

We, as Vermonters, but mostly as human beings, want to voice our outrage regarding this upcoming bill H57. We are adamantly opposed to the taking of human life and must speak for those who cannot. As Catholics, we believe life does begin at conception and so are horrified at the possibility of this becoming law in Vermont. What has happened to our country that six states already have this law on the books? How can those that voted for it look at themselves in the mirror each day and be proud of their decision?

If we allow this to happen and do not speak up in some form against this barbaric act, how do WE look at OURSELVES in the mirror each day? Who gets to decide who lives and who dies but God?

Please, let the committee take a step back and let them truly think about the ramifications of what they would be doing. VOTE NO FOR INFANTICIDE!
