastructure. Put the money into advancing renewables.
- We need to put our focus on a direction that is good for the Mother Earth and her inhabitants. We have the skills, the technology - we just need the leadership and the vision.
- Climate change requires urgent action to reduce the use of fossil fuels. New fossil fuel infrastructure has no place in Vermont. We need to be investing in conservation, energy efficiency and clean, local renewable energy.
- Vermont isn't doing well in staying to our goals. Please don't let it be said that Vermont took steps against our children's future.
- This is only a start!
- We need to ACT...Small sacrifices now for a possible future is much better than putting actions off and risking losing everything.
- Hurray for this important initiative!! It's about time! (And there's not much of that left.)
- Let's make new fossil fuel infrastructure unnecessary through use of renewables, new technology, electric cars, and more.
- Better late than never -- and it's very late!
- Climate change caused by fossil fuels will bring an end to organized human life on this planet. Our children, grandchildren and generations beyond will never

forgive our inability to act now and its consequences. Please, Vermont, take the lead in stopping new fossil fuel infrastructure!
