

I am writing this today, to let you know why, I oppose Bill H.57, and ask that a Bill instead, be put into place, for full protection for the unborn and not a law, that never would allow them any rights.

A Bill that would also protect every woman, man, grandparent and siblings, from the trickle down effect, that abortion causes.

If such a Bill were in place years ago, I would have never lost my child to the horrific act of an abortion. The confusion that took place beforehand, that I experienced, because our government allowed it, was overwhelming. Morally I knew it was wrong, but I just kept thinking, if the government allows it, it must be okay.

I entered that building not only confused, but emotionally drained, and the minute I had the abortion, I knew how wrong it was, and wished I could turn back time, and choose differently. I left, that day, with part of my soul gone, and that part of me, I have never gotten back. I will spare you, of all the negative details, I have experienced, due to having an abortion.

For many years in the past, I have prayed in front of Planned Parenthood and I have witnessed countless numbers of woman and men entering the building, to have an abortion, many with the same confusing look on their faces, as I experienced. I have tried to council them, in hopes they would listen to me, and not make the same mistake.

Those that did enter with a confidence, never came out looking the same. Mostly all, afterwards, left with the look of emotional distress and with a part of their soul missing, as well.

Instead of a Bill, that has no protection for babies at all, wouldn't it be great that our society put into place a Bill that protects All Lives, because isn't that the Truth, All Lives matter, even those, who cannot speak for themselves yet!

And wouldn't it be great to see more clinics put into place, where a mother and her child are safeguarded, where she can bring her child to full term and give that child up for adoption, because so many couples long to have children and physically cannot.

My tip; if your contemplating an abortion, don't do it. Nine months of inconvenience to a unwelcomed pregnancy, is nothing, compared to the physical and mental suffering you will endure, for a lifetime, of having an abortion.

Thanking you in advance,

Jean Osborne
