I got pregnant at 17, when I decided to keep the baby I got harassed by not only my class mates but also a guidance counselor. I saw that it wasn't my choice (if your pro-choice) it was Society choice. I was told a baby would ruin my life, that I would become a welfare crack mom and that I was a horrible mom because I didn't get an abortion. I still kept the baby because I believe all life is precious. I worked hard and succeeded. My baby is now 9 and is amazing kid, he is happy that he is alive.

When I was pregnant I watched him grow, I felt him move and form the womb saw his personality.

Why do plants and animals have more rights than our children?

The unborn doesn't have a voice but they are alive they are humans and just like us we were once unborn. We all were what we are calling a collection of cell, an it and a fetus. Look around, we all were there, and we had human rights. Don't take their rights away when you had them. If we dehumanized them then we dehumanized us.

Thank you
Sally Hale
